

SUPPORTING STATEMENT

A. Justification:

1. 47 CFR Section 73.691(b) requires TV stations to enter into the station log the date and time of the initial technical problems that make it impossible to operate a TV station in accordance with the timing and carrier level tolerance requirements. If this operation at variance is expected to exceed 10 consecutive days, a notification must be sent to the FCC. The licensee must also notify the FCC upon restoration of normal operations. If causes beyond the control of the licensee prevent restoration of normal operations within 30 days, a written request must be made to the FCC.

The Commission is requesting an extension of this information collection in order to receive the full three year OMB clearance/approval for this collection of information.

This information collection does not affect individuals or households; thus, there are no impacts under the Privacy Act.

Statutory authority for this collection of information is contained in Section 154(i) of the Communications Act of 1934, as amended.

2. The data is used by FCC staff to maintain accurate and complete technical information about a station's operation. In the event that a complaint is received from the public regarding a station's operation, this information is necessary to provide an accurate response.

3. This is a simple notification/letter. We do not believe the use of information technology is feasible in this situation.

4. This agency does not impose a similar information collection on the respondents. There is no similar data available.

5. In conformance with the Paperwork Reduction Act of 1995, the Commission is making an effort to minimize the burden on all respondents. Therefore, this information collection will not have a significant economic impact on a substantial number of small entities/businesses.

6. The frequency for this collection of information is determined by stations operating out-of-tolerance.

7. This collection of information is consistent with the guidelines in 5 CFR 1320.5(d)(2).

8. The Commission published a Notice (74 FR 45853) in the *Federal Register* on September 4, 2009. No comments were generated as a result of the Notice.

9. No payment or gift was provided to the respondents.

10. There is no need for confidentiality with this collection of information.

11. This collection of information does not address any private matters of a sensitive nature.

12. Annually, we estimate that a total of 20 TV stations will have technical problems. Licensees will file two (2) notifications per station with an average burden of one (1) hour to record the date and time of the initial technical problems and to prepare and file a notification with the Commission. In addition, six (6) licensees of the 20 licensees will file letters when causes beyond the control of the licensee prevent restoration of normal operations within 30 days with an average burden of one (1) hour. This estimate is based on FCC staff's knowledge and familiarity with the availability of the data required.

Total Number of Annual Respondents: 20 TV Stations

Total Number of Annual Responses:

40 Notifications (each station files two notifications each)	
<u>6 Letters</u>	(concerning causes beyond the respondent's control which prevents
46	restoration of normal operations)
(responses)	

Annual Burden Hours:

20 TV stations x 2 notifications/station x 1.0 hour	= 40 hours
6 TV stations x 1 letter/station x 1.0 hour	= <u>6 hours</u>
Total Annual Burden Hours: 46 hours	

Annual "In-house Cost": It is assumed that the respondent would use a station engineer at \$48.08/hour to prepare the notification.

20 TV stations x 2 notifications/station x 1.0 hour x \$48.08/hour	= \$1,923.20
6 TV stations x 1 letter/station x 1.0 hour x \$48.08/hour	= <u>\$ 288.48</u>
Total Annual "In-house Cost": = \$2,211.68	

13. Annual Cost Burden:

- (a) Total annualized capital/startup costs: None
- (b) Total annual costs (O&M): None
- (c) Total annualized cost requested: None

Title: Section 73.691, Visual Modulation Monitoring

14. Cost to the Federal Government. The Commission will use paraprofessional staff at the GS-11, step 5 level (\$33.12/hour) to process these notifications/letters.

$$\begin{aligned} \$33.12/\text{hour} \times 0.083 \text{ hours} \times 20 \text{ TV stations} \times 2 \text{ notifications} &= \$109.96 \\ \$33.12/\text{hour} \times 0.083 \text{ hours} \times 6 \text{ TV stations/letters} &= \underline{\$ 16.49} \\ \textbf{Total Cost to the Federal Government:} & \quad \quad \quad \textbf{\$ 126.45} \end{aligned}$$

15. There are no program changes or adjustments to this information collection.

16. The data will not be published.

17. OMB approval of the expiration of the information collection will be displayed at 47 CFR Section 0.408.

18. There are no exceptions to the Certification Statement.

B. Collections of Information Employing Statistical Methods

No statistical methods are employed.
