NCANDS data completeness information for the CSFR

Description of data tests	FFY 2005	FFY 2006	FFY 2007
1. Percent of duplicate victims in the submission [At least 1% of victims should be associated with multiple reports (same CHID). If not, the State would appear to have frequently entered different IDs for the same victim. This affects maltreatment recurrence]	7.1	6.7	6.4
2. Percent of victims with perpetrator reported [File must have at least 95% to reasonably calculate maltreatment in foster care]	94.7	96.7	96.8
3. Percent of perpetrators with relationship to victim reported [File must have at least 95% to reasonably calculate maltreatment in foster care]	90.8	93.1	93.6
4. Percent of records with investigation start date reported [Needed to compute mean and median time to investigation]	87.7	84.8	87.4
5. Reported average time to investigation in the Agency file [PART measure]	n=29	n=35	n=31
6. Percent of records with AFCARS ID reported in the Child File [Needed to calculate maltreatment in foster care by the parents]	67.6	81	83.2

- Notes:**
- 1) Safety Profile counts and percents are based on data from the States that reported data for a specific item.**
 - 2) Data completeness section percents are based on data from all Child File States.**
