Description

1. Provide an overview of the application or collection and indicate the legislation authorizing this activity:

The Lewis Educational and Research Collaborative Internship Program (LERCIP) application is a web-based application that will provide college students the ability to submit an application and an electronic resume to GRC / OAI to apply for the LERCIP Program. OAI and EPO will use the CWA application to track the status of the submitted applications and related information. Furthermore, they will use the application to mentors who will be able to review limited information on the students to identify candidates for the internship position. Administration options will be available to run selected reports and also purge the database of previous applications and reports.

2. Describe the information the agency will collect, maintain, or disseminate and how the agency will use the information. In this description, indicate whether the information contains IIF and whether submission is voluntary or mandatory:

The information collected is information voluntarily submitted by users in order to apply for participation in a summer internship program.

3. Explain how the IIF is collected, maintained, and/or disseminated is the minimum necessary to accomplish the purpose for this effort:

In order to reduce paper used for this project, the bare minimum of information is collected via an online application web interface.

4. Explain why the IIF is being collected, maintained, or disseminated:

The IIF is collected so that individual applications can be obtained and processed.

5. Identify with whom the agency will share the IIF:

The IIF collected in this system is not being shared outside of the agency. However, persons with proper access rights will be able to view this IIF during the application evaluation and selection process.

6. Describe how the IIF will be obtained, from whom it will be collected, what the suppliers of the information and the subjects will be told about the information collection, and how this message will be conveyed to them (e.g. written notice, electronic notice if a Web-based collection). Describe any opportunities for consent provided to individuals regarding what information is collected and how the information will be shared:

The information will be collected via a web-based user interface. The target audience are student will be starting their freshman year of college in the upcoming Fall semester. Upon the successful submission of the online application, the user will receive an email stating that the submission process was successful.

7. State whether the personal information will be collected from children under age 13 on the Internet and, if so, how parental or guardian approval will be obtained. (Reference: Children's Online Privacy Protection Act of 1998):

No information will be collected from children under the age of 13

8. Describe how the IIF will be secured:
