## **Introduction, Consent**

**[INTRO:]** The U.S. Department of Health and Human Services is interested in learning about all the ways people get information about health. This voluntary interview takes about 18 minutes. You don't have to answer any question you don't want to, and you can stop at any time. Your opinions will help improve health communication and all the information you give will be confidential.

### **Module A. Core communication**

- A1. *I-info seek* First, I'd like to ask a general question. Some people get information about health or a medical topic only from a doctor and some people have lots of ways. If you wanted information about how to stay healthy, about a sickness, or about some medical topic, what are all the ways you would try to get that information?
