

Attachment M
FDA Comments

1) For parents focus group: add a) If you use a liquid form of acetaminophen, how do you measure the dose for your child; what device do you use, b) do you keep different concentrations at home for your children? One for younger children and one for older?

These questions have been added to the parents of young children focus group questions Theme VI.

2) For adolescent focus group: add Have you ever taken more than one acetaminophen product at the same time; can you tell me about that?

This question has been added to the adolescent interview paragraph 5.
