More detail to D14 added.	Effectiveness and Utility. Provide information supporting the	Effectiveness and Utility. Provide information supporting the

	<p>potential for your Technology to be effective in countering potential acts of terrorism. Please provide internal or external effectiveness tests or other information indicating the effectiveness of your Technology. This can include acceptance test data from a government contracting action, customer feedback or other relevant data or experience. As noted, acceptance of your Technology by a government purchaser may be highly relevant and expedite approval of your application.</p>	<p>potential for your Technology to be effective in countering potential acts of terrorism. Please provide internal or external effectiveness tests or other information indicating the effectiveness of your Technology. This can include acceptance test data from a Government contracting action, penetration tests, case studies, pre and post-training testing, incident reports, customer feedback, or other relevant data or experience. As noted, acceptance of your Technology by a Government purchaser may be highly relevant and expedite approval of your application.</p> <p>It is important that effectiveness data be in documented form if at all possible. You are responsible for providing all documentation in support of your application at the time of submittal, or to facilitate the transfer of any such information prior to submission. In the event that obtaining documentation is not possible and if POCs are provided as sources of information or testimonials, check below to indicate that you have contacted them and that they are expecting to hear from DHS related to your Technology. Also, indicate below specifically what information we should expect from each POC. Please see the Instructions for additional information.</p>
