OMB Control No. xxxx-xxxx

Inspection Checklist for ENERGY STAR Qualified Modular Home – Prescriptive Path

Home Addres	s:				
City:	State: Zip:	_ Home ID:			
Instructions: inspect as ma Bypass items	Write your initials in each applicable box. If an item does not apply to the home ny critical items as possible but may delegate a builder's representative to verify (numbered items on the first page of this checklist). If the builder verifies any ite Every line must contain at least one set of initials or "n/a".	e, write "n/a". F v and initial up	Raters should to six (6) The	ermal	
Thermal	Inspection Guidelines	PLANT QC	RA	RATER	
Bypass Item	opeanon canalonnos	Pass	Pass	Fail	
	General requirements: Insulation shall be installed in full contact with sealed interior and exterior air barrier excepadjoining exterior walls or unconditioned spaces (see below). All all materials are as a second and a second a second and a second a second and a second a second and a second a second and a second a second and a second a se	ot for alternate to	interior air barrie	er under walls	
	All climate zones: 1.1 Overall alignment throughout home				
Overall Air				-	
Barrier and Thermal	1.2 Garage band joist air barrier (at bays adjoining conditioned space)				
Barrier	1.3 Attic eave baffles where vents/leakage exist	-			
Alignment	Only at Climate Zones 4 and higher: 1.4 Slab-edge insulation (Up to 25% of the slab edge may be uninsulated in Climate Zones 4 and 5.)				
	Best practices encouraged, not required:		1		
	1.5 Air barrier at all band joists (Climate Zones 4 and higher)				
	1.6 Minimize thermal bridging (e.g., OVE framing, SIPs, ICFs)				
	General requirements: Fully insulated wall aligned with air barrier at both interior and exterior, OR Alternate for Climate Zones 1 thru 3, sealed exterior air barrier aligned with RESNET Grade 1 insulation fully supported Continuous top and bottom plates or sealed blocking				
Walls	2.1 Wall behind shower/tub				
Adjoining	2.2 Wall behind fireplace				
Exterior Walls or	2.3 Insulated attic slopes/walls				
Unconditioned	2.4 Attic knee walls				
Spaces	2.5 Skylight shaft walls				
	2.6 Wall adjoining porch roof				
	2.7 Staircase walls				
	2.8 Double walls				
Floors between Conditioned	General requirements: Air barrier is installed at any exposed insulation edges Insulation is installed to maintain permanent contact w/ sub-floor above				
and Exterior	3.1 Insulated floor above garage				
Spaces	3.2 Cantilevered floor				
	General requirements: Openings to unconditioned space are fully sealed with solid blocking or flashing and any remaining gaps are sealed with caulk or foam (provide fire-rated collars and caulking where required)				
Shafts	4.1 Duct shaft				
	4.2 Piping shaft/penetrations				
	4.3 Flue shaft				
Attic / Ceiling Interface	General requirements: All attic penetrations and dropped ceilings include a full interior air barrier aligned with insulation with any gaps fully sealed with caulk, foam or tape Movable insulation fits snugly in opening and air barrier is fully gasketed				
	5.1 Attic access panel (fully gasketed and insulated)				
	5.2 Attic drop-down stair (fully gasketed and insulated)				
	5.3 Dropped ceiling/soffit (full air barrier aligned with insulation)				
	5.4 Recessed lighting fixtures (ICAT labeled and sealed to drywall)				
	5.5 Whole-house fan (insulated cover gasketed to the opening)				
Common Walls Between	General requirements: Gap between drywall shaft wall (common wall) and structural framing between units is sealed at all exterior boundary conditions				
Dwellings	6.1 Common wall between dwelling units				

Home ID:

BOP Item	Inspection Guidelines	PLANT QC	RATER	
		Pass	Pass	Fail
Cooling Equipment (when provided)	General requirements: Hot Climates (2004 IRC Climate Zones 1,2,3) Right-Sized¹: ■ ENERGY STAR qualified AC (14.5 SEER / 12 EER) OR ENERGY STAR qualified heat pump (14.5 SEER / 12 EER / 8.2 HSPF) Mixed and cold climates (2004 IRC Climate Zones 4,5,6,7,8) Right-sizedError: Reference source not found: ■ 13 SEER AC OR ENERGY STAR qualified heat pump² (14.5 SEER / 12 EER / 8.5 HSPF)			
Heating Equipment	General requirements: Hot Climates (2004 IRC Climate Zones 1,2,3): ■ 80 AFUE gas furnace OR 80 AFUE boiler OR 80 AFUE oil furnace OR ENERGY STAR qualified heat pump (14.5 SEER / 12 EER / 8.2 HSPF) Mixed and Cold Climates (2004 IRC Climate Zones 4,5,6,7,8): ■ ENERGY STAR qualified gas furnace (90 AFUE) OR ENERGY STAR qualified boiler (85 AFUE) OR ENERGY STAR qualified oil furnace (85 AFUE) OR ENERGY STAR qualified heat pumpError: Reference source not found (14.5 SEER / 12 EER / 8.5 HSPF)			
Thermostat	General requirements: ENERGY STAR qualified thermostat (except zones with radiant heat) Error: Reference source not found General requirements:			
Ductwork	General requirements: Leakage ≤ 4 cfm to outdoors per 100 sq. ft. of conditioned floor area Ducts in unconditioned spaces wrapped with R-6 minimum insulation All exterior ducts mechanically secured and supported off the ground			
Envelope	General requirements: Infiltration (ACH50): 7 in CZs 1–2 6 in CZs 3–4 5 in CZs 5–7 4 in CZ 8 Insulation levels that meet or exceed the 2004 IRCError: Reference source not found			
Windows	General requirements: ■ ENERGY STAR qualified windows or better (additional requirements in CZ 2 and CZ 4)Error: Reference source not found			
Water Heater ³	General requirements: Gas (EF): 40 Gal = 0.61 60 Gal = 0.57 80 Gal = 0.53 Electric (EF): 40 Gal = 0.93 50 Gal = 0.92 80 Gal = 0.89 Oil or Gas water heating system ≥ 0.78 EF is integrated with space heating boiler ⁴			
Lighting and Appliances	General requirements: Five (5) or more ENERGY STAR qualified appliances, light fixtures, ceiling fans equipped with lighting fixtures, water heaters and/or ventilation fans are installed, as listed below.Error: Reference source not found 1			
Marriage Line Seal	General requirements: All vertical and horizontal marriage line areas filled with continuous non-porous insulating gaskets creating a permanent air barrier at joints in the ceiling, walls and floor. Gaskets may be one or two-part systems, including proprietary gaskets, foams, insulation wrapped in poly, or insulation covered by butyl or other long-life tape on one side. No visible signs of gaps or tears are permitted.			
Floors over Unconditioned Spaces	General requirements: Air barrier between floor and unconditioned crawlspace is continuous and sealed.

Date: _

Date:

Date: _

² Only applicable to homes in Climate Zones 4 and 5. Homes with heat pumps in Climate Zones 6, 7 and 8 cannot be qualified using the Prescriptive Path (BOP), but can earn the label using the ENERGY STAR Performance Path requirements.

³ Efficiency ratings not applicable if ENERGY STAR qualified water heater is installed to comply with Lighting and Appliances requirement.

⁴ Can use instantaneous water heating system or an indirect storage system with a boiler that has a system efficiency of ≥ 85 AFUE. Homes with tankless coil water heating systems cannot be qualified using the Prescriptive Path (BOP), but can be qualified using the ENERGY STAR Performance Path.
