### ANNUAL REPORT OF

### TO THE

### SURFACE TRANSPORTATION BOARD

### FOR THE

### YEAR ENDED DECEMBER 31, 200\_

Name, official title, telephone number, and office address of officer in charge of correspondence with the Board regarding this report.

(Name)		(Title)	<del></del>
(Telephone number)	(Area code)	(Telephone number)	
(Office address)		(Street and number, city, state, and ZIP code)	

### NOTICE

- 1. This report is required for every class I railroad operating within the United States. Three copies of this Annual Report should be completed. Two of the copies must be filed with the Surface Transportation Board, Office of Economics, Environmental Analysis, and Administration, 395 E Street, S.W. Suite 1100, Washington, DC 20423, by March 31 of the year following that for which the report is made. One copy should be retained by the carrier.
- 2. Every inquiry must be definitely answered. Where the word "none" truly and completely states the fact, it should be given as the answer. If any inquiry is inapplicable, the words "not applicable" should be used.
- 3. Wherever the space provided in the schedules in insufficient to permit a full and complete statement of the requested information, inserts should be prepared and appropriately identified by the number of the schedule.
- 4. All entries should be made in a permanent black ink or typed. Those of a contrary character must be indicated in parenthesis. Items of an unusual character must be indicated by appropriate symbols and explained in footnotes.
- 5. Money items, except averages, throughout the annual report form should be shown in thousands of dollars adjusted to accord with footings. Totals for amounts reported in subsidiary accounts included in supporting schedules must be in agreement with related primary accounts. For purposes of rounding, amounts of \$500 but less than \$1,000 should be raised to the nearest thousand dollars, and amounts of less than \$500 should be lowered.
- 6. Except where the context clearly indicates some other meaning, the following terms when used in this Form have the following meanings:
  - '(a) Board means Surface Transportation Board.
  - (b) Respondent means the person or corporation in whose behalf the report is made.
  - (c) Year means the year ended December 31 for which the report is being made.
- (d) Close of the Year means the close of business on December 31 for the year in which the report is being made. If the report is made for a shorter period than one year, it means the close of the period covered by the report.
- (e) Beginning of the Year means the beginning of business on January 1 of the year for which the report is being made. If the report is made for a shorter period than one year, it means the beginning of that period.
- (f) Preceding Year means the year ended December 31 of the year preceding the year for which the report is made.
- (g) The Uniform System of Accounts for Railroad Companies means the system of accounts in Part 1201 of Title 49, Code of Federal Regulations, as amended.
- 7. The ICC Termination Act of 1995 abolished the Interstate Commerce Commission and replaced it with the Surface Transportation Board. Any references to the Interstate Commerce Commission or Commission contained in this report refer to the Surface Transportation Board.
- 8. Any references to the Bureau of Accounts or the Office of Economics contained in this report refer to the Office of Economics, Environmental Analysis, and Administration of the Surface Transportation Board.

### **SPECIAL NOTICE**

Docket No 38559, Railroad Classification Index, (ICC served January 20, 1983), modified the reporting requirements for Class II, Class III, and Switching and Terminal Companies These carriers will notify the Board only if the calculation results in a different revenue level than its current classification.

The dark borders on the schedules represent data that are captured by the Board

### Supplemental Information about the Annual Report (R-1)

This information collection is mandatory pursuant to 49 U.S.C 11145.

The estimated hour burden for filing this report is less than 800 hours.

Information in the Annual Reports is used to monitor and assess railroad industry growth, financial stability, traffic, and operations and to identify industry changes that may affect national transportation policy.

In addition, the Board uses data from these reports to more effectively carry out regulatory responsibilities, such as acting on railroad requests for authority to engage in Board regulated financial transactions (for example, mergers, acquisitions of control, consolidations and abandonments); developing the Uniform Rail Costing System (URCS); conducting rail revenue adequacy proceedings; developing rail cost adjustment factors; and conducting investigations and rulemakings.

The information in this report is ordinarily maintained by the agency in hard copy for 10 years, after which it is transferred to the National Archives, where it is maintained as a permanent record. These reports are also maintained by the agency indefinitely on microfiche. In addition, some of this information is posted on the Board's website, where it may remain indefinitely.

All information collected through this report is available to the public.

The display of a currently valid OMB control number for this collection is required by law

### **B. IDENTITY OF RESPONDENT**

Answers to the questions asked should be made in full, without reference to data returned on the corresponding page of previous reports. In case any changes of the nature referred to under inquiry 4 on this page have taken place during the year covered by this report, they should be explained in full detail.

- 1 Give the exact name of the respondent in full. Use the words "The" and "Company" only when they are parts of the corporate name. Be careful to distinguish between railroad and railway. The corporate name should be given uniformly throughout the report, notably on the cover, on the title page, and in the "Venfication". If the report is made by receivers, trustees, a committee of bondholders, or individuals otherwise in possession of the property, state names and facts with precision. If the report is for a consolidated group, pursuant to Special Permission from the Board, indicate such fact on line 1 below and list the consolidated group on page 4.
- 2. If incorporated under a special charter, give date of passage of the act, if under a general law, give date of filing certificate of organization, if a reorganization has been effected, give date of reorganization. If a receivership or other trust, also give date when such receivership or other possession began. If a partnership give date of formation and also names in full of present partners.
- 3. State the occasion for the reorganization, whether by reason of foreclosure of mortgage or otherwise, according to the fact. Give date of organization of original corporation and refer to laws under which organized

_	
1	Exact Name of common carner making this report
2	Date of incorporation
3	Under laws of what Government. State, or Territory organized? If more than one, name all. If in bankruptcy, give court of jurisdiction and dates
	of beginning of receivership and of appointment of receivers or trustees
4	If the respondent was reorganized during the year, involved in a consolidation or merger, or conducted its business under a different name, give
	full particulars
	STOCKHOLDERS' REPORTS

### NOTES

- (A) Use common carner portion only Common carner refers to railway transportation service
- (8) Rent income is the sum of Schedule 410, column h, lines 121, 122, 123, 127, 128, 129, 133, 134, 135, 208, 210, 212, 227, 229, 231, 312, 3:4, and 316. Rent income is added to railway operating revenues to produce total revenues. Rent income is also added to total operating expenses to exclude the rent revenue items from operating expense.
- (C) If result is negative, use zero

#### GENERAL INSTRUCTIONS CONCERNING RETURNS IN SCHEDULES 310 AND 310A

- Schedule 310 should give particulars of stocks, bonds, and other secured obligations, unsecured notes, and investment advances of affiliated companies held by respondent at the close of the year. Also, disclose the investments made, disposed of, and written down during the year and the applicable dividends and interest credited to income as a result of those investments. They should exclude securities issued or assumed by respondent. For definition of affiliated companies, see the rules governing Account No. 721 "Investments and Advances, Affiliated Companies", in the Uniform System of Accounts for Raifroad Companies.
- 2 List the investments in the following order and show a total for each group and each class of investment by accounts in numerical order
  - (A) Stocks
    - (1) Carriers-active
    - (2) Carners-mactive
    - (3) Noncamers-active
    - (4) Noncamers-inactive
  - (B) Bonds (including US government bonds)
  - (C) Other secured obligations
  - (D) Unsecured notes
  - (E) Investment advances
- 3 The subclassification of classes (B), (C), (D), and (E) should be the same as those provided for class (A)
- 4 The kinds of industry represented by respondent's investments in the securities of other companies should be shown by symbol opposite the names of the issuing corporations. The symbols and industrial classifications are as follows:

Symt Kind of Industry

- Agriculture, forestry, and fisheries
- II Mining
- III Construction
- V Manufacturing
- V Wholesale and retail trade
- VI Finance, insurance, and real estate
- VII Transportation communications, and other public utilities
- VIII Services
- IX Government
- X All other
- 5 By carners, as the term is used here, is meant companies owning or operating railroads, facilities auxiliary thereto such as bridges, fernes union depots, and other terminal facilities, sleeping cars, partor cars, dining cars, freight cars, express services and facilities, electric railways, highway motor vehicles, steamboats and other manne transportation equipment, pipe lines (other than those for transportation of water), and other instrumentalities devoted to the transportation of persons or property for hire. Telegraph and telephone companies are not meant to be included.
- 6 Noncamer companies should, for the purposes of these schedules, include telephone companies, telegraph companies, mining companies, manufacturing companies, hotel companies, etc. Purely holding companies are to be classified as noncarrier companies, even though the securities held by such companies are largely or entirely issued or assumed by carriers.
- 7 By an active corporation is meant one which maintains an organization for operating property or administering its financial affairs. An inactive corporation is one which has been practically absorbed in a controlling corporation and which neither operates property nor administers its financial affairs. If it maintains an organization it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises.
- 8 Combine in one account investments in which the original cost or present equity in total assets is less than \$10,000
- 9 Include investments in unincorporated entities such as lessee organizations. Exclude amounts normally settled on a current basis
- 10 Do not include the value of securities issued or assumed by respondent
- 11 For affiliates which do not report to the Surface Transportation Board and are jointly owned, disclose in footnotes the name and extent of control of the other controlling entities

### 310. INVESTMENTS AND ADVANCES AFFILIATED COMPANIES

### Dollars in Thousands

- 1 Give particulars of investments in stocks, bonds, other secured obligations, unsecured notes, and investment advances of companies affil atent with respondent, from accounts 715 (sinking funds), 716 (capital funds), 721 (investments and advances affiliated companies), and 717 (other funds)
- 2 Entries in this schedule should be made in accordance with the definitions and general instructions given on page 25 classifying the investments by means of letters, figures, and symbols in columns (a), (b) and (c)
- 3 Indicate by means of an arbitrary mark in column (d) the obligation in support of which any security is pledged, mortgaged, or otherwise encimbered. Give names and other important particulars of such obligations in footnotes.
  - 4 Give totals for each class and for each subclass and a grand total for each account
- 5 Entries in column (d) should show date of maturity of bonds and other evidence of indebtedness. In case obligations of the same designation mature senally, the date in column (d) may be reported as "Serially \_\_\_\_\_\_ to \_\_\_\_\_". Abbreviations in common use in standard financial publications may be used to conserve space.

### 310. INVESTMENTS AND ADVANCES AFFILIATED COMPANIES - (Continued)

(Dollars in Thousands)

- 6 If any of the companies included in this schedule are controlled by respondent, the percent of control should be shown in column (e). In case any company listed is controlled other than through actual ownership of securities, give particulars in a footnote. In case of joing control, give names of other parties and particulars of control.
- 7 If any advances reported are pledged, give particulars in a footnote
- 8 Investments in companies in which neither the original cost or present equity in total assets are less than \$10,000 may be combined in 1 figure
- 9 Also include investments in unincorporated entities such as lessee organizations (exclusive of amounts nominally settled on a current basis)
- 10 This schedule should not include securities issued or assumed by respondent
- 11 For affiliates which do not report to the Surface Transportation Board and are jointly owned, give names and extent of control by other entities by footnotes

Road Initials 310A. INVESTMENTS IN COMMON STOCK OF AFFILIATED COMPANIES

Year

Undistributed Earnings From Certain Investments in Affiliated Companies (Dollars in Thousands)

Report below the details of all investments in common stock included in Account 721, Investments and Advances Affiliated Companies Enter in column (c) the amount necessary to retroactively adjust those investments. (See instruction 5-2, Uniform System of Accounts) Enter in column (d) the share of undistributed earnings (i.e., dividends) or losses.

Enter in column (e) the amortization for the year of the excess of cost over equity in net assets (equity over cost) at date of acquisition. For definitions of carrier and noncarrier, see general instructions

#### INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 330

- 1. Give particulars of balances at the beginning and close of the year and of all changes during the year in Account No. 731. Road and Equipment Property" and Account No. 732. "Improvements on Leased Property" classified by primary accounts in accordance with the Uniform System of Accounts for Railroad Companies. The balances, by primary accounts, should, insofar as known, be stated in column (b) and all changes made during the year should be analyzed in columns (c) to (f) inclusive. Column (g) should be the net of the amounts in columns (c) through (f). Column (h) is the aggregate of columns (b) through (f), inclusive. Grand totals of columns (b) and (h) should equal the sum of Accounts 731 and 732 for the respective periods, if not, a full explanation should be made in a footnote.
- 2 In column (c), show disbursements made for the specific purpose of purchasing constructing, and equipping new lines and for the extension of old lines, as provided for in instruction 2-1, literus to be charged" in the Uniform System of Accounts for Railroad Companies for such
- 3 In column (d), show the cost of a railway or portion thereof acquired as an operating entity or system by purchase merger consolidation, reorganization, receivership sale or transfer, or otherwise
- 4 Columns (c) and (e) should include all entries covering expenditures for additions and betterments, as defined, whether or not replacing other property
- 5 All credits representing property sold, abandoned or otherwise retires should be shown in column (f)
- 6 Both the debit and credit involved in each transfer, adjustment, or clearance, between road and equipment accounts should be included in the column in which the item was initially included. Also the transfer of prior years' debits or credits from investment in road and equipment to operating expenses or other accounts, or vice versa, should be included in the column applicable to current items of like nature. Each such transfer, adjustment or clearance should be fully explained when in excess of \$100,000.
- 7 If during the year an individual charge of \$100,000 or more was made to Account No 2, "Land for Transportation Purposes," state the cost, location, area, and other details which will identify the property in a footnote
- 8 Report on line 29, amounts not included in the primary road accounts. The items reported should be briefly identified and explained under Notes and Remarks," below. Amounts should be reported on this line only under special circumstances, usually after permission is obtained from the Board for exceptions to prescribed accounting. Reference to such authority should be made when explaining the amounts reported. Respondents must not make arbitrary changes to the printed stub or column headings without specific authority from the Board.

9.	If during the year a segment of transportation property was acquired, state in a footnote the name of the vendor, the mileage acquired, and the date of acquisition, giving location and cost of the property to the respondent. Also furnish a statement of the amount included in each primary account representing such property acquired, referring to the column or columns in which the entries appear
10.	If an amount of less than \$5,000 is used as the minimum for additions and betterments to property investment accounts as provided for in Instruction 2-2 of the Uniform System of Accounts for Railroad Companies, state the amount used in a footnote
	NOTES AND REMARKS

### 332. DEPRECIATION BASE AND RATES - ROAD AND EQUIPMENT OWNED AND LEASED FROM OTHERS

- 1 Show in columns (b) and (e) for each primary account, the depreciation base used to compute depreciation charges for the month of January and in columns (c) and (f) the depreciation charges for the month of December In columns (d) and (g) show the composite rates used in computing depreciation charges for December, and on lines 30 and 39 of these columns show the composite percentage for all road and equipment accounts, respectively, ascertained by applying the primary account composite rates to the depreciation base used in computing the charges for December, and dividing that total by the total depreciation base for the same month. The depreciation base should not include cost of equipment used, but not owned, when the rents are included in rent for equipment and account nos. 31-22-00, 31-23-00, 31-25-00, 31-21-00, 35-21-00, 35-23-00, 35-23-00, and 35-25-00. It should include cost of equipment owned and leased to others when the rents therefrom are included in the rent for equipment, accounts nos. 32-21-00, 32-22-00, 32-23-00, 36-21-00, 36-22-00, 36-23-00, and 36-25-00. Inclusive. Composite rates used should be those prescribed or authorized by the Board, except that where the use of component rates has open authorized, the composite rates to be shown for the respective primary accounts should be recomputed from the December charges developed by the use of the authorized rates. If any changes in rates were effective during the year, give particulars in a footnote.
- 2 All leased property may be combined and one composite rate computed for each primary account, or a separate schedule may be included for each such property
- 3 Show in columns (e), (f), and (g) data applicable to tessor property, when the rent therefore is included in accounts nos 31-11-00, 31-13-00, 31-21-00, 31-22-00, and 31-23-00, inclusive
- 4 If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for discontinuance of accruals should be shown in a footnote, indicating the effected account(s)
- 5 Disclosures in the respective sections of this schedule may be omitted if either total road leased from others or total equipment leased from others represents less than 5% of total road owned or total equipment owned, respectively

### 335. ACCUMULATED DEPRECIATION - ROAD AND EQUIPMENT OWNED AND USED

- 1 Disclose the required information regarding credits and debils to Account No. 735, "Accumplated Depreciation: Road and Equipment Property." during the year relating to owned and used made and equipment. Include entries for depreciation of equipment owned but not used when the resulting rents are included in the "Lease Rentals Credit Equipment" accounts and "Other Rents Credit Equipment" accounts. Exclude any entries for depreciation of equipment that is used but not owned when the resulting rents are included in "Lease Rental Detri Equipment" accounts and "Other Rents Detri Equipment" accounts. (See Schedule 351 for accumplated ducred and requipment exhall and eased to others.)
  - 2 If any data are included in columns (d) or (f), explain the entries in detail
  - 3 A debit balance in columns (b) or (g) for any primary account should be designated "Dr"
- 4 If there is any inconsistency between credits to reserves as shown in column (c) and charges to operating excenses, a full explanation should be given
  - 5 Enter amounts representing amortization under an authorized amortization program other than for defense projects on lines 29 and 39

### 340. DEPRECIATION BASE AND RATES - IMPROVEMENTS TO ROAD AND EQUIPMENT LEASED FROM OTHERS

- 1 Show in column (b) for each primary account the depreciation base used in computing the depreciation charges for the month of January, and in column (c) show the depreciation base used in computing the depreciation charges for the month of December, in column (d) show the composite rates used to compute depreciation charges for December, and on lines 30 and 40 of these columns show the composite percentage of all road and equipment accounts, respectively ascertained by applying the primary account composite rates to the depreciation base used in computing the charges for December and dividing the total so computed by the total depreciation base for the same month. This schedule should include only improvements to leased property charged to Account 732, "improvements on Leased Property." The composite rates used should be those prescribed or authorized by the Board, except that where the use of component rates has been authorized the composite rates to be shown for the respective primary accounts should be recomputed from the December charges developed by the use of the authorized rates. If any changes in rates were effective during the year, give particulars in a footnote.
- 2 All improvements to leased property may be combined and one composite rate computed for each primary account or a separate schedule may be included for each such property
- 3 If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for discontinuance of accruals should be shown in a footnote, indicating the effected account(s).
- 4 Disclosures in the respective sections of this schedule may be omitted if either total road leased from others or total equipment leased from others represents less than 5% of total road owned or total equipment owned, respectively. However, line 41, Grand Total, should be completed

### 350. DEPRECIATION BASE AND RATES - ROAD AND EQUIPMENT LEASED TO OTHERS

- This schedule is to be used in cases where the related depreciation reserve is carried in the accounts of the respondent and the rent therefrom is included in Accounts 32-11-00, 32-12-00, 32-13-00, 32-21-00, 32-22-00, and 32-23-00
- 2 Show in columns (b) and (c), for each primary account, the depreciation base used in computing the depreciation for the months of January and December, respectively, with respect to road and equipment owned by the respondent but leased to others, the depreciation charges for which are not included in operating expenses of the respondent, but for which the depreciation reserve is recorded in the accounts of the respondent. If the base for road is other than the original cost of estimated original cost as found by the Board's Office of Economic and Environmental Analysis, brought to a current date by the respondent from its Order No. 3 records and accounts, or is other than ledger value for equipment, a full explanation should be given.
- 3 In column (d) show the composite rates used to compute depreciation for December, and on lines 29 and 38 of this column show the composite percentage of all road and equipment accounts, respectively, ascertained by applying the primary account composite rates to the depreciation base used to compute depreciation for December and dividing the total also computed by the depreciation base
- 4 If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless in support of depreciation reserves. Authority for discontinuance of accruals should be shown in a footnote, indicating the effected account(s)
- 5 Disclosures in the respective sections of this schedule may be omitted if either total road leased to others or total equipment leased to others represents less than 5% of total road owned or total equipment owned, respectively. However, line 39, Grand Total, should be completed

### 351. ACCUMULATED DEPRECIATION - ROAD AND EQUIPMENT LEASED TO OTHERS

- 1 This schedule is to be used in cases where the related depreciation reserve is carried in the accounts of the respondent and the rent therefrom is included in Accounts 32-11-00, 32-12-00, 32-21-00, 32-22-00 and 32-23-00
- 2 Disclose credits and debits to Account 735. "Accumulated Depreciation Road and Equipment Property," during the year relating to road and equipment leased to others, the depreciation charges for which are not included in operating expenses of the respondent (See Schedule 330 for the reserve relating to road and equipment owned and used by the respondent
- 3 If any entries are made for column (d) "Other credits" or column (f) "Other debits," state the facts occasioning such entries on page 39 A debit balance in columns (b) or (g) for any primary account should be shown in parenthesis or designated "Or "
- 4 Disclosures in the respective sections of this schedule may be omitted if either total road leased to others or total equipment leased to others represents less than 5% of total road owned or total equipment owned, respectively. However, line 39, Grand Total, should be completed

42 Road Initials: Year

## 352A. INVESTMENT IN RAILROAD PROPERTY USED IN TRANSPORTATION SERVICE (By Company) (Dollars in Thousands)

- 1 Disclose the investment in railway property used in transportation service at the close of the year. This investment represents the aggregate of property owned or leased by respondent and used in respondent's transportation service. Such property includes (a) investment reported in Accounts 731, "Road and Equipment Property" and 732, "improvements on Leased Property" of respondent less any 731 or 732 property leased to others for their exclusive use of road, track, or bridges (including equipment or other railway property covered by the contract). Equipment leased to others under separate distinct contracts shall not be deducted from respondent's 731 or 732 property, and (b) the investment of other companies' 731 or 732 property (including operating and lessor railroads) used by respondent when the lease is for exclusive use or control of roads, tracks, or bridges (including equipment or other railway property covered by the contract). This excludes leased equipment from operating railroads under separate distinct contracts and the investment of other carriers in property jointly used by respondent.
- 2 In column (a) classify each company in this schedule as "R" for respondent, "L" for lessor railroad, "P" for inactive or proprietary company or "O" for other leased properties
- 3 In columns (a) to (e), inclusive, first show the data requested for respondent (R) next show data for companies whose entire properties are used in transportation service of the respondent, divided between lessor (L) and proprietary (P) companies, followed by data for carriers and others (O), portions of whose property are used in transportation service of respondent. Show a total for each class of company in columns (d) and (e). Then show, as deductions, data for transportation property leased to carriers and others.
  - 4 In column (c), line-haul carriers report the miles of road used in line-haul service. Report miles in whole numbers
- 5 In column (d), show the amount applicable to Accounts 731 and 732 on the books of companies whose names appear in column (b). Values of property of other camers segregated by estimate or otherwise should correspond in amount to deductions made by the owners in their reports. If separate value is not available, an explanation should be provided. Differences between amounts shown in column (d) of this schedule and column (c), line 24, on the asset side of the general balance sheet of each individual railway should be explained in a footnote. Book values included in Accounts 731 and 732 of the owner should be reported in column (d) in reference to the investment of respondent in securities of the owner unless a good reason can be given for the contrary. Methods of estimating (by capitalizing rentals at 6% or otherwise) value of property of private owners, or portions of property of other carners, should be explained.

6 In column (e), show the amount of depreciation and amortization accrued as of the close of the year in Accounts 733, 734, 735, 736, and 772, that is applicable to the property of the carriers whose names are listed in column (b), regardless of where reserves therefor are recorded

Railroad Annual Report R-1

### 352B. INVESTMENT IN RAILROAD PROPERTY USED IN TRANSPORTATION SERVICE (By Property Account) (Dollars in Thousands)

- 1 In columns (b) through (e) give, by primary accounts, the amount of investment at the close of the year in property of respondent and each group or class of companies and properties
- 2 The amounts for respondent and for each group or class of conspanies and properties on line 44 should correspond with the amounts for each class of company and property shown in Schedule 352A. Continuing records shall be maintained by respondent of the primary property accounts separately for each company or property included in this schedule.
- 3 Report on line 29 amounts representing capitalization of rentals for leased property based on 6% per year where property is not classified by accounts by noncarrier owners, or where the cost of property leased from other carriers is not ascertainable. Identify noncarrier owners and briefly explain on page 39 the methods of estimating value of property on noncarriers or property of other carriers.
- 4 Report on line 30 amounts not included in the accounts shown, or on line 29. The items reported should be briefly identified and explained Also include here those items after permission is obtained from the Board for exceptions to prescribed accounting. Reference to such authority should be made when explaining amounts reported. Respondents must not make arbitrary changes to the printed stub or column headings without specific authority from the Board.

### 412. WAY AND STRUCTURES

- 1. Report freight expenses only
- 2 The total depreciation expense reported in column (b), line 29, should balance to the sum of the depreciation expense reported in Schedule 410, column (f), lines 136, 137, and 138
- 3 Report in column (c) the lease/rentals for the vanous property categories of way and structures. The total lease/rentals reported in column (c), line 29, should balance the net amount reported in Schedule 410, column (f), lines 118 through 123, plus lines 130 through 135. If an entire road or segment of track is leased and if the actual breakdown of lease/rentals by property category is not known, apportion the lease/rentals based on the percentage of the categories' depreciation bases for all categories of depreciable leased property. Use Schedule 352B of this report to obtain the depreciation bases of the categories of leased property.
- 4 Amortization adjustment of each road property type which is included in column (b) shall be repeated in column (d) as a debit or crodit to the appropriate line item. The net adjustment on line 29 shall equal the adjustment reported on line 29 of Schedule 335.
- 5 Report on line 28, all other lease rentals not apportioned in any category listed on lines 1 through 27
- 6 Line 11, Account 16, should not include computer and data processing equipment reported on line 37 of Schedule 415

### GENERAL INSTRUCTIONS CONCERNING RETURNS TO BE MADE TO SCHEDULE 415

- 1 Report freight expenses only
- 2 Report by type of equipment all natural expenses relating to equipment functions (salaries and wages, materials, tools supplies fuels and lubricants, purchased services, and general).
- 3 Report in column (b) net repair expense, excluding the cost to repair damaged equipment
  - Schedule 415, column (b) will balance to Schedule 410, column (f) as follows
  - (a) Locomotives, line 5 plus line 38 campared to the sum of Schedule 410, lines 202, 203, and 216 (excluding wreck repairs). Do not report in Schedule 415, Equipment Damaged from Schedule 410, line 204.
  - (b) Freight cars, line 24 plus line 39, compared to the sum of Schedule 410, lines 221, 222, and 235 (excluding wreck repairs) Do not report in Schedule 415, Equipment Damaged from Schedule 410, line 223
  - (c) Sum of highway equipment (line 32), floating equipment (line 35), passenger and other revenue equipment (line 36), computer and data processing equipment (line 37), machinery-other equipment (line 40), and work and other non-revenue equipment (line 41), compared to Schedule 410, the sum of lines 302 through 307, plus line 329 (excluding wreck repairs). Do not report in Schedule 415, equipment damaged from Schedule 410, line 308.

Note Lines 216, 235, and 320 of Schedule 410 are credit amounts

The allocation of froight car repair expenses reportable on Schedule 415 by car types shall be in accordance with Instruction 2-21. Freight train repair costing, 49 CFR 1201

4 Depreciation expense for each class of equipment by car type shall be reported in columns (c) and (d) For improvements on leased property, Accounts 732 and 733, use a supplementary Schedule 415, which will relate to Schedules 340 and 342

Depreciation charges reported in columns (c) and (d) will balance to Schedule 410, column (f) as follows

- (a) Locomotives, lines 5 and 38, compared to Schedule 410, line 213
- (b) Freight cars, lines 24 and 39, compared to Schedule 410, line 232
- (c) Sum of highway equipment (line 32), floating equipment (line 35), passenger and other revenue equipment (line 36), computer and data processing equipment (line 37), machinery-other equipment (line 40), and work and other non-revenue equipment (line 41), compared to Schedule 410, line 317
- 5 Amortization adjustment of each equipment type which is included in column (c) shall be reported in column (e) as a debit or credit to the appropriate line item. The net adjustment on line 43 shall equal the equipment amortization adjustment applicable to equipment used in freight service included in line 39, column (c), of Schedule 335
- 6 Lease/rentals reported in column (f) should balance to column (f) of Schedule 410 as follows
  - (a) Locomotives, lines 5 and 38 compared to Schedule 410, lines 207, 208, 211, and 212
  - (b) Freight cars, lines 24 and 39 compared to Schedule 410, lines 226 and 227 (note that Schedule 410, lines 230 and 231, are reported in Schedule 415, and are not included in Schedule 415)
  - (c) Sum of lease/rentals for all other equipment. Innes 32, 35, 36, 37, 40, and 41, will balance to Schedule 410, lines 311, 312, 315, and 316, except for the interchange rental on trailers and containers which is reported in Schedule 414. Therefore, both Schedules 414 and 415 should be used when balancing lease/rentals other equipment to Schedule 410. Do not report in Schedule 415, the trailer and container rentals reported in Schedule 414.
- 7 Investment base by types of equipment shall be reported in columns (g) and (h) and should not include the cost of equipment used but not owned when rents therefore are included in the rent for equipment and Account Nos 31-21-00 31-22-00, 31-23-00, 35-21-00. 35-22-00, and 35-23-00 It should include the cost of equipment owned and leased to others when the rents are included in the rent for Equipment Account Nos 32-21-00, 32-22-00 32-23-00, 36-21-00. 36-22-00, and 36-23-00
  - Property used but not owned should also be included when the rent is included in Account Nos. 31-12-00, 31-13-00, 31-21-00, 31-22-00, and 31-23-00, inclusive
  - The grand total of each equipment account in column (h) of Schedule 330 should equal the totals of line items constituting the equipment account totals of columns (g) and (h) of Schedule 415
- 8 Accumulated depreciation for each class of equipment shall be reported in columns (i) and (j). The grand total of each equipment reserve account in column (g), Schedule 335, shall equal the combined aggregate total accumulated depreciation for line items constituting the corresponding equipment accounts reported in columns (i) and (j), on Schedule 415

(Dollars in Thousands)

- Report in lines 1 2 3 4, and 10 the total of those natural expenses (salanes and wages, material, tools, supplies, fuels and lubricants, purchased services, and general) incurred in the operation of each type of specialized service facility. This schedule does not include switching services performed by train and yard crews in connection with or within specialized service facilities. Report freight expenses only
  - When it is necessary to apportion expenses, such as administrative expenses to two or more services, they shall be apportioned on the most equitable basis available to the respondent and only to the services they suppor. The total expenses in column () should balance with the respective line items in Schedule 410. Railway Operating Expenses
- delivery, or highway interchange service. Report in column (b), line 3, the expenses incurred in operating facilities for handling trailers and/or containers, including storage expenses. See Schedule 755, note R. Report in column (b), line 2, the expensos incurred in highway movements of trailers and containers performed at the expense of the reporting rallroad within a terminal area for the purpose of pick-up.
  - The operation of floating equipment in line-haul service (between distinct terminals) should be reported in column (c) on line 2 Floating operations conducted within a general terminal or harbor area Report in column (g), line 3, the expenses incurred by the railroad in loading and unloading automobiles, fucks, etc. to and from bi-level and tri-level auto rack cars. Report on line 2, column (g). should be reported in column (c). line 3 ဖ
- 7 Report on line 4, column (b), the expenses relating to heating to heating and refrigeration of TOFC COFC trailers and containers (total debits and credits). The expenses on line 4 column (h) relate to refrigeration the expense incurred by the railroad in moving automobiles, etc., between bi-level and tri-level loading and unloading facilities over the highway to shippers, receivers, or connecting carners. Report in column (f) operating expenses for land facilities in support of floating operations including the operation of docks and wharves

### 418. SUPPORTING SCHEDULE - CAPITAL LEASES

(Dollars in Thousands)

Instructions

This schedule will show the investment in capitalized leases in road and equipment by animary account

### Column

- (a) = primary account number and title for which capital lease amounts are included therein
- (b) = the total investment in that primary account
- (c) = the investment in capital leases at the end of the year/
- (d) = the current year amortization
- (e) = the accumulated amortization relating to the leased properties

			Capital Leases

#### 450. ANALYSIS OF TAXES (Dollars in Thousands) Railway Taxes Line Cross Line Check Kind of Tax Amount No No Other than U.S. Government Taxes 1 1 U.S. Government Taxes Income Taxes Normal Tax and Surtax 3 Excess Profits 3 4 Total - Income Taxes (Lines 2 and 3) 4 5 Railroad Retirement 5 Hospital Insurance 6 6 7 Supplemental Annuities 7 8 Unemployment Insurance 8 9 All Other United States Taxes 10 Total - U.S. Government Taxes 10 Total - Railway Taxes 11 11

### B. Adjustments to Federal Income Taxes

- In column (a) are listed the particulars which most often cause a differential between taxable income and pretax accounting income. Other particulars which cause such a differential should be listed under the caption "Other (Specify)" including state and other taxes deferred if computed separately. Minor items, each less than \$100,000, may be combined in a single entry under "Other (Specify)."
- 2 Indicate in column (b) the beginning of year totals of Accounts 714, 744, 762, and 786 applicable to each particular item in column (a)
- 3 Indicate in column (c) the net changes in Accounts 714, 744-762, and 786 for the net tax effect of timing differences originating and reversing in the current accounting period
- 4 Indicate in column (d) any adjustments, as appropriate including adjustments to eliminate or reinstate deferred tax effects (credits or debits) due to applying or recognizing a loss carry-forward or a loss carry-back
- 5 The total of line 19 in columns (c) and (d) should agree with the total of the contra charges (credits) to Account 557, Provision for Deferred Taxes, and Account 591 Provision for Deferred Taxes Extraordinary Items, for the current year
- 6 Indicate in column (e) the cumulative total of columns (b), (c), and (d) The total of column (e) must agree with the total of Accounts 714, 744, 762, and 786

### 460. ITEMS IN SELECTED INCOME AND RETAINED EARNINGS ACCOUNTS FOR THE YEAR

(Dollars in Thousands)

Give a brief description for all items, regardless of amount included during the year in Accounts 555. Unusual or Infrequent Items, 560, Income or Loss From Operations or Discontinued Segments, 562, Gain or Loss on Disposal of Discontinued Segments, 570 Extraordinary Items, 590, Income Taxes on Extraordinary Items, 592, Cumulative Effect of Changes in Accounting Principles, 603, Appropriations Released, 606, Other Credits to Retained Earnings, 616, Other Debits to Retained Earnings, 620, Appropriations for Sinking and Other Funds, and 621, Appropriations for Other Purposes. If appropriations released reflect appropriations provided during the year, each account should not be reported.

For Accounts 519, Miscellaneous Income, and 551, Miscellaneous Income Charges, if the total in either account exceeds 10% of net income before extraordinary items, describe the three largest items in the account and any other items in excess of 10% of net income

502. COMPENSATING BALANCES AND SHORT-TERM BORROWING AGREEMENTS (Dollars in Thousands)
Using the following notes as a guideline—show the requirements of compensating balances and short-term borrowing agreements—Footnote disclosure is required even the arrangement is not reduced to writing
Disclose compensating balances not legally restricted, lines of credit used and unused, average interest rate of short-term borrowings that are outstanding at balance sheet date, maximum amount of outstanding borrowings during the period and the weighted average rate of those borrowings.  Time deposits and certificates of deposit constituting compensating balances not legally restricted should be disclosed.  Compensating balance arrangements need only be disclosed for the latest fiscal year.  Compensating balances included in Account 703, Special Deposits, and in Account 717. Other Funds, should also be separately disclosed below.  Compensating balance arrangements are sufficiently material to require disclosure in footnotes when the aggregate of written and oral agreement balances amount to 15% or more of liquid assets (current cash balances restricted and unrestricted plus marketable securities).  When a carrier is not in compliance with a compensating balance requirement, that fact should be disclosed, along with stated and possible sanctions, whenever such possible sanctions may be immediate (not vague or unpredictable) and material.

# INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 512

partners, or their wives and other close relatives, or their agents Examples of transactions are, but 1 Furnish the information called for below between the respondent and the affiliated companies and equipment, and agreements relating to allocation of officers' salanes and other common costs including the furnishing of materials, supplies, purchase of equipment, leasing of structures, land or persons affiliated with the respondent, including officers, directors, stockholders, owners, are not restricted to management, legal accounting, purchasing, or other types of service between affiliated companies

To be excluded are payments for the following types of services

(a) Lawful tariff charges for transportation services

u

- (b) Payments to or from other carners for interline services and interchange of equipment
- connected with routine operation or maintenance, but any special or unusual fransactions (c) Payment to or from other carnors which may reasonably be regarded as ordinanly should be reported

р

0

Rе

- (d) Payments to public utility companies for rates or charges fixed in conformity with government authority
- 2 In column (a) enter the name of the affiliated company, person, or agent with which respondent company provides services to more than one affiliate and the aggregate compensation amounts aggregate compensation amounts to \$50,000 or more for the year, reference to this fact should to \$50,000 or more for the year, list all the afflirates included in the agreement and describe the allocation of charges If the respondent provides services to more than one affiliate, and the be made and the detail as to the allocation of charges should be stated. For those affiliates providing services to the respondent also enter in column (a) the percent of affiliate's gross received or provided services aggregating \$50,000 or more during the year. If an affiliated income derived from transactions with respondent

The respondent may be required to furnish as an attachment to Schedule 512 a balance sheet income statement in this Annual Report Form R-1, and should be noted (1) to indicate the method on a calendar year basis in conformity with the prescribed schedules for the balance sheet and used for depreciating equipment or other property furnished to the carner and (2) whether the transactions during the year, or alternatively, attach a "Pro Forma" balance sheet and income equipment or other reportable transaction. The statements if required should be prepared affiliate's Federal income tax return for the year was filed on a consolidated basis with the statement for that portion or entity of each affiliate which furnished the agreed to services and income statement for each affiliate with which respondent carner had reportable respondent carner

Road 3 In column (b) indicate the nature of the relationship or control between the respondent and the company or person identified in column (a) as follows

- (a) If respondent directly controls the affiliate insert the word "direct"
- (b) If respondent controls through another company insert the word "indirect."

Initials

- (c) If respondent is under common control with affiliate, insert the word "common "
- (d) If respondent is controlled directly or indirectly by the company listed in column (a) insert the word "controlled"
- arrangement of whatever kind, insert the word "other" and provide a footnote to describe (a) If control is exercised by other means, such as a management contract or other such arrangements
- building, purchase of material, etc. When the affiliate listed in column (a) provides more than one affiliate. When services are both provided and received between respondent and an affiliate they In column (c), fully describe the transactions involved such as management fees lease of type of service in column (c), list each type of service separately and show the total for the should be listed separately and the amounts shown separately in column (e)

Yea

- 5 In column (d), report the dollar amounts of transactions shown and the effect of any change in the method of establishing the terms from that used in the preceding period
- 6 In column (e), report the dollar amounts due from or to related parties and, if not otherwise apparent the terms and manner of settlement Insert (P) for paid or (R) for received by the amount in column (e)

# INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 700

State particulars of all tracks operated by the respondent at the close of the year, according to the following classifications

- (1) Line owned by respondent
- (2) Line owned by proprietary companies
- (3) Line operated under lease for a specified sum, lessor being (A) an affiliated corporation, or (B) independent or not affiliated with the respondent
- (4) Line operated under contract or agreement for contingent rent, owner being (A) an affiliated corporation, or (B) independent or not affiliated with the respondent
  - (5) Line operated under trackage rights

Give subtotals for each of the several numbered classes, in the order listed above, as well as the total for all classes

Lengths of track should be reported to the nearest WHOLE mile adjusted to accord with footings, i.e., counting one-half mile or over as a whole mile and disregarding any fraction less than one-half mile

In Column (a) insert the figure (and letter, if any) indicating its class in accordance with the above list of classifications

In Column (b) give the various proportions of each class owned or leased by respondent, listing each proportion once in any grouping. Canadian mileage should be segregated and identified on separate lines in the various groupings. For each listing, in Column (d) give its entire length (the distances between terminals of single or first main track), and in the following columns the lengths of second main track, all other main tracks, passing tracks, cross-overs and turn-outs, way switching tracks, and yard switching tracks. These classes of tracks are defined as follows.

RUNNING TRACKS - Running tracks, passing tracks, cross-overs, etc. including turn-outs from those tracks to clearance points WAY SWITCHING TRACKS - Station, team, industry, and other switching tracks for which no separate service is maintained.

YARD SWITCHING TRACKS - Yard where separate switching services are maintained, including classification, house team, industry, and other tracks switched by yard locomotives

The returns in Columns (h) and (i) should include tracks serving industries, such as mines, mills smelters, factories, etc. Tracks belonging to an industry for which no rent is payable should not be included

Tracks leading to and in gravel and sand pits and quarries, the cost of which is chargeable to a clearing account and which are used in getting out material for the respondent's use, should not be included.

Class (1) includes all lines operated by the respondent at the close of the year to which it has title in perpetuity

Class (2) includes each line, full title to which is in an inactive proprietary corporation of the respondent (i.e., one all of whose outstanding stocks or obligations are held by or for the respondent, and which is operated by the respondent or an affiliated system corporation without any accounting to the said proprietary corporation. It may also include such line when the actual title to all of the outstanding stocks or obligations rests in a corporation controlled by or controlling the respondent. But in the case of any such inclusion, the facts of the relationship to the respondent of the corporation holding the securities should be fully selforth in a footnote. An inactive corporation is one which has been practically absorbed in a controlling corporation, and which neither operates property nor administers its financial affairs. If it maintains an organization, it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises.

Class (3) includes all tracks operated under a lease or formal conveyance of less than the grantor's interest in the property, with a specific and unconditional rent reserved. The fact that the lessor does not maintain an independent organization for financial purposes is immaterial in this connection.

Class (4) is the same as Class (3), except that the rent reserved is conditional upon earnings or some other fact

Class (5) includes all tracks operated and maintained by others, but over which the respondent has the right to operate some or all of its trains. In the road of this class, the respondent has no propnetary rights, but only the rights of a licensee. Include in this class, also, on main tracks, industrial tracks and sidings owned by noncamer companies and individuals when the respondent operates over them but does not have exclusive possession of them.

Road held by respondent as a joint or common owner or a joint lessee or under any joint arrangement should be shown in its appropriate class and the entire length of the portion jointly held. The class symbol should have the letter (J) attached. Road operated by the respondent as an agent for another carrier should not be included in this schedule.

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 710	TURNS TO BE MADE IN SCHED	ULE 710	
Instructions for reporting locomotive and passenger-train car data			
1 Give particulars of each of the various classes of equipment which respondent owned or leased during the year	7 Column (k) should show aggrega For iocomotive units, report the man	. 7 Column (k) should show aggregate capacity for all units reported in column (j), as follows For locomotive units, report the manufacturer's rated horsepower (the maximum continuous nowwer cutnut from the direct lengths or continue delivered to the main generator or continue.	<u> </u>
2 In column (c), give the number of units purchased new or built in company shops. In column (d), give the number of new units leased from others. The term "new" means a unit placed in service for the first time on any railroad.	for tractive purposes) Exclude capa report the number of passenger seat cach borth in sleeping cars	for tractive purposes) Exclude capacity data for stoam locomotives. For passenger-frain cars, roport the number of passenger seats available for revenue service counting one passenger to cach borth in sleeping cars.	
3 Units leased to others for a period of one year or more are reportable in column (I). Units temporarily out of respondent's service and renited to others for less than one year are to be included in column (h). Units rented from others for a period less than one year should not be included in column (i).	8 Passenger-train car types and so Division designations Descriptions Official Railway Equipment Register	8 Passenger-train car types and service equipment car types correspond to AAR Mechanical Division designations Descriptions of car codes and designations are published in The Official Railway Equipment Register	<u> </u>
	9 Cross-checks		
4 For reporting purposes, a "locomotive unit" is a self-propelled vehicle generating or converting energy into motion, and designed solely for moving other equipment. An "A" unit is the least number of wheel bases with superstructure designed for use singly or as a lead focomotive unit in	Schedule 710	Schedule 710	
combination with other locomotive units. A "B" unit is similar to an "A" unit but it is not equipped	Line 5. column (J)	= Line 11, column (I)	<u> </u>
for use singly or as a lead locomotive tinit. A "B" unit may be equipped with hostler controls for	Line 6, column (j)	= Line 12, column (l)	Ť
independent operation at terminals	Line 7, column (j)	= Line 13, column (l)	<u> </u>
	Line 8, column (j)	= Line 14. column (I)	•
5 A "solf-propelled" car is a rail motor car propelled by electric motors receiving power from a	Line 9, column (j)	= Line 15, column (l)	
third rail or overhead, or internal combustion engines located on the car itself. Trailers equipped	Line 10. column (J)	= Line 16 column (l)	
ra use ciny in uains of cars mar are sen-properied are to de incoded as sen-properied equipment	When data appear in column (i).	When data appear in column (i), lines 1 through 8, column (k) should have data on the same lines	S

# 710. INVENTORY OF EQUIPMENT - Continued

Instructions for reporting freight-train car data

- 1 Give particulars of each of the various classes of equipment which respondent owned or leased during the year
- 2 In Column (d) give the number of units purchased or built in company shops. In Column (e) give the number of new units leased from others. The term "new" means a unit placed in service for the first time on any railroad.
- 3 Units leased to others for a period of one year or more are reportable in Column (n). Units temporarily out of respondent's service and rented to others for less than one year are to be included in Column (ii). Units rented from others for a period less than one year should not be included in Column (j).

Railroad Annual Report R-1

# 710. INVENTORY OF EQUIPMENT - Continued

4 Column (m) should show aggregate capacity for all units reported in Columns (k) and (l), as follows. For freight-train cars, report the nominal capacity (in tons of 2 000 lbs) as provided for in Rule 86 of the AAR Code of Rules Governing Cars in Internhange. Convert the capacity of tank cars to capacity in tons of the commodity which the car-s intended to customarily carry.

5 Time-mileage cars refers to freight cars, other than cabooses, owned or held under lease arrangement whose interline rental is settled on a per diem and line hauf mileage basis under "Code of Car Hire Rules" or would be so settled if used by another railroad

NOTES AND REMARKS

# 710S. UNIT COST OF EQUIPMENT INSTALLED DURING THE YEAR

(Dollars in Thousands)

- Give particulars, as requested, separately, for the various classes of new units and rebuilt units of equipment installed by respondent during the year. If information regarding the cost of any units installed is not complete at the time of filing of this report, the units should be omitted, but reference to the number of units omitted should be given in a footnote, the details as to cost to be given in the report of the following year. The cost of units under construction at the close of the year should not be reflected in this schedule even though part of the cost appears in the property account for the year. Indicate in column (e) whether an installation represents equipment purchased (P), built or rebuilt by contract in outside railroad shops (C), or built or rebuilt in company or system shops (S), including units acquired through capital zed leases (L)
- In column (a) list each class or type of locomotive unit, car or TOFC/COFC equipment on a separate line. By class is meant the standard classification used to distinguish types of locomotive units, freight cars, or other equipment adopted by the Association of American Rairoads and should include physical characteristics requested by Schedule 710. Locomotive units should be identified as to power source, wheel arrangement, and horsepower por unit, such as multiple-purpose diesel locomotive A units (B-B), 2500 HP. Cars should be identified as to special construction or service characteristics, such as aluminum-covered hopper car (LO) or steel boxcars-special service (XAP). For TOFC/COFC show the type of equipment as enumerated in Schedule 710.
  - 3 In column (c) show the total weight in tons of 2 000 pounds. The weight of equipment acquired should be the weight empty
  - The cost should be the complete cost as entered on the ledger, including foreign line freight charges and handling charges
- Data for this schedule should be confined to the units reported in Schedule 710, columns (c) and (e) for locomotive units, passenger-train cars, and company service cars, and columns (d) and (f) for freight train cars, floating equipment, and highway revenue equipment. Disclose new units in the upper section of this schedule. Disclose rebuilt units acquired or rewritten into the respondent's accounts in the lower section. The term "new" as used herein shall mean a unit or units placed in service for the first time on any railroad.
- 6 All unequipped boxcars acquired in whole or in part with incentive per diem funds should be reported on separate lines and be appropriately identified by footnote or sub-heading

721. TIES LAID IN REPLACEMENT In column (j) report the total board feet of switch and bindge ties laid in replacement Furnish the requested information concerning ties laid in replacement - 2 6

8 6

The term "spot maintenance" in column (k) means repairs to track components during routine inspections, as opposed to programmed replacements aimed at upgrading the general condition of the tracks "Percent of spot maintenance" refers to the percentage of total fies or board feet laid in replacement that are considered to be spot maintenance

In line 9 the average cost per te should include transportation charges on foreign lines, te trains, loading, inspection, and the cost of handling ties in general supply storage and seasoning yards and in the case of freating ties, also the cost of handling at treating plants and the cost of treatment. The cost of unloading, hauling over the carner's own lines and placing the ties in tracks and of train service other than that necessary in connection with loading or treatment should not be included in this schedule 4

Rallroad Annual Report R-1

# INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 755

Unit Train, Way Train, and Through Train data under items 2, 3, 4, 6, and 12 shall be obtained from conductor's wheel reports (freight) or similar reports. Unit train service is a specialized scheduled shuttle type service in equipment (railroad or privately owned) dedicated to such service moving between origin and destination. The applicable tariffs and/or contracts generally require that a specific minimum toniage or quantity of carloads be tendered as a unit for shipment on one bill of lading or other shipping document in a solid train for movement between origin and destination. Such tariffs and/or contracts generally contain restricted detention provisions and are subject to time-volume requirements which reflect the approximate capacity of the unit trains for the stated period. Way trains are defined as trains operated primarily to gather and distribute cars in road service and move them between way stations or way points. Through trains are those trains operated between two or more major concentration or distribution points. Do not include unit train statistics in way or through train statistics. A work train is a train operated solely or preponderantly for the purpose of transporting company freight, work equipment, or company employees. Statistics for work trains should be reported under them 11, only. Statistics related to company equipment, company employees, and company freight moving in transportation trains are not to be reported in Items 4-17, 6-04, 7-02, 8-04, and 8-05, as instructed in notes 1, K, and L.

- (A) Report miles of road operated at close of year, excluding industrial tracks, yard tracks, and sidings
- (B) A train-mile is a movement of a train a distance of one mile. In computing train-miles, fractions representing less that one-half mile shall be disregarded and other fractions shall be considered as one mile. Train Miles-Running shall be based on the actual distance run between terminals and/or stations and shall be computed from the official time tables or distance tables. Train-Miles shall not be increased to cover the running of locomotives from shops to terminals doubling hills, switching, or other work at way stations, or for the service of helper or pusher locomotives or of extra locomotives on double-head trains. When the carner's trains are detoured over foreign roads, the miles shall be computed on the basis of the miles actually run and in accordance with the service performed. Train-miles shall be kept separately for trains hauled by locomotives and trains moved by molorcars.
- (C) A motorcar is a self-propelled unit of equipment designed to carry freight or passengers, and is not considered a locomotive
- (D) A locomotive is a self-propelled unit of equipment designed solely for moving other equipment. A locomotive unit-mile is a movement of a locomotive unit a distance of one mile under its own power. Include miles made by all locomotive units. Exclude miles made by motorcars. Miles of locomotives in helper service shall be computed on the basis of actual distance run in such service.
- (E) All locomotive unit-miles in road service shall be based on the actual distance run between terminals and/or stations. Follow instruction (B) regarding fractions and official time tables for computing locomotive miles
- (F) Train switching locomotive-miles shall be computed at the rate of six miles per hour for the time actually engaged in such service. Include miles allowed for train locomotives for performing switching service at terminals and way stations.
- (G) Yard switching locomotive-miles shall be computed at the rate of six miles per hour for the time actually engaged in yard switching service. Include miles allowed for yard locomotives for switching service in yards where regular switching service is maintained and in terminal switching and transfer service.
- (H) A car-mile is a movement of a unit of car equipment a distance of one mile. Use car designations shown in Schedule 710. Under Railroad Owned and Leased Cars, Items 4-01 and 4-11, report both foreign cars and respondent's own cars while on the line of the respondent railroad. In Items 4-13 and 4-15, report private-line cars and shipper owned cars. Loaded and empty miles should be reported whether or not the railroad reimbursed the owner on a loaded and/or empty mile basis. Report miles made by flatcars carrying empty highway trailers that are not moving under revenue billings as empty freight car-miles. Do not report miles made by motorcars or business cars.
- (I) Exclude from Items 4-01, 4-11, 4-13, and 4-5, car-miles of work equipment, cars carrying company freight, and non-revenue private line cars moving in transportation trains. Include such car-miles in Items 4-17, 4-18, and 4-19. If private line cars move in revenue service, the loaded and empty miles should not be considered no-payment or non-revenue car-miles.
- (J) Report miles actually run by passenger-frain cars in transportation service. Passenger-train car-miles include miles run by coaches and cars in which passengers are carried at regular tariff fares without extra charge for space occupied, miles run by combination passenger and baggage, passenger and mail, passenger and express miles run by sleeping, partor, and other cars for which an extra fare is charged, miles run by dining, cafe, and other cars devoted exclusively to the serving of meals and other refreshments and by club, lounge, and observation cars, and miles run by other passenger-train cars where services are combined, such as baggage, express and mail.
- (K) From conductor's or dispatcher's train reports or other appropriate sources, compute weight in tons (2 000 pounds). Item 6-01 includes weight of all locomotive units moved one mile in transportation trains. Ton-miles of motorcars should be excluded. Items 6-02 and 6-03 represent tons behind locomotive units (cars and contents, cabooses) moved one mile in transportation trains (excluding non revenue gross ton-miles). Nonrevenue gross ton-miles in transportation trains include work equipment and cars carrying company freight and their contents. Use 150 pounds as the average weight per passenger and four icins as the average weight of contents of each head-end car.

# INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 755 - (Concluded)

- (L) From conductor's train reports or other appropriate sources, compute ton-miles of freight. Ton-miles represent the number of tons of revenue and nonrevenue freight moved one mile in a transportation train. Include net ton-miles in motorcar trains. Exclude I c I shipment of freight handled in mixed baggage express cars. Total ton-miles of revenue freight should correspond to the ton-miles reported on Form CBS.
- (M) Road service represents elapse time of transportation trains (both ordinary and light) between the time of leaving the initial terminals and the time at final terminals, including trains switching at way stations and delays on road as shown by conductor's or dispatcher's train reports. Include time of motorcar service performed by train locomotives at terminals and way stations. Report in Item 9-02, train switching hours included in Item 9-01. Train switching is the time spent by the train while performing switching service at terminals and way stations where no regular yard service is maintained. A train hour is independent of the number of locomotives in the train.
- (N) Yard switching hours are hours expended in switching service performed by yard crows in yards where regular switching service is maintained, including switching and transfer service in connection with the transportation of revenue and incidentally of company freight. Hours in yard switching, are independent of the number of locomotives used.
- (O) Work-train miles include the miles run by trains engaged in company service such as official inspection, inspection trains for railway commissioners for which no revenue is received, trains running special with fire apparatus to save camer's property from destruction. Itrains run for transporting the camer's employees to and from work when no transportation charge is made, wrecking trains run solely for the purpose of transporting company material, trains run for distributing material and supplies for use in connection with operations, and all other trains used in work-train services. Exclude miles run by locomotives while engaged incidentally in switching company materials in company shops or material yards in connection with regular yard switching service or in switching equipment for repairs between yards and shops.
- (P) The number of loaded freight cars shall be obtained from the conductors' wheel report and shall be the sum of all loaded cars handled by each train. For example, if a car moves loaded (1) in a way train from the origination points, (2) in two through trains, and (3) in a way-train to the destination point, the total count of loaded cars would be four two counts for the movements in through trains. Therefore, each car originated or received from a connecting carrier receives an initial count, plus one count for each subsequent physical transfer between trains on respondent's lines. No additional count is given because of crew change or changes in track identification number unless there is a physical transfer of the car between trains. Each car moving under revenue billing shall be considered as a loaded car.
- (Q) Report vehicles (TOFC trailers/containers, automobiles and trucks) loaded and unloaded to and from TOFC and multiple level freight cars when the work is performed at the railroad's expense
- (R) Report the number of loaded revenue trailers/containers picked up plus revenue trailers/containers delivered in TOFC/COFC and in highway interchange service, when the work is performed at the railroad's expense. (Performed at railroad's expense means that railroad employees perform the service or that the railroad hires a subsidiary or outside contractor to perform the service.) Do not include those trailers/containers which are picked up or delivered by a shipper or motor carrier, etc. when a tariff provision requires that the shipper or motor carrier, etc., and not the railroad, perform that service. Note The count should reflect the trailers/containers for which expenses are reported in Schedule 417, line 2, column (b)
- (S) Report under Manne Terminals, Item 16, the tons loaded onto and unloaded from manne vessels at the expense of the reporting railroad
- (T) Report the total number of foreign railroad cars on line at the end of the year (except surplus cars, see below) Foreign railroad cars refers to freight cars owned by other railroads whose interline rental is settled on time (by hour) and actual line-haul mileage charges under the Code of Car Hire Rules

Carners will be governed by local conditions in determining whether a car at an interchange point should be considered "on-line" Unserviceable cars include cars on repair tracks undergoing or awaiting repairs. They include cars on repair tracks repaired and awaiting switching, cars on repair tracks undergoing or awaiting repairs switching, cars awaiting movement to repair tracks held in train yards (excluding cars which are to be repaired in the train yard without loss of time), cars moving empty in trains en route to shop, and cars stored awaiting disposition

Surplus cars are cars which are in serviceable condition for loading on the last day of the year, but have not been placed for loading within 48 hours. This count can be an annual average based on weekly count of cars that have not been placed for loading within 48 hours.
