Plan Overview Merit Review Process Evaluation of Multis & Joint Activities Stakeholder Input Planned Programs

Welcome Dallas Holmes.

1. Plan Overview

State: Utah
State Abbreviation: UT
Institution Name: Utah State University

1. Enter a brief summary about your Plan of Work for fiscal year 2010-2014. Click "Save" to save changes.

If you are pasting from Word, please clean the text by clicking [icon] from the menu below.
Warning: not cleaning the text may result in formatting issues and loss of data.

This plan of work encompasses nine major program areas: (1) Land and Sustainable Communities, (2) Sustainable Plant Communities, (3) Sustained Livestock Production, (4) Plant, Animal, and Microbial Genomics, (5) Nutrition, Production, and Safety of Food Products, (6) Water and Soil Conservation and Uses, (7) Natural Resource Systems and the Environment, (8) Production, Marketing, Trade, and Development Economics, and (9) Individuals, Families, and Communities. Each is briefly described below.

Land and Sustainable Communities

The Western U.S. contains many of the fastest growing states in the nation. These states often contain vast tracts of public land that comprise an average of 60% of the available land base, surrounding smaller areas that are privately owned which are adjacent to running or storage water. Traditionally, these states have relied on livestock or extractive industries to fuel local economies, but this situation is changing rapidly as urban areas expand into the relatively small privately held acreage, most of which involves agriculture in some form. In addition, there are many resulting conflicts between public and private land and their uses. Finally, many rural communities remain

Plan Overview Merit Review Process Evaluation of Multis & Joint Activities Stakeholder Input Planned Programs

II. Merit Review Process

1. Select the Merit Review Process that will be employed during the 5-Year Plan of Work cycle. (Check all that apply.)

- Internal University Panel
- External University Panel
- External Non-University Panel
- Combined Internal and External University Panel
- Combined Internal and External University and External Non-University Panel
- Expert Peer Review
- Other

2. Write your brief explanation here.

Merit Review Process - Extension Plan: The cooperative extension service merit review process will involve a review by the University of Wyoming, University of Arizona, and the University of New Mexico extension services. These institutions will review the program components suggested in each program area utilizing extension faculty qualified as specialists with significant program experience in the area being reviewed. In turn, Utah State University Cooperative Extension Service will review the work from these three institutions.

Scientific Peer Review Process - Agricultural Experiment Station: The scientific peer-review process within the agricultural experiment station involves two steps. The first step includes a review by two scientists requested by the principal investigator (PI). These two scientists provide written comments regarding the proposal which are

Plan Overview Merit Review Process Evaluation of Multis & Joint Activities Stakeholder Input Planned Programs

III. Evaluation of Multis & Joint Activities

1. How will the planned programs address the critical issues of strategic importance, including those identified by the stakeholders?

Identified issues of importance to research, program development and delivery will be reviewed periodically by collaborators. Collaborators include federal and state agencies, private and non-profit groups, geographically contiguous state extension and experiment stations, university academic departments, and the state holders throughout the state. Research and Extension leaders will then establish a prioritized listing of critical issues of strategic importance in Utah which will be routinely reviewed and addressed in the plan of work.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

2. How will the planned programs address the needs of under-served and under-represented populations of the state(s)?

Under-served and under-represented populations as one group have participated in the issue identification process that was considered in the development and orchestration of the Utah plan of work. The developed plan in each program area is designed to meet the identified stakeholder issues and due consideration of the needs of under-represented and under-served population are addressed in the plan. Priorities established in the plan will be routinely reviewed with under-served and under-represented audiences

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

3. How will the planned programs describe the expected outcomes and impacts?

will be routinely reviewed with under-served and under-represented audiences

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

3. How will the planned programs describe the expected outcomes and impacts?

The planned programs specifically describe the expected outcomes and impacts under each planned program area consistent with the required outline. The outcomes and impacts are enumerated as specifically as possible. It is expected that further refinements in the outcomes and impacts can be made as more data become available.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

4. How will the planned programs result in improved program effectiveness and/or efficiency?

The planned programs will enhance program effectiveness and efficiency by setting specific objectives and associated outcomes and impacts that are measurable. Adjustments to the plan will be made based on outcomes achieved and re-targeting of programs to serve the needs of the client served.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

Plan Overview Merit Review Process Evaluation of Multis & Joint Activities Stakeholder Input Planned Programs

Actions to Seek Methods to Identify Methods to Collect How Considered

IV. Stakeholder Input - Actions to Seek

1. Actions taken to seek stakeholder input that encourages their participation. (Check all that apply.)

- Use of media to announce public meetings and listening sessions
- Targeted invitation to traditional stakeholder groups
- Targeted invitation to non-traditional stakeholder groups
- Targeted invitation to traditional stakeholder individuals
- Targeted invitation to non-traditional stakeholder individuals
- Targeted invitation to selected individuals from general public
- Survey of traditional stakeholder groups
- Survey of traditional stakeholder individuals
- Survey of the general public
- Survey specifically with non-traditional groups
- Survey specifically with non-traditional individuals
- Survey of selected individuals from the general public
- Other

Write your brief explanation here.

Input from stakeholders will continue to be sought by each county who will hold sessions with stakeholders through the year to obtain input into the plan and proposed revisions.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

Actions to Seek Methods to Identify Methods to Collect How Considered

IV. Stakeholder input - Methods to Identify

2(A). A brief statement of the process that will be used by the recipient institution to identify individuals and groups who are stakeholders and to collect input from them. (Part - 1)

1. Method to identify individuals and groups. (Check all that apply.)

- Use Advisory Committees
- Use Internal Focus Groups
- Use External Focus Groups
- Open Listening Sessions
- Needs Assessments
- Use Surveys
- Other

Write your brief explanation here.

Extension county offices and the Agriculture Experiment Station will share with advisory committees through open meetings, focus groups and surveys the current plan of work to ascertain its relevance to these stakeholder groups. Modifications to the plan that are suggested by these groups from the methodologies indicated will then be considered in subsequent plan revisions.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

Actions to Seek Methods to Identify Methods to Collect How Considered

IV. Stakeholder Input - Methods to Collect

2(B). A brief statement of the process that will be used by the recipient institution to identify individuals and groups who are stakeholders and to collect input from them. (Part - 2)

1. Methods for collecting Stakeholder Input. (Check all that apply.)

- Meeting with traditional Stakeholder groups
- Survey of traditional Stakeholder groups
- Meeting with traditional Stakeholder individuals
- Survey of traditional Stakeholder individuals
- Meeting with the general public (open meeting advertised to all)
- Survey of the general public
- Meeting specifically with non-traditional groups
- Survey specifically with non-traditional groups
- Meeting specifically with non-traditional individuals
- Survey specifically with non-traditional individuals
- Meeting with invited selected individuals from the general public
- Survey of selected individuals from the general public
- Other

Write your brief explanation here.

A variety of methods will be used to collect stakeholder input as noted above, though not all would necessarily be used in the same year. A survey will be developed and administered to Extension county offices to determine the use and frequency of these methodologies for collecting stakeholder input.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

Plan Overview Merit Review Process Evaluation of Multi & Joint Activities Stakeholder Input Planned Programs

Actions to Seek Methods to Identify Methods to Collect How Considered

IV. Stakeholder Input - How Considered

3. A statement of how the input will be considered. (Check all that apply.)

- In the Budget Process
- To Identify Emerging Issues
- Redirect Extension Programs
- Redirect Research Programs
- In the Staff Hiring Process
- In the Action Plans
- To Set Priorities
- Other

Write your brief explanation here.

Input from the various stakeholders will be used in helping set research and extension agendas. Stakeholders have included research scientists, community leaders, community citizens, politicians, unrepresented, and extension faculty and staff. Therefore, the areas targeted in this plan of work will reflect the views of a broad set of stakeholders and will provide a valuable guide to the programs selected for emphasis.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

Name of the Planned Program.
Land Use and Sustainable Communities

V.(C) Planned Program (Situation and Scope)

1. Situation and priorities.

The existing conflicts between private and public land owners and urban-rural pressures are likely to be exacerbated over the next 5 years as alternative uses of public and private lands increase and urban encroachment continues to extend into rural areas of the state and region, resulting in a decline of available open-space. The economic viability of many rural areas is also in jeopardy. The three priorities in relationship to this planned program are (1) Reducing conflicts between multiple-users of public and adjoining private lands; (2) Providing a basis for planning that takes account of public and private goods in relation to urban development as it encroaches on private, primarily agricultural, land; and (3) Enhance economic opportunities in rural areas of the state and region that are in jeopardy.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

Planned Program Activity and Methods Page

The screenshot shows the 'Planned Program (Activity)' section of the CSREES Plan of Work web application. The page is titled 'Name of the Planned Program. Land Use and Sustainable Communities'. Below the title, there is a section for '1. Activity (What will be done?)' with a text area containing three numbered items: 1. Conduct research experiments and/or develop theories that can be used to explain (a) causes for public land conflicts and potential solutions, (b) solutions to the urban expansion into rural areas and open space, and (c) conditions for continued rural community economic viability. 2. Publish studies and make presentations related to these areas of concern. 3. Conduct workshops and meetings to educate local, state, and regional stakeholders concerning these issues. Below this text area is a warning: 'Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.' The next section is '2. Choose the type(s) of methods used in your program.' which includes a table with columns for 'Direct Methods', 'Extension', and 'Indirect Methods'. The 'Direct Methods' column has checkboxes for Education Class, Workshop, Group Discussion, One-on-One Intervention, Demonstrations, and Other 1 (BREEZE System). The 'Extension' column has checkboxes for Public Service Announcement, Billboards, Newsletters, TV Media Programs, Web sites, Other 1 (DVDs), and Other 2 (Satellite Broadcasts). The 'Indirect Methods' column has checkboxes for Public Service Announcement, Billboards, Newsletters, TV Media Programs, Web sites, Other 1 (DVDs), and Other 2 (Satellite Broadcasts). Below the table is a section for '3. Brief description of the target audience.' with a text area.

The screenshot shows the 'Brief description of the target audience' section of the CSREES Plan of Work web application. The text area contains the following description: 'The target audience for this work will be community leaders, community, state and federal policy makers, at-large public, academic units, private land holders, public land users, businesses, and local, state, and regional political leaders. Establishing joint efforts with public and private interests in the community will be important in establishing the needed credibility for adoption of recommended practices or acceptance of alternative designs.' Below the text area is a warning: 'Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.' At the bottom of the form, there are 'Save' and 'Cancel' buttons. The page footer includes navigation links: Home, My Account, Contact Us, REEIS, Outcomes, Change Password, Log Out, and a note: '*Requires Internet Explorer 6.0 or higher, Firefox or Netscape'.

State Defined Outcomes Menu Screen

The screenshot shows a Microsoft Internet Explorer browser window displaying the CSREES Plan of Work website. The address bar shows the URL: <http://powtest.csrees.usda.gov/viewoctargets.htm>. The page header includes the USDA logo and the text "United States Department of Agriculture Cooperative State Research, Education and Extension Service". The main navigation menu is green and includes links for Home, My Account, Contact Us, REEIS, Outcomes, Change Password, and Log Out. Below the navigation menu, there are several sub-links: Plan Overview, Merit Review Process, Evaluation of Multis & Joint Activities, Stakeholder Input, Planned Programs, Summary, KAs, Situation, Assumptions, Inputs, Activity, Outputs, State Defined Outputs, State Defined Outcome, Ext. Factors, and Evaluation. The main content area is titled "Name of the Planned Program." and "Land Use and Sustainable Communities". Underneath, there is a section for "V.(f) State Defined Outcomes" with a list of outcomes and their corresponding Edit and Delete actions. The outcomes listed are:

- Number of clients gaining land use and sustainable communities knowledge. Edit Delete
- Number of clients who implement land use and sustainable communities practices Edit Delete
- Number of communities preserving desirable community attributes Edit Delete
- Improvement in rural community vitality as measured by convergence of urban/rural family-level income (i.e., closure in differences expressed in percent/year terms). Edit Delete

At the bottom of the page, there is a "Done" button and a footer with navigation links and a note: "*Requires Internet Explorer 6.0 or higher, Firefox or Netscape".

Name of the Planned Program.
Land Use and Sustainable Communities

V.(J) Planned Program (External Factors)

1. External factors which may affect outcomes. (Check all that apply.)

- Natural Disasters (drought, weather extremes, etc.)
- Economy
- Appropriations changes
- Public Policy changes
- Government Regulations
- Competing Public priorities
- Competing Programmatic Challenges
- Populations changes (immigration, new cultural groupings, etc.)
- Other

Brief explanation of external factors which may affect the outcomes.

Drought and other weather disturbances may well impact the use of public lands and associated rural communities. Changes in the national or regional economies will most certainly have an impact on rural communities. Appropriation changes, particularly to the base funds, will induce many changes with land use and sustainable communities. Changes in the way in which public lands are viewed through policy changes will have an effect upon public land use and rural communities. Government regulations, particularly those associated with public lands (but also private lands in the "takings" area) are expected to influence the outcome of the program area. As immigration patterns change, so do the impacts on rural communities. Obviously, competing programmatic challenges have the potential to change how successful the program might be.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

OPTIONAL SECTION - Click Next to skip

Name of the Planned Program.
Land Use and Sustainable Communities

1. (X) Planned Program (Evaluation Studies and Data Collection)

2. Evaluation studies planned. (Check all that apply.)

- After Only (post program)
- Retrospective (post program)
- Before-After (before and after program)
- During (during program)
- Time series (multiple points before and after program)
- Case Study
- Comparisons between program participants (individuals, group, organizations) and non-participants
- Comparisons between different groups of individuals or program participants experiencing different levels of program intensity.
- Comparison between locales where the program operates and sites without program intervention
- Other

Brief explanation of your evaluation studies planned.

The most effective means of evaluation will be (1) time series (which could include before-after) studies, (2) case studies where individual examples of land use and community development might provide some guidance for other areas, (3) and comparisons of locales where programs might operated and sites without program intervention.

Community design assistance is typically a "one-off" endeavor—each project is unique unto itself. That argues for a case-study based research protocol that examines the project's effectiveness in the context in which it occurred, rather than an aggregated research approach that attempts to derive generalizable conclusions. Case study research that measures before and after conditions, acres of land affected (or

which it occurred, rather than an aggregated research approach that attempts to derive generalizable conclusions. Case study research that measures before and after conditions, acres of land affected (or

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

3. Data collection methods. (Check all that apply.)

- Sampling
- Whole population

Survey (Mail, Telephone, On-Site). (Check all that apply.)

- Mail
- Telephone
- On-Site

Interview:

- Structured
- Unstructured
- Case Study
- Observation
- Portfolio Reviews
- Tests
- Journals
- Other

Briefly explain any data collection methods.

Besides reviewing the available literature to determine what has been successful elsewhere, observations over time and case study approaches will be used as data collection methods. The most common data collection methods will be a combination of quantitative and qualitative ex post measurements of project results. The quantitative measures could be Likert-type survey questions administered through a variety of instruments. The qualitative are more likely to be derived from semi-structured interviews of the projects partners and beneficiaries.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

Planned Program Activity Screen

The screenshot shows a Microsoft Internet Explorer browser window titled "CSREES Plan of Work - Microsoft Internet Explorer". The address bar displays "http://powtest.csrees.usda.gov/ReportProgramActivity.htm". The page header includes the USDA logo and the text "United States Department of Agriculture Cooperative State Research, Education and Extension Service". A navigation menu contains links for Home, My Account, Contact Us, REEIS, Outcomes, Change Password, and Log Out. Below the menu are links for Report Overview, Merit Review Process, Stakeholder Input, Planned Programs, and Summary. The main content area is titled "IV (C): Planned Program (Activity and Participation)" and "Name of the Planned Program: Land Use and Sustainable Communities".

1. Brief description of the Activity (What was done?)

1. Conduct research experiments and/or develop theories that can be used to explain (a) causes for public land conflicts and potential solutions, (b) solutions to the urban expansion into rural areas and open space, and (c) conditions for continued rural community economic viability.

2. Publish studies and make presentations related to these areas of concern.

3. Conduct workshops and meetings to educate local, state, and regional stakeholders concerning these issues.

Entering or copying text into this text box of more than 3200 characters (including spaces) will be truncated to fit and the excess will be lost.

2. Brief description of the target audience.

The target audience for this work will be community leaders, community, state and federal policy makers, at-large public, academic units, private land holders, public land users, businesses, and local, state, and regional political leaders. Establishing joint efforts with public and private interests in the community will be important in establishing the needed credibility for adoption of recommended practices or acceptance of alternative designs.

Entering or copying text into this text box of more than 3200 characters (including spaces) will be truncated to fit and the excess will be lost.
