Introduction

The following pages show a comprehensive list of items of cargo and ballast operations which are, when appropriate, to be recorded in the Cargo Record Book on a tank-to-tank basis in accordance with Title 46 Code of Federal Regulations 153.909 and regulation 15.2 of Annex II of the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto (MARPOL 73/78), as amended.

The items have been grouped into operational sections, each of which is denoted by a letter. When making entries in the Cargo Record Book, the date, operational code and item number shall be inserted in the appropriate columns and the required particulars shall be recorded chronologically in the blank spaces. Entries are required for operations involving all Categories of NLS substances. All quantities should be consistently recorded throughout the Cargo Record Book as cubic meters (m³), gallons (gal), or barrels (bbl).

Each completed operation shall be signed for and dated by the officer or officers in charge and, if applicable, by a surveyor authorized by the competent authority of the State in which the ship is unloading. After all the entries on a page of the Cargo Record Book are completed, and if the person in charge of the ship agrees with the entries, the person in charge of the ship shall sign the bottom of that page.

The person in charge of the ship shall ensure that the Cargo Record Book is on board and readily available for inspection and copying by the U.S. Coast Guard and when the ship is a U.S. ship in the waters of a foreign country whose Administration is signatory to MARPOL 73/78, the authorities of that country.

The ship owner or operator shall ensure that each Cargo Record Book is retained on board the ship for at least 3 years after the last entry.
