NCES uses estimated FTE enrollment to calculate expenses by function per FTE and core revenues per FTE as reported in the NPEC IPEDS Data Feedback Report. Part G - Retention Rates

In order to calculate retention rates for your cohort of first-time bachelors (or equivalent) degree-seeking undergraduates, please do the following:

1) Establish your cohorts (full time separate from part time) of first-time bachelors

(or equivalent) degree-seeking undergraduates, which consists of those enrolled at

your institution in fall 2005 (including those enrolled for the first time the preceding

summer term and those whose intent was not known upon entry to the institution).

2) Count the number of students in each cohort who re-enrolled or are still enrolled

at your institution in fall 2006.

3) Calculate the retention rates (see formula below).

Use your institutions official fall reporting date when calculating these percentages.

Please report full time and part time percentages separately. The student status (full or part time) should be based on the fall 2005 status, even if this has changed by fall

2006.

NOTE: The fall 2005 cohort data used for these calculations may be adjusted for students who left

the institution for any of the following reasons: died or were totally and permanently disabled; to

serve in the armed forces (including those called to active duty); to serve with a foreign aid service

of the Federal Government, such as the Peace Corps; or to serve on official church missions.

These are exclusions, and may be subtracted from the cohort prior to calculating the retention

rate. Do not include those students who transferred into the institution as part of your fall cohort.

Formula:

$$\frac{(\text{Re-enrolled at institution in fall 2006 (from step 2 above)}) * 100}{$$

$$-$$

$$(\text{Fall 2005 bachelors cohort (from step 1 above) Exclusions from fall 2005 bachelors cohort})$$
