These instructions refer to completion of this form by the State Veterinarian's office or representative. The level of disease (presumptive versus definitive) reported to your office by laboratories should be taken into account and combined with other available information to determine whether the data fit the National Animal Health Reporting System (NAHRS) reporting criteria.

For each month, please report for the entire month. The report for each month is generally due by the 20th of the following month. If you receive reports on out-of-state submissions, **REPORT ONLY FOR YOUR OWN STATE**. Be sure to indicate the State and month for which you are reporting in the spaces provided on the top of each page of the form.

Complete the following confirmed disease report after consulting the NAHRS disease reporting criteria for each disease. If a case meets the NAHRS criteria for presence of disease, record it as present. If a case does not strictly meet the NAHRS criteria, you may use additional information to decide if you want to report the presence of confirmed disease for the given month. The disease reporting criteria are minimum standards and additional information can be utilized to report i.e. epidemiological link, or other non listed laboratory tests. NOTE: For those diseases considered to be foreign to the United States (FAD), the default response is 'NO'. To report the presence of an FAD, change the 'NO' to 'YES'.

If you received a report of a case which fits the NAHRS criteria, check 'YES' under PRESENT. If you received a report of a case which does not fit the NAHRS criteria, but you have additional evidence to support the presence of confirmed disease, check 'YES' under PRESENT. In the COMMENTS column, please indicate the highest level of diagnostic criteria used in confirming a clinical case. If a report of a case is received after the report has been sent, notify the NAHRS administrator to update the information.

If you received no reports in the investigation of a suspected confirmed disease which fit the NAHRS criteria and you have no further supporting evidence of the presence of confirmed disease, check 'NO' under PRESENT (e.g., all investigations for a given disease were negative. If the disease is considered reportable in your State (you would expect to receive a report if found), but you received no report which fits the NAHRS criteria, check 'NO' under PRESENT.

Add any additional information which you feel may be of value in the COMMENTS column e.g. level of lab diagnosis, presumptive vs definitive, clarification if needed.
