Pacific States Marine Fisheries Commission
205 SE Spokane St, Suite 100
Portland, OR 97202

Dear Mr. Charles Smith

We would like to invite you to participate in a cost earnings survey of commercial fishing vessel owners being conducted by the Pacific States Marine Fisheries Commission in cooperation with the National Marine Fisheries Service. This survey targets vessel owners who (1) participate in the West Coast groundfish, salmon, crab, and shrimp fisheries and (2) do not hold a limited entry permit. This survey was designed through industry collaboration and updates a similar survey conducted during 2007. Our goal is to support fisheries management decision-making and to generate information that is required to help meet legal and regulatory requirements.

Data will be collected through in-person interviews and mail questionnaires. Based on the availability of a telephone number, you have been selected for an in-person interview. During your interview, the interviewer will ask you the questions on the enclosed questionnaire. The enclosed questionnaire is provided at this time so that you know what information to have available during the interview. You do not need to return the questionnaire prior to the interview. We will contact you by telephone to schedule a time and place to meet for the interview at your convenience.

We appreciate the confidential nature of the data being collected by this survey. When publishing survey results, we will combine your responses with information provided by other participants, and report it in summary form so that responses for any individual vessel cannot be identified. If a Freedom of Information Act (FOIA) request is received for the data collected by this survey, we will seek to protect the confidentiality of the survey responses under Exemption 4 of the FOIA.

Because you and other vessel owners are the only ones that can provide this information, we encourage you to participate in this survey. By collecting information on individual vessels, we can better understand average fleet characteristics as well as diversity within the fleet. Fisheries managers will be better able to consider the effect of regulations.

Thank you for your consideration.

Sincerely,

Carl Lian
