The Sponsoring Organization must contract with a sufficient number of network retail pharmacies so as to ensure that enrollees have reasonable access to the same extended day supply benefits at retail that are available at mail-order. A sponsor may choose to require that enrollees choosing to receive extended day supply of covered Part D drugs at a network retail pharmacy rather than a network mail-order pharmacy be responsible for any higher cost-sharing amount associated with obtaining those benefits at a network pharmacy. Any such increase in cost-sharing must be limited to the “differential in charge” to the sponsor in terms of any difference between higher contract rates at a network retail pharmacy as opposed to a network mail-order pharmacy for that benefit. Enrollee cost-sharing must never exceed what the enrollee would have paid at the same retail pharmacy had the enrollee had his or her prescription filled in multiple 1-month supply increments at retail pharmacy rates. SU801

Premium Requirements for Employer/Union Sponsored Plans

The Sponsoring Organization must charge all enrollees in a particular employer/union sponsored group waiver plan in the same market area the same premium amount for the same benefits. Sponsor may vary the premium between defined market areas within the same employer/union sponsored plan. Premium variation may only be based on objective market information demonstrating verifiable differences in drug costs between market areas. An employer/union may subsidize different amounts for different classes of enrollees in the employer/union-only group plan provided such classes are reasonable and based on objective business criteria, such as years of service, date of retirement, business location, job category, and nature of compensation (e.g., salaried v. hourly). Different classes cannot be based on eligibility for the Low Income Subsidy (LIS).
