

**Supporting Statement
Importation of Artificially Dwarfed Plants
OMB Number 0579-0176**

A. JUSTIFICATION

September 2010

1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection.

The United States Department of Agriculture (USDA), Animal and Plant Health Inspection Service (APHIS), is responsible for preventing plant pests and noxious weeds from entering the United States, preventing the spread of plant pests and noxious weeds new to the United States, or not known to be widely distributed in the United States, and eradicating those imported pests and weeds when eradication is feasible.

Under the Plant Protection Act (7 U.S.C. 7701 – *et seq.*), the Secretary of Agriculture is authorized to prohibit or restrict the importation, entry, or movement of plants and plant pests, to prevent the introduction of plant pests into the United States, or their dissemination within the United States.

These regulations are enforced by Plant Protection and Quarantine (PPQ), a program within USDA's Animal and Plant Health Inspection Service (APHIS).

Regulations contained in Title 7, CFR Part 319 implement the intent of this Act by prohibiting or restricting the importation of certain plants and plant products into the United States, to prevent the introduction of plant pests. The regulations contained "Subpart--Nursery Stock, Plants, Roots, Bulbs, Seeds, and Other Plant Products," Sections 319.37 through 319.37-14, restrict, among other things, the importation of living plants, plant parts, and seeds for propagation.

APHIS requires artificially dwarfed plants that are imported into the United States to have been grown under certain conditions in greenhouses or screenhouses within nurseries registered with the government of the country where the plants were grown. This action is necessary to protect against the introduction of longhorned beetles into the United States.

2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.

Phytosanitary Certificates (foreign)

Artificially dwarfed plants imported into the United States must be accompanied by a phytosanitary certificate of inspection issued by a plant health official employed by the government of the country from which the plants are exported. The phytosanitary certificate must contain declarations that the plants were: (1) grown for at least 2 years in a nursery that is registered with the government of the country of export; (2) grown in pots containing only sterile growing media; (3) grown on benches at least 50 cm above the ground; and (4) inspected (along with the nursery itself) at least once each year by the plant protection service of the country of export. These statements will enable PPQ to verify that the imported plants were grown under conditions that helped keep the plants free from infestation by certain Longhorned beetles and other pests.

APHIS also uses the information on this certificate to determine the pest condition of the shipment at the time of inspection in the foreign country. This information is used as a guide to the intensity of the inspection that we must conduct when the shipment arrives. Without this information, all shipments would need to be inspected very thoroughly, thereby requiring considerably more time. This would slow the clearance of international shipments.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other forms of information technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden.

Whether the respondents are foreign officials or businesses, the respondent does make a decision on or if a document is automated because this is an international program which involves non PPQ forms.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purpose described in item 2 above.

The information APHIS collects is exclusive to its mission to prevent the introduction of plant pests and plant diseases into the United States. The information is not available from any other source.

5. If the collection of information impacts small businesses or other small entities, describe any methods used to minimize burden.

The information APHIS collects for this program is the minimum needed to protect the United States nursery stock and other plant resources from the potential introduction of plant pest and plant diseases into the United States. APHIS has determined that ninety five percent of the respondents are small entities.

6. Describe the consequences to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.

If APHIS did not collect this information or if this information was collected less frequently, APHIS could not verify that imported nursery stock does not present significant risk of introducing plant pests and plant diseases into the United States. The establishment of certain plant pests in the United States could cause substantial losses to American agriculture.

7. Explain any special circumstances that require the collection to be conducted in a manner inconsistent with the general information guidelines in 5 CFR 1320.5.

No special circumstances exist that would require this collection to be conducted in a manner inconsistent with the general information collection guidelines in CFR 1320.5.

8. Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping, disclosure, or reporting form, and on the data elements to be recorded, disclosed, or reported. If applicable, provide a copy and identify the data and page number of publication in the Federal Register of the agency's notice, soliciting comments on the information collection prior to submission to OMB.

In 2010, APHIS held productive consultations with the following individuals concerning the information collection activities associated with this collection.

Brussel's Bonsai
Dana Quattlebaum
8365 Center Hill Road
Olive Branch, MS 38654
901-521-8187

The National Bonsai Foundation
Felix Laughlin
1775 Pennsylvania Ave, NW
Washington, DC 20006
202-862-1040

Dr. Thomas Elias
Director
U.S. National Arboretum
202-245-4539
888-627-7883

On, Friday, June 4, 2010, pages 31748-31749, APHIS published in the Federal Register, a 60-day notice seeking public comments on its plans to request a 3-year renewal of this collection of information. No comments from the public were received.

9. Explain any decision to provide any payment or gift to respondents, other than reenumeration of contractors or grantees.

This information collection activity involves no payments or gifts to respondents.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.

No additional assurance of confidentiality is provided with this information collection. However, the confidentiality of information is protected under 5 U.S.C. 552a.

11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and others that are considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

This information collection activity asks no questions of a personal or sensitive nature.

12. Provide estimates of the hour burden of the collection of information. Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated.

. Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens in Item 13 of OMB Form 83-I.

See APHIS Form 71 for hour burden estimates. These estimates were developed using historical data, calculated average number of permits requested, and discussions with field and industry personnel.

. Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage rate categories.

Total cost to respondents is computed by multiplying their average wage by the total number of hours needed to complete the work.

$$\$18.00 \times 38 = \$684.00$$

The hourly wage of \$18.00 was provided from discussions with importers, nursery owners, and APHIS Animal Plant Health Officials in Asia.

13. Provide estimates of the total annual cost burden to respondents or recordkeepers resulting from the collection of information, (do not include the cost of any hour burden shown in item 12 and 14). The cost estimates should be split into two components: (a) a total capital and start-up cost component annualized over its expected useful life; and (b) a total operation and maintenance and purchase of services component.

There is zero annual cost burden associated with capital and start-up costs, maintenance costs, and purchase of services in connection with this program

14. Provide estimates of annualized cost to the Federal Government. Provide a description of the method used to estimate cost and any other expenses that would not have been incurred without this collection of information.

See APHIS Form 79 for annualized cost to the Federal Government. Annual cost to the Government is \$909.00.

15. Explain the reasons for any program changes or adjustments reported in Items 13 or 14 of the OMB Form 83-1.

There is no change in burden for this 3-year renewal information collection.

16. For collections of information whose results are planned to be published, outline plans for tabulation and publication.

APHIS has no plans to tabulate or publish the information APHIS collects.

17. If seeking approval to not display the expiration date for OMB approval of the information collections, explain the reasons that display would be inappropriate.

There are no United States forms involved in this information collection.

18. Explain each exception to the certification statement identified in the “Certification for Paperwork Reduction Act.”

APHIS is able to certify compliance with all the provisions in the Act.

B. Collections of Information Employing Statistical Methods.

Statistical methods are not used in this information collection.
