AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of extension of an information collection (1010-0176).

SUMMARY: To comply with the Paperwork Reduction Act of 1995 (PRA), MMS is inviting comments on a collection of information that we will resubmit to the Office of Management and Budget (OMB) for review and approval. The resubmission of this information collection request (ICR) is necessary to include forms we have developed to clarify and facilitate submission of certain paperwork requirements in the regulations under 30 CFR 285, Renewable Energy and Alternate Uses of Existing Facilities on the Outer Continental Shelf. The new forms are Forms MMS-0002, MMS-0003, MMS-0004, MMS-0005, and MMS-0006. These forms will entail no additional information collection burden to that already approved by OMB for the 30 CFR 285 regulations.

DATES: Submit written comments by November 23, 2009.

FOR FURTHER INFORMATION CONTACT: Cheryl Blundon, Regulations and Standards Branch at (703) 787-1607. SUPPLEMENTARY INFORMATION:

Title: 30 CFR 285, Renewable Energy and Alternate Uses of Existing Facilities on the Outer Continental Shelf.

Form(s): MMS-0002, MMS-0003, MMS-0004, MMS-0005, and MMS-0006.

OMB Control Number: 1010-0176.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 *et seq.* and 43 U.S.C. 1801 *et seq.*), authorizes the Secretary of the Interior to issue leases, easements, or rights-of-way on the OCS for activities that produce or support production, transportation, or transmission of energy from sources other than oil and gas (renewable energy). Specifically, subsection 8(p) of the OCS Lands Act, as amended by section 388 of the Energy Policy Act of 2005 (Pub. L. 109-58), directs the Secretary of the Interior to issue any necessary regulations to carry out the OCS renewable energy program. The Secretary delegated the authority to issue such regulations and implement an OCS renewable energy program to the Minerals Management Service (MMS).

Under 30 CFR part 285, respondents will operate commercial and noncommercial technology projects that include installation, construction, operation and maintenance, and decommissioning of offshore facilities, as well as possible onshore support facilities. The MMS must ensure that these activities and operations on the OCS are carried out in a safe and pollution-free manner, do not interfere with the rights of other users on the

OCS, and balance the protection and development of OCS resources. To do this, MMS needs information concerning the proposed activities, facilities, safety equipment, inspections and tests, and natural and manmade hazards near the site, as well as assurance of fiscal responsibility.

Specifically, MMS will use the information collected under part 285 to:

- Determine if applicants and assignees are qualified to hold leases on the OCS. Information is used to track ownership of leases and right-of-way (ROW) or right of use and easement (RUE), as well as to approve requests to designate an operator to act on the lessee's behalf. Information is necessary to approve assignment, relinquishment, or cancellation requests. Information is used to document that a lease, ROW, or RUE has been surrendered by the record title holder and to ensure that all legal obligations are met and facilities are properly decommissioned.

- Determine if an application for a ROW or RUE serves the purpose specified in the grant.

- Review and approve SAPs, COPs, and GAPs prior to allowing activities to commence on a lease to ensure that the activities will protect human, marine, and coastal environments of the OCS; to review plans for taking safety equipment out of service to ensure alternate measures are used that will properly provide for the safety of the facilities. The MMS inspectors monitor the records concerning facility inspections and tests to ensure safety of operations and protection of the environment and to schedule their workload to permit witnessing and inspecting operations. Provide lessees greater flexibility to comply with regulatory requirements through approval of alternative equipment or procedures and departures to regulations if they demonstrate equal or better compliance with the appropriate performance standards.

- Ensure that, if granted, proposed routes of a ROW or RUE do not conflict with any State requirements or unduly interfere with other OCS activities.

- Determine if all facilities, project easements, cables, pipelines, and obstructions, when they are no longer needed, are properly removed or decommissioned, and that the seafloor is cleared of all obstructions created by operations on the lease, project easement, RUE or ROW.

- Improve safety and environmental protection on the OCS through collection and analysis of accident reports to ascertain the cause of the accidents and to determine ways to prevent recurrences.

Subsequent to the approval of the information collection requirements in the final 30 CFR 285 regulations, MMS developed five new forms that respondents will be required to submit certain information collection requirements in subpart D, Lease and Grant Administration, and subpart E, Payments and Financial Assurance Requirements. These forms entail no additional burden as they only clarify and facilitate the submission of the currently approved information collection requirements to which the forms pertain. This resubmitted information collection request (ICR) is revised only to reflect the inclusion of the new Forms MMS-0002, MMS-0003, MMS-0004, MMS-0005, and MMS-0006.

We will protect information from respondents considered proprietary under the Freedom of Information Act (5 U.S.C. 552) and its implementing regulations (43 CFR part 2) and under regulations at 30 CFR 285.113, How will data and information obtained by MMS under this part be disclosed to the public? No items of a sensitive nature are collected. Responses are mandatory or are required to obtain or retain a benefit.

Frequency: Varies depending upon the requirement, but usually on occasion or annual.

Description of Respondents: Primary respondents comprise Federal OCS companies that submit unsolicited proposals or responses to **Federal Register** notices; or are lessees, designated operators, and ROW or RUE

grant holders. Other potential respondents are companies or State and local governments that submit information or comments relative to alternative energy-related uses of the OCS; certified verification agents (CVAs); and surety or third-party guarantors.

Estimated Reporting and Recordkeeping Hour Burden: The currently approved annual reporting burden for this collection is 31,124 hours. The following chart details the individual components and respective hour burden estimates of this ICR. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.

Estimated Reporting and Recordkeeping Non-Hour Cost Burden: There are three non-hour cost burdens to industry. They are as follows:

- **§ 285.111—\$4,000:** This section requires respondents to pay a processing fee of \$4,000 for MMS document or study preparation when necessary for MMS processing of applications and requests.

- **§ 285.111(b)(3)—\$950,000:** This section allows respondents to pay a contractor instead of MMS for all or part of any document, study, or other activity, and provide the results to MMS to reduce MMS processing costs. We estimate the non-hour cost burden of this payment could range from \$100,000 to \$2,000,000; therefore, we are estimating the cost at \$950,000.

- **§ 285.417(b)—\$950,000:** This section requires respondents to pay for a site-specific study to evaluate the cause of harm or damage to natural resources, and submit a report to MMS. We estimate the non-hour cost burden of this study could range from \$100,000 to \$2,000,000, depending on the nature of the study; therefore, we are estimating the cost at \$950,000.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond.

Comments: Before submitting an ICR to OMB, PRA section 3506(c)(2)(A) requires each agency “* * * to provide notice * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * *”. Agencies must specifically solicit comments to: (a) Evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

Agencies must also estimate the non-hour paperwork cost burdens to respondents or recordkeepers resulting from the collection of information. Therefore, if you have costs to generate, maintain, and disclose this information, you should comment and provide your total capital and startup cost components or annual operation,

maintenance, and purchase of service components. You should describe the methods you use to estimate major cost factors, including system and technology acquisition, expected useful life of capital equipment, discount rate(s), and the period over which you incur costs. Capital and startup costs include, among other items, computers and software you purchase to prepare for collecting information, monitoring, and record storage facilities. You should not include estimates for equipment or services purchased: (i) before October 1, 1995; (ii) to comply with requirements not associated with the information collection; (iii) for reasons other than to provide information or keep records for the Government; or (iv) as part of customary and usual business or private practices.

We will summarize written responses to this notice and address them in our submission for OMB approval. As a result of your comments, we will make any necessary adjustments to the burden in our submission to OMB.

Public Comment Procedures: Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Endangered and Threatened Wildlife and Plants; Draft Post-Delisting Monitoring Plan for the Concho Water Snake

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of draft post-delisting monitoring plan.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the

availability of our Post-Delisting Monitoring Plan for the Concho water snake (*Nerodia paucimaculata*). The draft post-delisting monitoring (PDM) plan describes the methods we propose to monitor the status of the snake and its habitat, in cooperation with the State of Texas and other conservation partners, for a 15-year period if we remove this species from the Federal list of endangered and threatened wildlife under another pending action. The draft PDM plan also provides a strategy for identifying and responding to any future population declines or habitat alterations.

DATES: To ensure consideration, please send your written comments on the draft PDM plan for Concho water snake by October 23, 2009.

ADDRESSES: The draft PDM plan is available for review on the Internet at <http://endangered.fws.gov> and <http://www.fws.gov/southwest/es/AustinTexas/>. To request a copy of the draft PDM plan, write to U.S. Fish and Wildlife Service, Austin Ecological Services Field Office, 10711 Burnet Road, Suite 200, Austin, TX 78758; telephone 512-490-0057; facsimile 512-490-0974. Supporting documentation we used in preparing the draft PDM plan is available for public inspection, by appointment, during normal business hours, at the above office. SUPPLEMENTARY INFORMATION:

Background

The Concho water snake is a reptile endemic to central Texas. We listed this species as threatened under the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531 *et seq.*), effective September 3, 1986, because of threats from habitat modification and destruction (51 FR 31412). On July 8, 2008, we published a proposed rule to remove the Concho water snake from the list of threatened species (73 FR 38956). We based the proposal on our finding that the best available scientific and commercial data, including new information, indicate that the Concho water snake has recovered because threats have been eliminated or reduced to the point that the species no longer meets the definition of threatened or endangered under the Act.
