Appendix L. Constructs included in Employee and Manager Surveys

	Included in		
Company	Employee	Manager	Dumana of a sustained
Construct	Survey	Survey	Purpose of construct
Training			
Manager Receipt of DV Training		✓	☐ Use as a grouping variable (trained vs. untrained managers; self-initiated vs. coerced training)
Manager Perceptions of Supervisor's Support for Trainings		✓	☐ Potential use as an instrumental variable (if it is an independent predictor of likelihood of taking the DV training)
Manager Receipt of Other Trainings		✓	☐ Potential use as an instrumental variable (if it is an independent predictor of likelihood of taking the DV training)
Background			. J
Demographics (gender, age, race, marital/intimate partner status, parental status, educational attainment)	√	~	 ☐ Assess selection bias/sample representativeness ☐ Assess comparability between manager and employee groups (and serve as control variables in outcome models to adjust for group differences) ☐ Victimization substudy (predicting victimization)
Employment			
Employment History/Stability	✓	✓	 □ Assess comparability between manager and employee groups (and serve as control variables in outcome models to adjust for group differences) □ Victimization substudy (examining impact of previous victimization on job stability)
Unit/Division	√	✓	☐ Assess selection bias/sample representativeness
Job type	✓		☐ Assess comparability between employee groups (and serve as control variables in outcome models to adjust for group differences)
Benefits	✓		☐ Assess comparability between employee groups (and serve as control variables in outcome models to adjust for group differences)
Job Retention	√	√	 □ Baseline measures will be used to assess comparability between manager and employee groups (and serve as control variables in outcome models to adjust for group differences) □ Follow-up measures will serve as outcome variables □ Victimization substudy (consequences of victimization)
Absenteeism	*	✓	☐ Baseline measures will be used to assess comparability between manager and employee groups (and serve as control variables in outcome models to

	Included in		
			adjust for group differences)
	1		☐ Follow-up measures will serve as outcome variables
			□ Victimization substudy (consequences of victimization)
Productivity/Presenteeism	√	√	 □ Baseline measures will be used to assess comparability between manager and employee groups (and serve as control variables in outcome models to adjust for group differences) □ Follow-up measures will serve as outcome variables □ Victimization substudy (consequences of victimization) □ Manager measures have potential use as an instrumental variable (if it is an independent predictor of likelihood of taking the DV training)
Employee-Manager Interaction	✓	✓	 □ Both employee and manager measures have potential use as instrumental variables (both the extent to which a manager interacts with his/her employees and the extent to which a manager interacts with his/her supervisor could predict likelihood of taking the manager training) □ Assess comparability between manager and employee groups (and serve as control variables in outcome models to adjust for group differences)
Perceptions of Manager Interest in			☐ Baseline measure will be used to assess comparability between manager
Personal Life	✓	✓	and employee groups (and serve as control variables in outcome models to adjust for group differences) □ Follow-up measure will serve as an intermediate outcome
Approval and Compliance with Manager's Supervisor		✓	☐ Potential use as an instrumental variable (if it is an independent predictor of likelihood of taking the DV training)
Manager Interaction and Similarity to Employees		✓	☐ Potential use as an instrumental variable (if it is an independent predictor of likelihood of taking the DV training)
Manager Stress and Workload		✓	☐ Potential use as an instrumental variable (if it is an independent predictor of likelihood of taking the DV training)
Health			
Health-Related Quality of Life	√	✓	 □ Baseline measures will be used to assess comparability between manager and employee groups (and serve as control variables in outcome models to adjust for group differences) □ Follow-up measures will serve as outcome variables □ Victimization substudy (consequences of victimization)
Health Care Utilization	√	✓	 □ Baseline measures will be used to assess comparability between manager and employee groups (and serve as control variables in outcome models to adjust for group differences) □ Follow-up measures will serve as outcome variables □ Victimization substudy (consequences of victimization)

	Included in		
Experiences Construct			Purpose of construct
IPV Victimization	✓	✓	 □ Baseline measures will be used to assess comparability between manager and employee groups (and serve as control variables in outcome models to adjust for group differences) □ Follow-up measures will serve as outcome variables □ Victimization substudy (identification of victims)
Perceived Impact of Victimization on Work	✓		☐ Victimization substudy (consequences of victimization)
Utilization of Company DV Resources	✓	✓	☐ Follow-up measures will serve as intermediate outcomes ☐ Victimization substudy (resource utilization among victims)
Satisfaction with Company DV Resources	✓	✓	☐ Victimization substudy (resource utilization among victims)
Hypothetical Use of Company DV Resources	✓	✓	□ Follow-up measures will serve as intermediate outcomes
Domestic Violence and the Workplace			
Awareness of Company DV Program	✓	✓	□ Follow-up measures will serve as intermediate outcomes
Attitudes toward Domestic Violence as a Workplace Issue	✓	✓	□ Follow-up measures will serve as intermediate outcomes
Perception of manager's attitudes toward domestic violence as a workplace issue	✓	✓	□ Follow-up measures will serve as intermediate outcomes
Relative Importance of Domestic Violence as a Workplace Issue		✓	□ Follow-up measures will serve as intermediate outcomes
Knowledge of DV and the Company's DV Program		✓	□ Follow-up measures will serve as intermediate outcomes
Confidence in Responding to DV		✓	□ Follow-up measures will serve as intermediate outcomes
Employee DV Referrals		✓	☐ Follow-up measures will serve as intermediate outcomes
Satisfaction with Resources Used		✓	□ Follow-up measures will serve as intermediate outcomes
