

2009 SUPPORTING STATEMENT
(0572-0123)

7 CFR Part 1721, Extensions of Payments of Principal and Interest

A. Justification

1. Explain the circumstances that make the collection of information necessary.

This collection of information consists of information on the procedures which borrowers must follow in order to request extensions of principal and interest. Authority for these extensions is contained in Section 12 of the Rural Electrification Act of 1936 (RE Act), as amended. Eligible purposes include financial hardship, energy resource conservation (ERC) loans, renewable energy project, distributed generation projects, and contributions-in-aid of construction. These procedures are codified at 7 CFR 1721, subpart B.

2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the Agency has made of the information received from the current collection.

The required information will be submitted by existing RUS borrowers in order to request an extension of principal and interest. The following will be submitted for each type of deferment:

(a) Deferments for financial hardship. A Borrower requesting a Section 12 deferment because of financial hardship must submit the following:

(1) A summary of the financial position of the Borrower, based on the latest information available (usually less than 60 days old.)

(2) A copy of the board resolution requesting an extension due to financial hardship.

(3) A 10-year financial forecast of revenues and expenses on a cash basis, by year, for the period of the extension and 5 years beyond to establish that the remaining payments can be made as rescheduled.

(4) A listing of notes or portions of notes to be extended, the effective date for the beginning of the extension, and the length of the extension.

(5) A narrative description of the nature and cause of the hardship and the strategy that will be instituted to mitigate or eliminate the effects of the hardship.

(b) Deferments for energy resource conservation loans. A Borrower requesting principal deferments for an ERC loan program should submit the following information:

(1) A letter from the Borrower's General Manager requesting an extension of principal payments for the purpose of offering an ERC loan program to its members and outlining the details of the program.

(2) A copy of the board resolution establishing the ERC loan program.

(c) Deferments for renewable energy projects. A Borrower requesting principal deferments for its renewable energy project should submit the following information:

(1) A letter from the Borrower's General Manager requesting an extension of principal payments for the purpose of offering a renewable energy project program to its members and outlining the details of the program.

(2) A copy of the board resolution establishing the renewable energy project loan program.

(d) Deferment for distributed generation projects. A Borrower requesting principal deferments for distributed generation projects must submit the following information:

(1) A letter from the Borrower's General Manager requesting an extension of principal payments for the purpose of financing distributed generation projects and describing the details of the project.

(2) A copy of the board resolution establishing the distributed generation projects program.

(e) Deferments for contribution-in-aid of construction.

(1) A letter from the Borrower's General Manager requesting an extension of principal payments for the purpose of offering a contribution-in-aid of construction and outlining the details of the program.

(2) A copy of the board resolution establishing the contribution-in-aid of construction loan program.

(3) A summary of the calculations used to determine the average cost per residential consumer.

For all deferments, the borrower will complete a legal agreement and associated materials. Completion time for this action has been included with each of the types of deferments.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission of responses, and the basis for the decision for adopting this means of collection.

RUS is committed to meeting the requirements of the E-Government Act, which requires Government agencies in general to provide the public the option of submitting information or transacting business electronically to the maximum extent possible.

Borrowers use their own software to prepare letters, board resolutions, and supporting analysis. However, RUS continues to explore ways in which to offer an electronic solution for this collection.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.

There is no duplication as the required information is specific to each borrower and each loan.

5. If the collection of information impacts small businesses or other small entities (item 5 of OMB Form 83-1), describe any methods used to minimize burden.

RUS believes that it has limited the burden on both large and small entities and that the required information is the least amount needed to maintain loan security.

6. Describe the consequences to Federal program or policy activities if the collection is not conducted or conducted less frequently, as well as any technical or legal obstacles to reducing burden.

The collection of information occurs only when an extension of payments of principal and interest is requested by the borrower; therefore, the collection could not be performed less frequently. Moreover, collections are made to provide needed benefits to borrowers while also maintaining the integrity of RUS loans and their repayment of taxpayers monies.

7. Explain any special circumstances that would cause an information collection to be conducted in a manner:

- a. Requiring respondents to report information more than quarterly.
