

FERC-556 and Related Web Pages

The current Qualifying Facilities web page (at <http://www.ferc.gov/industries/electric/gen-info/qual-fac.asp>) has links to several other pages, many of which include supplementary instructions to the current FERC-556. They include:

- o » [What is a Qualifying Facility?](#)
- o » [What Are the Benefits of QF Status?](#)
- o » [How to Obtain QF Status for Your Facility](#)
- o » [Self-Certification](#)
- o » [Application for Commission Certification](#)
- o » [Completing the Form No. 556](#)
- o » [Reporting Changes to Your Certified Facility](#)

The proposed, preferred format for FERC-556 (submitted in this clearance request to OMB) includes many of those instructions, so the existing web pages will be correspondingly simplified, if the format is approved. The supplemental file includes draft proposed web pages that would be posted with the new preferred format.

In addition, we expect to delete 3 existing web pages:

[Completing the Form No. 556](#)
[Reporting Changes to Your Certified Facility](#)
[Locating a Filing for QF Status in eLibrary](#)
