Living Positively with Positive HOPE

Want to learn how to make healthy choices in your life?

We have a study to help you learn!

If you are in the study, you will meet with a nurse privately at a local community health center. You will learn about staying healthy and reducing your chances of catching or passing on HIV.

If you are in the study, you will be given a maximum of \$60 cash for your time and effort and all day bus passes.

Please call [1-866-619-0007](tel:1-866-619-0007) to find out about the study and find out if you can be in the study.

Sister to Sister Positive HOPE is a research study carried out by The Centers for Disease Control and Prevention and The UNC School of Nursing at Chapel Hill.
