AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; reopening of the comment period.

SUMMARY: The Food and Drug Administration (FDA) is reopening until September 29, 2009, the comment period for the notice published in the *Federal Register* of January 21, 2009 (74 FR 3617). In that document, FDA requested comments and scientific data and information that would assist in the conduct of a risk assessment of the public health impact of foodborne *Listeria monocytogenes* in some ready-to-eat foods sliced, prepared, and/or packaged in retail facilities. The risk assessment is being conducted by FDA in collaboration with the Food Safety and Inspection Service (FSIS). The agency is reopening the comment period because FDA and FSIS held a public meeting on June 23, 2009, to present the background, approach, scope, and data needs for the recently initiated interagency risk assessment (74 FR 27276; June 9, 2009) and this additional time will allow for public comment after this meeting.

DATES: Submit comments and scientific data and information by September 29, 2009.

ADDRESSES: Submit written comments and scientific data and information to the Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit electronic comments and scientific data and information to <http://www.regulations.gov>.

SUPPLEMENTARY INFORMATION:

I. Background

In the *Federal Register* of January 21, 2009 (74 FR 3617), FDA announced plans to conduct a risk assessment of the public health impact of foodborne *Listeria monocytogenes* in some ready-to-eat foods sliced, prepared, and/or packaged in retail facilities. Comments were sought on data and information in the following areas: (1) Characteristics of ready-to-eat food markets in the United States; (2) characteristics of deli departments in groceries; (3) product contamination data; (4) factors that influence the growth of *L. monocytogenes* in cheeses, deli meats, and deli-type salads sold by retail facilities; (5) environmental contamination data; (6) factors that influence the environmental contamination and the cross-contamination of food by *L. monocytogenes* in retail facilities; (7) identity and effectiveness of control measures or interventions intended to reduce levels and frequency of *L. monocytogenes* in the retail environment; and (8) any other data related to the occurrence, growth, and control of *L. monocytogenes* in retail facilities. Interested persons were given until April 21, 2009, to submit comments and scientific data and information.

On June 23, 2009, FDA and FSIS held a public meeting to present the background, approach, scope, and data needs for this interagency risk assessment (74 FR 27276; June 9, 2009). For this reason, FDA is reopening the comment period until September 29, 2009, to allow additional time for public comment and submission of scientific data and information.

II. Comments

Interested persons may submit to the Division of Dockets Management (see **ADDRESSES**) written or electronic comments, scientific data, and information regarding this document.
