
Released October 3, 2008, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on *Vegetables* call Debbie Flippin at (202) 720-2157, office hours 7:00 a.m. to 3:30 p.m. ET.

Fall Season Fresh Vegetable Harvested Area Down 4 Percent
Fall Season Melon Harvested Area Up 1 Percent
Summer Storage Onion Production Down 10 Percent

The prospective area for harvest of 11 selected fresh market vegetables during the fall quarter is forecast at 151,370 acres, down 4 percent from last year. Acreage declined from last year for snap beans, cabbage, cauliflower, celery, head lettuce, and bell peppers while acreage increased for carrots, sweet corn, cucumbers, and tomatoes. Area harvested for broccoli remains unchanged.

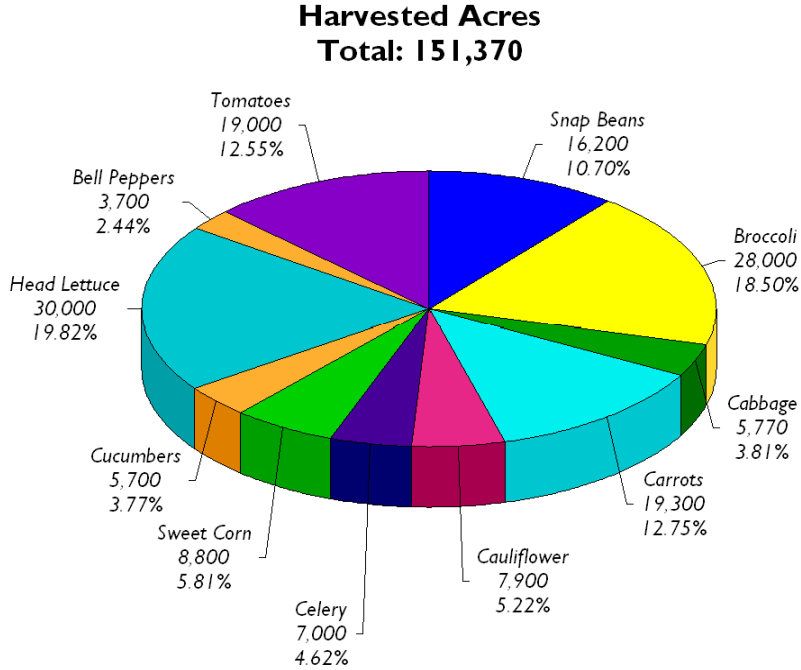

Area forecasted for fall melon harvest is 15,600 acres, up 1 percent from last year. Cantaloup harvested area is forecast at 12,100 acres, unchanged from 2007. Honeydew harvested area is forecast at 3,500 acres, up 6 percent from last fall.

Summer storage onion production is forecast at 51.5 million hundredweight, down 10 percent from last year. Storage onion harvested area is forecast at 99,620 acres, down 8 percent from 2007. California production, at 12.9 million hundredweight, is 1 percent below 2007. Harvested area is expected to total 30,000 acres, down 2 percent from last year.

² Estimates discontinued in 2008.

³ Estimates discontinued in 2007.

Snap Beans: Fall fresh market area for harvest is forecast at 16,200 acres, down 12 percent from last year. In Florida, during late August, rainfall from Tropical Storm Fay delayed some fieldwork. In early September, some growers delayed planting due to persistent standing water in their fields. By mid-September fields began to dry out allowing growers to proceed with planting. In New Jersey, growing conditions were favorable for the fall snap bean crop. However, severe storms in late August damaged some fields in the South Jersey area. Overall, the crop is reported to be in good condition.

Broccoli: California's area for fall harvest is forecast at 28,000 acres, unchanged from 2007. Harvest of the fall crop is underway and is reported to range between very good to excellent condition. Production volume is expected to remain strong throughout the growing season.

Cabbage: Fresh market area for harvest is forecast at 5,770 acres, down 8 percent from last year. Soil moisture supplies in Georgia are reported to be adequate to short. In Florida, Tropical Storm Fay delayed some planting over the central and southern Peninsulas throughout August and September. Warm temperatures after planting boosted crop growth and development. Growers expect to plant their cabbage crop through mid-December. In New Jersey, harvest of the cabbage crop started in late September. Crop quality is reported to be good. In Texas, planting was on schedule. Harvest is expected to begin by early October.

Cantaloups: Fall cantaloup area for harvest is forecast at 12,100 acres, unchanged from 2007. Arizona's harvest began the third week of September. The season is expected to be in full swing by mid-October. In California, ideal temperatures benefitted the melon crop. No major insect or disease problems have been reported.

Carrots: Area for fresh market harvest is forecast at 19,300 acres, up 1 percent from last year. In California, baby carrots are in high demand. Harvest is underway and the crop is reported to be in good condition with no unusual disease or insect problems. In Texas, planting was on schedule. Condition of the crop is reported to be excellent in the southwest area of the State. Rainfall during July and August benefitted soil moisture.

Cauliflower: Area for fall harvest in California is forecast at 7,900 acres, down 5 percent from last year. Ideal growing conditions contributed to excellent sizing and crop quality. Harvest is underway with no disease or insect problems reported.

Celery: California's fall area for harvest is forecast at 7,000 acres, down 1 percent from 2007. Growing conditions have been favorable for the early fall celery crop.

Sweet Corn: Fresh market area for harvest is forecast at 8,800 acres, up 6 percent from last year. The California crop is in excellent condition due to favorable weather during the summer and early fall. In Florida, during late August, rainfall from Tropical Storm Fay delayed some fieldwork. In early September, some growers delayed planting due to persistent standing water in their fields. By mid-September fields began to dry out allowing growers to proceed with planting.

Cucumbers: Area for fall harvest is forecast at 5,700 acres, up 2 percent from 2007. In Florida, tropical storms during August and September delayed some plantings over the central and southern Peninsula areas. However, warm temperatures after planting boosted plant growth and development. Growers in South Carolina experienced a hot and dry growing season. In Texas, planting was on schedule despite downy mildew being reported in some fields.

Honeydews: Fresh market area for fall harvest is forecast at 3,500 acres, up 6 percent from last year. Arizona's harvest of fall season honeydews began the third week of September. California's fall melon

crop is progressing well due to ideal temperatures. No major insect or disease problems have been reported.

Head Lettuce: California's area for fall harvest is forecast at 30,000 acres, down 9 percent from last year. Early planted lettuce fields have begun to emerge. Fields were being fertilized and treated to control insects.

Bell Peppers: Florida's fall area for harvest is forecast at 3,700 acres, down 16 percent from 2007. Planting was delayed in South Florida due to excessive rainfall.

Tomatoes: Fresh market area for fall harvest is forecast at 19,000 acres, up 3 percent from 2007. In California, harvesting of fall tomatoes was delayed in Fresno County due to water shortages. In Florida, acreage remains historically low due to flooded fields, lack of demand during the summer season, and high input costs.

Storage Onion Production

United States, 1998-2008

Summer Storage Onion Production Down 10 Percent

Summer storage onion production is forecast at 51.5 million hundredweight (cwt), down 10 percent from last year. Harvested area is forecast at 99,620 acres, down 8 percent from 2007. The yield, at 517 cwt per acre, is down 15 cwt from last year. Planting of California's storage onion crop was on schedule. However, cool temperatures during the growing season delayed harvest. No major disease problems were reported. In Colorado, harvest was a week behind schedule. In Idaho, harvest was delayed due to excessive moisture and a cool summer during the growing season. In Michigan, early-planted onions emerged by the beginning of May. Prospects for the onion crop is reported to be good to excellent. In New York, severe hailstorms in central New York resulted in some loss of acreage due to abandonment. Malheur and Other Oregon producers expect lighter yields this season due to a cold spring. Wisconsin experienced very wet conditions during the early part of the year, then unseasonable dry conditions later in the season.

ACCESS TO REPORTS!!

For your convenience, there are several ways to obtain NASS reports, data products, and services:

INTERNET ACCESS

All NASS reports are available free of charge on the worldwide Internet. For access, connect to the Internet and go to the NASS Home Page at: **www.nass.usda.gov**.

E-MAIL SUBSCRIPTION

All NASS reports are available by subscription free of charge direct to your e-mail address. Starting with the NASS Home Page at **www.nass.usda.gov**, under the right navigation, *Receive reports by Email*, click on **National** or **State**. Follow the instructions on the screen.

PRINTED REPORTS OR DATA PRODUCTS

CALL OUR TOLL-FREE ORDER DESK: 800-999-6779 (U.S. and Canada)
Other areas, please call 703-605-6220 FAX: 703-605-6900
(Visa, MasterCard, check, or money order acceptable for payment.)

ASSISTANCE

For **assistance** with general agricultural statistics or further information about NASS or its products or services, contact the **Agricultural Statistics Hotline** at **800-727-9540**, 7:30 a.m. to 4:00 p.m. ET, or e-mail: **nass@nass.usda.gov**.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

USDA Data Users' Meeting

October 20, 2008

Doubletree Hotel Chicago O'Hare Airport-Rosemont

Rosemont, Illinois

(847) 292-9100

The USDA's National Agricultural Statistics Service will be organizing an open forum for data users. The purpose will be to provide updates on pending changes in the various statistical and information programs and seek comments and input from data users. Other USDA agencies to be represented will include the Agricultural Marketing Service, the Economic Research Service, the Foreign Agricultural Service, and World Agricultural Outlook Board. The Foreign Trade Division from the Census Bureau will also be included in the meeting.

For registration details or additional information for the Data Users' Meeting, see the NASS homepage at www.nass.usda.gov/forum/ or contact Marjorie Taylor (NASS) at (202) 690-8141 or at marjorie_taylor@nass.usda.gov.

This Data Users' Meeting precedes an Industry Outlook meeting that will be held at the same location on October 21, 2008. The Outlook meeting brings together analysts from various commodity sectors to discuss the outlook situation. For registration details or additional information for the Industry Outlook Meeting see the Livestock and Marketing Information Center (LMIC) homepage at www.lmic.info or contact Jim Robb at (720) 544-2941 or at robb@lmic.info.
