Re.: Surveys in 3145-0158

There are three surveys in this collection – three groups use three and two groups use two:

- Informal Science Education Baseline Survey – used by three groups: Full-scale and Broad Implementation; Research, Pathway, CRPA; and Conferences, EAGER, RAPID
- ISE Annual Report – used by two groups: Full-scale and Broad Implementation and Research, Pathway, CRPA
- ISE Closeout Report - used by three groups: Full-scale and Broad Implementation; Research, Pathway, CRPA; and Conferences, EAGER, RAPID

Because each group in each survey has a different burden amount associated with them, I figured the best thing to do was enter each survey separately for each group. I believe this gives proper accountability for each survey. I apologize if this is confusing (I was a little frantic), but I couldn't think of any other way to enter this without making the burden hours completely out of sync with what the program has planned.

Thank you!
