<p>10. Abstract The Federal Energy Regulatory Commission (FERC) proposes to amend its open access regulations governing standards for business practices and electronic communications with interstate natural gas pipelines and public utilities. The FERC is proposing to incorporate by reference certain standards promulgated by the Wholesale Gas Quadrant (WGQ) and the Wholesale Electric Quadrant (WEQ) of the North American Energy Standards Board (NAESB). These standards will establish communication protocols between interstate pipelines and power plant operators and transmission owners and operators. Through this rulemaking, FERC is seeking to improve coordination between the gas and electric industries in order to limit miscommunications about scheduling of gas-fired generators.</p>
