# **Donor Iron Status Survey (Cohort version)**

This research sponsored by the National Heart, Lung, and Blood Institute of the National Institutes of Health (NIH) will help us better understand iron status in blood donors and contribute valuable information for improving the health of blood donors. This survey will ask you questions about your donation history, smoking history, diet, vitamins and supplements that you take and if you are female, a few questions on your reproductive history. Your answers to all questions will be kept confidential and only be used for the purpose of this research.

Your participation in this survey is voluntary. If you choose not to participate, it will not affect your ability to donate blood again in the future. You will not lose any benefits.

	First Name	Middle Name	Last Name
