Any person who knowingly and willfully makes a false statement in this application is subject to the sanctions prescribed in 18 U.S.C. 1001

CONCURRENCE OF AGENT (PART IV OF 4 PARTS)

PART IV- A must be completed by the person designated in item 4 of Part 1 to serve as applicant's United States agent for service of process. Part IV-B must be completed by the applicant. After Parts IV-A and IV-B are completed, Part IV should be submitted to the Director, Coast Guard National Pollution Funds Center, by the applicant or by the agent, either separately or together with Parts I, II, and III. (Part IV need not be completed if the agent designated in item IV of Part I already has submitted to the U.S. Coast Guard an acceptable blanket Concurrence of Agent, agreeing to serve on behalf of certain applicants who designate that agent. Part IV also need not be completed if the applicant is a United States entity and has appointed itself as agent in item 4 of Part I.)

PART IV-A

It is hereby agreed that

shall serve as the applicant's United States agent for service of process for purposes of 33 CFR part 138. This designation and agreement shall cease immediately in the event the applicant designates a new agent acceptable to the Director, National Pollution Funds Center.

Form CG-5585; Application for Certificate of Financial Responsibility, which may be reproduced

Persons who intend to apply for Certificates of Financial Responsibility (Water Pollution) are urged to read 33 CFR Part 138 carefully and complete application Form CG-5585 in full, so that delays in processing may be avoided. Only "operators" as defined in 33 CFR section 138.20(b) may apply for Certificates and only one copy of the application form is necessary, regardless of the number of vessels operated by the applicant. Applications should be filed at least 21 days prior to the date the Certificate is required.

First-time applications are subject to an application fee of \$150 (an additional application fee is not required when renewing or adding vessels, either by letter or supplementary application forms, to the original application at later dates). In addition, each requested Certificate is subject to a certification fee of \$80. Fees may be submitted by check, draft, or postal money order in United States currency and must be made payable to the United States Coast Guard. The application may be faxed for initial submission.

In order to qualify for one or more Certificates, an applicant must demonstrate financial ability to pay "removal costs" which could result from a discharge of oil or hazardous substances caused by any one of the vessels for which the applicant desires Certificates. Acceptable methods of establishing evidence of financial responsibility (e.g., Insurance Form CG-5586) are set forth in 33 CFR section 138.80(b). Insurance, guaranty, and surety bond coverage on USCG forms will be accepted only if executed by insurers, guarantors or sureties holding USCG approval. Certificates cannot be issued unless a properly completed application form, acceptable evidence of financial responsibility and fees are submitted.

No vessel over 300 gross tons (except "public vessels" (33 CFR section 138.12(d)/138.20) and nonself-propelled barges which do not carry oil or hazardous substances as cargo or fuel, including fuel carried for the purpose of powering on board equipment or for any other purpose) may use the navigable waters of the United States for any purposes unless it carries a Certificate of Financial Responsibility (Water Pollution) covering such vessel. The "United States" includes Puerto Rico, the Northern Marianas, Guam, American Samoa, the U.S. Virgin Islands, and the Trust territory of the Pacific Islands. The "navigable waters" of the United States include inland waters and the three-mile territorial sea.

An operator may apply in advance for Certificates covering vessels which might be using United States waters at some future time. Obtaining Certificates in advance for such vessels would relieve the operator of the possibility of delay or detainment until a Certificate was obtained from the Coast Guard.

If an operator who already holds Certificates becomes or intends to become the operator of additional vessels at some future time, and he wishes to have such additional vessels certified, he should write to this office giving the following information with respect to each such vessel: (1) type of vessel, by code number listed in Form CG-5585, item 5; (2) name and gross tons of the vessel; (3) country of registry, IMO number or registration number; and (4) the name and mailing address of the legally responsible operator and the registered owner. In the alternative, an application Form CG-5585 may be submitted with a letter explaining the purpose of such supplemental application form. Any such additional vessel must be covered by evidence of financial responsibility. A certification fee of \$80 per vessel also must be submitted.

Persons who have any questions concerning the enclosed material should write or telephone the National Pollution Funds Center's Vessel Certification Division (NPFC-cv) in Arlington, Virginia. All submissions of documents must be made directly to this office at the address above.

Regards,
U.S. Coast Guard, Vessel Certification
