SUPPLEMENTARY INFORMATION: The C/ACAMS program offers State and local first responders, emergency managers, and other homeland security officials access to the Constellation/Automated Critical Asset Management System (C/

ACAMS) tools for using CIKR asset data, prevention and protection information, and incident response and recovery plans to make their communities safer. Efficient and effective use of the C/ACAMS tools helps all State and local first responders and emergency managers nationwide reach their goal of making their communities safer. To ensure that interested stakeholders achieve this mission, C/ACAMS requests supporting information from users seeking to use its tool.

The C/ACAMS Program Management Office (PMO) evaluates the Functional Survey to determine levels of customers' satisfaction with the user experience with the C/ACAMS tool. The survey supports data-based decision-making because it evaluates quantitative and qualitative data to identify improvements and identify significant issues based on experienced customer assessments of key tool functions. Obtaining current fact-based actionable data about tool features allows the program to appropriate funds cost-effectively based on user need, saving costs while improving the tool.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
