

Estimate of Burden Changes due to the Toxics Release Inventory Form A Eligibility Revisions Implementing the 2009 Omnibus Appropriations Act

Form R's

Burden:	Responses	Hours
Previous ¹	67,707	3,218,179
New ²	81,382	3,677,162
Difference between Previous and New		
Change due to New Statute ³	13,675	458,983
Change due to Agency Discretion		
Change due to Agency Adjustment		
Change due to Potential Violation of PRA		

NOTES:

¹Previous is defined as the "New" estimate of hours and responses from the NOA dated 3/23/09.

²Sum of Previous (above) and Change due to New Statute responses and hours.

³ Number of forms that will lose Form A eligibility and must be reported on Form Rs minus the Form Rs that may revert to Form A eligibility. Estimate of hours reflects the increase in Form R reporting burden. Note that these estimates of responses are calculated using the RY 2007 PDR. Burden hours are calculated based on the Form R ICR dated December 10, 2007.

Form A

Burden:	Responses	Hours
Previous ¹	10,235	515,901
New ²	4,019	197,483
Difference between Previous and New		
Change due to New Statute ³	-6216	-318,418
Change due to Agency Discretion		
Change due to Agency Adjustment		
Change due to Potential Violation of PRA		

NOTES:

¹Previous is defined as the universe of Form As and associated reporting burden from the NOA dated 3/2/08 for the Form A ICR. Note that these estimates were generated using the RY2005 PDR.

²Sum of Previous (above) and Change due to New Statute responses and hours.

³ Number of Forms that will lose Form A eligibility and must be filed as Form Rs minus the Form Rs that may revert to Form A eligibility. Since Form As on average address 2.2 chemicals, the number of Form A "Responses" is the number estimated for Form Rs, above, divided by 2.2, and is listed as a loss instead of a gain. Note that these estimates of responses are calculated using the RY 2007 PDR. Burden hours are calculated based on the Form A ICR approved by OMB in the NOA dated 3/2/08.
