August 26, 2009

DSSD 2010 CENSUS COVERAGE MEASUREMENT MEMORANDUM SERIES #2010-D10-02

MEMORANDUM FOR   Barbara LoPresti
                     Chief, Technologies Management Office

From: David C. Whitford *Signed August 26, 2009*
                     Chief, Decennial Statistics Studies Division

Prepared by: Patricia B. Hartman and Angela-Jo Wetzel
                     Quality Assurance Branch
                     Decennial Statistics Studies Division

Subject: 2010 Census Coverage Measurement Person Interview
                     Reinterview Instrument Specification

This memorandum contains the specification for the 2010 Census Coverage Measurement (CCM) Person Interview (PI) Reinterview (RI) instrument. It includes revisions to the 2009 specification dated May 19, 2009, based on findings from the 2009 PI RI Operational Test.

The attached specification outlines the PI RI scripts, skip patterns, special instructions and proposed screen layouts. This specification, in conjunction with the detailed PI RI operational requirements and the PI instrument specification, provides the basis for the PI RI instrument development. The requirements are provided in Memorandum 2010-D1-06 in this series, *2010 Census Coverage Measurement Person Interview and Reinterview Operational High Level and Detailed Level Requirements*. The PI instrument specification is provided in Memorandum 2010-D8-02 in this series, *2010 Census Coverage Measurement Person Interview Instrument Specification*.

The 2010 CCM PI RI operation will be conducted by personal visit or telephone using a computer-assisted data collection instrument on a laptop computer. For each CCM PI interviewer, we will conduct a reinterview on a sample of completed and eligible interview cases. The purpose of the reinterview is to confirm that the PI interviewer conducted an interview, to determine the unit's status on the PI interview date, to collect the household roster for units occupied on the PI date, and to conduct a Full PI interview when certain questionable conditions exist.

U S C E N S U S B U R E A U
Helping you make informed Decisions   *www.census.gov*

The PI RI instrument will also contain a Spanish wording path. The Spanish Translation specification will be provided in Memorandum 2010-D10-04 in this series, *2010 Census Coverage Measurement Person Interview Reinterview Instrument Specification – Spanish.*

The PI RI instrument will also contain a Puerto Rico Spanish wording path. The Puerto Rico Spanish Translation specification will be provided in Memorandum 2010-D10-05 in this series, *2010 Census Coverage Measurement Person Interview Reinterview Instrument Specification – Puerto Rico Spanish.*

The 2010 CCM PI RI operation is scheduled to occur from 8/21/10 to 10/09/10. The workload is estimated at approximately 36,300 reinterview cases. Please direct any questions on this specification to Angela-Jo Wetzel on 301-763-9277 or Patricia Hartman on 301-763-1975.

2010 CCM PI RI Instrument Specification Modification History Table

Change #	Version #	CR #	CR Status	Screen Changed	Description of Change	Date of Change

Special Instructions

The following items provide a guideline for interpreting the specification for the Person Interview (PI) Reinterview (RI) instrument. This section should be examined prior to reading the screen specification.

1. **Screen Specification Table**

   Our specification for each screen is outlined in a table consisting of the following eight sections:

   - Variable Name
   - Field Description
   - Universe
   - Screen Text
   - Input Options
   - Fill Instructions
   - Skip Instructions
   - Special Instructions

   1.1. <u>Section 1 - Variable Name</u>: This section gives the screen name and its screen number in alphanumeric. Screen names and numbers are present to add clarity for the reinterview enumerators (reinterviewers) and to aid in training. Any changes to the screen names and numbers must be discussed with the Decennial Statistical Studies Division (DSSD) – Quality Assurance Branch (QAB) staff. If new screens need to be created, the screen names need to be consistent with the purpose of the screen and the screen numbers should follow the numbering used in that section of the instrument.

   We tried to number the screens sequentially within each section of the instrument – the Front, the Middle, and the Back. The Front screens have a prefix of "F" before their number; the Middle screens, a prefix of "M"; and the Back screens, a prefix of "B."

   Both screen name and number should appear in the laptop computer for each screen as seen in the specification. Screen names are in all caps throughout the specification. They are also bolded, except in the universe block.

   1.2. <u>Section 2 - Field Description</u>: This section gives a brief description of the screen's purpose.

   1.3. <u>Section 3 - Universe</u>: The universe gives the conditions for which the screen is applicable.

1.4.   <u>Section 4 - Screen Text</u>: This section displays question text, information useful/helpful to the reinterviewer, and/or information useful/helpful to the programmer.

    1.4.1.   To discern what information in Section 4 is for the programmer, the reinterviewer, and read to the respondent, we used five categories for screen presentation of text:

        - **BLACK/BOLD UPPERCASE** text is used for variable names.

        - **Black/Bold** text is used to identify text the reinterviewer reads aloud to the respondent.

        - Plain Blue text is used to represent Actions/Instructions for the reinterviewer. A diamond precedes this text.

        - Black plain text is used for unread response options in the answer list and optional screen text the reinterviewer reads if necessary (will appear in gray bold text on the screen).

        - *Italics* text is information for the programmer.

    1.4.2.   Some screen text is designated by a variable fill. The fill is the value of the variable or the "word" fill for that value. Appendix A lists the wording for a variable's values when a word fill is specified.

1.5.   <u>Section 5 - Input Options</u>: This section lists the acceptable response choices for the screen. Only one response per question is allowed unless otherwise stated. Also, **blank is not a valid response option, unless otherwise stated**.

The numbers beside the response options are displayed on the screen and used as the response's input/output value, unless otherwise stated. Note that for a few of the screens, the responses are not numbered in order.

Special attention should be given to the "Don't Know" and "Refused" response options. "Don't Know" and "Refused" are options on every screen, unless otherwise stated. "Don't Know" and "Refused" should not be visible on the screen.   However, they should be rapidly available to the reinterviewer. "Don't Know" and "Refused" are represented by DK and RF, respectively, in the skip instructions. "Don't Know" and "Refused" may not be combined with other responses, unless otherwise stated (that is, when multiple responses are allowed). "Don't Know" and "Refused" will be input and output according to their respective Blaise conversions, unless otherwise stated.

1.6.   <u>Section 6 - Fill Instructions</u>: When applicable, this section tells the programmer the conditions for filling each option listed for a fill in the Screen Text section.

1.7.   Section 7 - Skip Instructions: This section tells the programmer the next screen the instrument should go to if a particular input option is chosen and if certain conditions exist. The instructions also tell the programmer what variables to set and what counters to increment. The skip instructions are written in a linear progression, so that conditions are tested from top to bottom.

1.8.   Section 8 - Special Instructions: This section, when used, provides other relevant information for the programmer.

2.   Screen Layout

2.1.   The screen layout will depend on the amount of space on the screen and the method chosen to display the text.

2.2.   The input method options will depend on the number and nature of the response categories.

2.3.   If screens need to be broken into multiple screens or changed in some other way, programmers should consult with DSSD-QAB staff.

3.   Functions

3.1.   Case NOTES (Ctrl+F7) is a global function available throughout the instrument from any screen. The instrument also opens NOTES each time a case is closed following the RI close routine.

3.2.   Item Notes functionality is disabled.

3.3.   HU_HELP (Shift+F6) for occupancy/unit status questions/decision is a global button available throughout the instrument.

3.4.   H_RESP_RULES (F6) for Respondent/Attempt type Rules is a global button available throughout the instrument.

3.5.   Exit/F10 is a global function that leads to the END_NOW screen and allows the reinterviewer to end the interview early. However it should only be accessible if the following condition is true:

(ROSTER1B = 1 and COMPLETE = 1).

3.6   PI RI Frequently Asked Questions (PI RI FAQs) are accessed through a parallel button and (Shift+F3). The list of questions and answers are in Appendix B.

3.7   PI FAQs are accessible through a global button and (Shift+F2). Copy the text from the PI Instrument.

3.8 The instrument will use buttons, instead of tabs, to allow for appropriate functionality.

3.9 When the PRFLAG = 1 in the input, the instrument should default to PR Spanish Mode. When the PRFLAG = 0 in the input, the instrument should default to Untied States (U.S.) English Mode. Both U.S. and PR modes should have the counterpart Spanish and English available.

3.10 For tables entries, F12 allows the user to copy an entry from the same column in the previous row.

4. Person Interview Variables Needed for the Person Interview Reinterview Instrument

The following table lists the variables from the PI Instrument and/or the PI RI Sample Control Input File (SCIF) needed as input in the PI RI Instrument. Since RI variables often use the same names as their corresponding PI variables, certain PI instrument variables should be copied to variables with an "ORIG_" prefix added to the PI variable name. These "ORIG_ " prefixed variables should then serve as the input variables in the RI instrument.

PI Variable Name	Description	Copy to …
ENTRYDATE	Date original case was completed	ORIG_ENTRYDATE
BEGINTIME	Time original case was completed	ORIG_BEGINTIME
PRFLAG	Flag designating Puerto Rico case	
PI sample address variables	All address variables input into the PI instrument for the sample address (U.S. and Puerto Rico)	
OUTCOME	Outcome of PI	ORIOUT
ATTEMPT_TYPE	Type of PI conducted	ORIG_ATTEMPT_TYPE
CP2ADD1	Line 1 of PI proxy address	
CP2ADD2	Line 2 of PI proxy address	
CP2PO	City of PI proxy address	
CP2ST	State of PI proxy address	
CP2ZP5	ZIP Code of PI proxy address	
R_NAME	Name of the original respondent	ORIG_R_NAME
R_PHONE (Split into AREA, PREFIX, and SUFFIX on the PI RI SCIF.)	Telephone number of the original respondent	**ORIG_R_PHONE** and initially set MASTER_PHONE (Merged from AREA, PREFIX, and SUFFIX on the PI RI SCIF.)
R_TYPE	Type of original respondent	ORIG_R_TYPE
LANG_SPEAK	Language spoken by PI respondent	ORIG_LANG_SPEAK
AGE	Age of PI respondent	ORIG_AGE
SEX	Sex of PI respondent	ORIG_SEX
RELATION1	The PI respondent's relationship to	ORIG_RELATION1

PI Variable Name	Description	Copy to …
	reference person (PV)	
RELATION2	The PI respondent's relationship to reference person (Telephone)	ORIG_RELATION2
CURSTAT	Current status of the sample address on PI date	ORIG_CURSTAT
BEST_TIME	Best time to contact – collected during the original interview	ORIG_BEST_TIME
RI_CATEGORY	Reinterview category set by PI RI MaRCS	
PV_TEL_FLAG	Initial 'attempt mode' set by PI RI MaRCS	

5.   Other Required Information

Each reinterview case must also have the necessary variables required for display or processing by the Coverage Measurement Operations Control System (CMOCS), Laptop Case Management (LCM), or the PI RI Matching, Review and Coding System (MaRCS). These variables are defined in the PI RI SCIF and the TMO-PI RI MaRCS Interface Control Document (ICD). These variables include the following types of information:

5.1.   Case control information, similar to that for the corresponding PI case.

5.2.   Employee information such as the Applicant ID and Field Representative (FR) Code for both the interviewer and reinterviewer.

5.3.   The data in the Record of Calls Table on the History Tab in LCM.

6.   Address Fills

The variable SAMPLE_ADDR is a concatenated field of the address information for the PI sample address. It is composed of the address variables defined on Record Type 20 of the PI RI SCIF. When filling the PI sample address (SAMPLE_ADDR with a length of 442) and other addresses in the reinterview instrument, the following rules apply.

6.1   If U.S., the following should be displayed:

6.1.1   Display House Number, Street Name, and Unit designation, if both House Number and Street Name are present (excluding Don't Know and Refused answers).

6.1.2   Otherwise, display RURALADDRESS, if not blank.

6.1.3   Otherwise, display Street Name, if not blank, and Physical Description, if not blank.

6.1.4   For the Sample Address, if (HOUSENO = blank or STREETNM = blank) and (RURALADDRESS = blank), we collect another description of the address from the respondent, this description (*ADDRESS_DESCRIP*) should be used throughout the instrument when *SAMPLE_ADDR* is used in fills.

6.2   If Puerto Rico, the following should be displayed:

6.2.1   If (PR House Number and PR Urbanization Name) or (PR Urbanization Name and PR Unit Designation) or ((PR House Number or PR KM/HM) and PR Street Name) or ((PR House Number or PR KM/HM) and PR Ramal) are not blank, then display:

PR Urbanization Name, PR Complex Descriptor and Designation, PR Street Name, PR Ramal, PR House Number, PR Unit Designation, PR Area Name 1, PR Area Name 2, and PR KMHM. (Remove blank fields and concatenate for readability, separating field values by commas.)

6.2.2   Else if RURALADDRESS is filled: display RURALADDRESS.

6.2.3   Else display PR Urbanization Name, PR Street Name, PR Ramal, and Physical Description. (Remove blank fields and concatenate for readability, separating field values by commas.)

6.2.4   For the PR Sample Address, if all of the following are true:

● (PR House Number = blank or PR Urbanization Name = blank) and
● (PR Urbanization Name = blank or PR Unit Designation = blank) and
● ((PR House Number = blank and PR KM/HM = blank) or PR Street Name = blank) and
● ((PR House Number = blank and PR KM/HM = blank) or PR Ramal = blank) and
● (RURALADDRESS = blank),

we collect another description of the address from the respondent. This description (ADDRESS_DESCRIP) should be used throughout the instrument when SAMPLE_ADDR is used in fills.

6.3   The variable ORIG_PRX_LOC is a concatenated field of the address information from the PI instrument. It is composed of the following copied PI address variables: CP2ADD1, CP2ADD2, CP2PO, CP2ST, and CP2ZP5.

6.4 The variable PRX_LOC_UPDATE is a concatenated field of the address information from the following variables: CP1ADD1, CP1ADD2, CP1PO, CP1ST, and CP1ZP5. These variables may be updated in the reinterview instrument.

6.5 For all state collections, a state lookup box will be provided. It will sort through the lookup based on state abbreviations or arrow or clicking on a line. The state abbreviation shall appear, as well as the spelled out name, for ease in finding the proper state.

6.6 A hard error that states, 'Enter a complete five-digit ZIP Code' will be displayed when less than five numbers are entered for a ZIP Code entry. Also, 99998 and 99999 are not valid ZIP Codes. They are reserved for a ZIP Code entry of "Refused" (99998) and "Don't Know " (99999).

7.   Phone Number Fills

When filling a phone number in the reinterview instrument, the following rules apply:

7.1 Display a valid phone number only. A valid phone number, (ABC) DEF-GHIJ, must meet each of the following conditions:

- The telephone number contains 10 digits
- The digits in positions A and D are not 0 or 1
- The digit in position B is not 9
- The digits in positions B and C are not the same
- The digits in positions ABC are not 456, 710, or 950
- The digits in positions AB are not 88.
- The digits in positions DEFGHIJ are not all the same
- The digits in positions DEF are not 555, 950, 958, 959
- The digits in positions EF are not 11

7.2 Display MASTER_PHONE as the phone number fill, except when filling ORIG_R_PHONE on STARTA, INTRO_INT, and RI_START_TPH.

7.3 Always update MASTER_PHONE with the latest phone number collected in the reinterview instrument or Laptop Case Management, if the latest phone number is valid.

8.   Date Format Fills

Use the long date format (day of week, month, day, and four-digit year) to display ORIG_ENTRYDATE in the reinterview instrument. This includes instances where the date is displayed in the roster section.

9.   Roster Screens

The PI RI instrument contains various screens that collect household members' names. When setting the name of a household member (WNAME), trim and concatenate the various parts (FNAME, MINIT and LNAME **or** DESCRIPTION and LNAME), leaving a space between each part.

All roster list information must travel with the case.

10.   Reinterview Categories

The PI RI MaRCS sets a reinterview category flag for all potential reinterview cases. This flag must travel with the reinterview case**.** Values of the RI_CATEGORY Flag for eligible RI cases are:

1 - Sample household occupied or seasonally occupied and interviewed
2 - Proxy interviewed and sample household occupied or seasonally occupied, contact information available
3 - Proxy interviewed and sample household occupied or seasonally occupied, contact information not available
5 - Proxy interviewed, sample household vacant, seasonally vacant or not a housing unit, and contact information available
6 - Proxy interviewed, sample household vacant, seasonally vacant or not a housing unit, and contact information not available
7 - Sample household vacant, seasonally vacant or not a housing unit, and unit status determined by enumerator (interviewer) observation or respondent type of "Don't Know."

11.   Reinterview Groups

Some of the RI Categories subdivide into groups based on the number of reinterview attempts and/or the results of those attempts. The possible Categories and Groups are:

- Category 1 – Group 1
- Category 1 – Group 11
- Category 2 – Group 2
- Category 2 – Group 21
- Category 3 – Group 3
- Category 5 – Group 5
- Category 5 – Group 51
- Category 6 – Group 6
- Category 6 – Group 61
- Category 7 – Group 7
- Category 7 – Group 71

A brief description of each of the groups follows:

11.1. <u>Category 1 - Group 1</u>

For RI cases where the PI unit status was occupied or seasonally occupied and the original PI respondent was a household member, we attempt to reinterview the original respondent.

If the original respondent is not available and another household member is available, that person will be reinterviewed.

If the original household confirms that a PI interview took place, we attempt to complete a reinterview with that household. We do not reinterview a proxy.

If the original household does not confirm that a PI interview took place, we attempt to complete a Full PI interview with that household. We do not interview a proxy.

11.2. <u>Category 1 – Group 11</u>

If the original household cannot be contacted after six attempts, or will not be available for an extended period on any attempt, attempts will be made to reinterview a proxy respondent.

At the point a Category 1 case is set to interview a proxy respondent, rather than a household respondent, the case converts from a Group 1 case to a Group 11 case. The reinterview is structured differently, as we will no longer be contacting the original respondent.

11.3. <u>Category 2 – Group 2</u>

For RI cases where the PI unit status was occupied or seasonally occupied and the original PI respondent was a proxy, and we have enough contact information about the proxy, we attempt to contact the original proxy respondent.

If the original proxy respondent confirms that a PI interview took place, we attempt to complete a reinterview with that person.

11.4. <u>Category 2 – Group 21</u>

If the original proxy refuses to be reinterviewed at all, or does not confirm that a PI interview took place, attempts will be made to complete a Full PI interview with the PI sample household.

If the original proxy respondent is not available after six attempts, or will not be available for an extended period on any attempt, we attempt to complete a Full PI interview with the PI sample household.

At the point a Category 2 case is set to interview a household respondent rather than the proxy respondent, the case converts from a Group 2 case to a Group 21 case. The reinterview is structured differently, as we will no longer be contacting the original respondent.

11.5.   Category 3 – Group 3

When the PI unit status was occupied or seasonally occupied and we do not have sufficient information to contact the original proxy, we go directly to the PI sample household. We make six attempts to conduct the Full PI interview with the household. No proxy interviews are attempted.

11.6.   Category 5 – Group 5

For a vacant, a seasonally vacant, or a "not a housing unit (HU)" case with sufficient original respondent contact information, we attempt to reinterview the original respondent (PI sample household member or proxy household member). If we find that the PI sample address was occupied on the PI date, and the original respondent is a member of the PI sample address, we conduct a Full PI interview with the original respondent.

11.7.   Category 5 – Group 51

If a vacant, a seasonally vacant, or a "not a HU" case with sufficient original respondent contact information was occupied on the PI date, and the original respondent is NOT a member of the PI sample address, we attempt to conduct a Full PI interview with an eligible household member of the PI sample address.

At the point a Category 5 case is set to interview a PI sample household respondent, rather than the original proxy respondent, the case converts from a Group 5 case to a Group 51 case. The reinterview is structured differently, as we will no longer be contacting the original respondent.

11.8.   Category 6 – Group 6

For vacant, seasonally vacant, or "not a HU" cases with insufficient original respondent contact information, we attempt to reinterview a new respondent (PI sample household member or new proxy household member). If we find that the PI sample address was occupied on the PI date, and the new respondent is a member of the PI sample address, we conduct a Full PI interview with the new respondent.

11.9.   Category 6 – Group 61

If a vacant, seasonally vacant, or "not a HU" case with insufficient respondent contact information was occupied on the PI date, and the new respondent is NOT a member of the PI sample address, we conduct a Full PI interview with an eligible household member of the PI sample address.

At the point a Category 6 case is set to interview the PI sample address because the new respondent is not an eligible household member, the case converts from a Group 6 case to a Group 61 case. The reinterview is structured differently, since we are required to contact the PI sample address.

11.10.   Category 7 – Group 7

For a vacant, a seasonally vacant, or a "not a HU" case whose unit status was determined by interviewer observation or respondent type of "Don't Know", we attempt to reinterview a new respondent (PI sample household member or new proxy household member). If we find that the PI sample address was occupied on the PI date, and the new respondent is a member of the PI sample address, we conduct a Full PI interview with the new respondent.

11.11.   Category 7 – Group 71

If a vacant, a seasonally vacant, or a "not an HU" case whose unit status was determined by interviewer observation, was occupied on the PI date, and the new respondent is NOT a member of the PI sample address, we conduct a Full PI interview with an eligible household member of the PI sample address.

At the point a Category 7 case is set to interview the PI sample address because the new respondent is not an eligible household member, the case converts from a Group 7 case to a Group 71 case. The reinterview is structured differently, since we are required to contact the PI sample address.

11.12.   A case in Group 21, 3, 51, 61 or 71, or a case in Group 1, 5, 6 or 7 that requires a Full PI interview, becomes a noninterview after the PI sample household refuses, six attempts to interview the household have been made, or the household is unavailable for an extended period.

11.13.   The case's category (RI_CATEGORY) and updated group number (RI_GROUP) must travel with the case.

12.   Pathing to Person Interview Instrument Screens

12.1.   If a reinterview case requires a Full PI interview, the skip instructions in the PI RI Instrument Specification will lead to either the ROSTER_ADDR1 screen or the ROSTER_REV screen in the PI Instrument Specification. The reinterview case

will then follow the <u>PI Instrument Specification</u> from that screen to the end of module L and then path into PI RI's back section at R_TYPE, R_PHONE or BEST_TIME. At the PI RI's close routine, the PI RI instrument will set the PI outcome code (PI_OUTCOME) according to the coding of OUTCOME in the PI Instrument Specification. The PI RI instrument will then continue with the PI RI's close routine, setting the PI RI outcome code (RI_OUTCOME) and closing the case.

    12.1.1. Appendix C lists the PI RI outcome codes.

    12.1.2. Refer to Attachment A of the PI Instrument Specification for instructions for setting PI outcome codes.

12.2.   When following the PI Instrument Specification, adhere to instructions for question type (Person Based, Topic Based, Household Based), Rosters, Age Calculations, and Date Fills outlined in the Special Instructions in the PI Instrument Specification.

12.3.   ***Note that some of the screen names in the PI RI Instrument Specification are identical to similar screens in the PI Instrument Specification. This should not cause a problem. If the reinterview path leads to either ROSTER_ADDR1 or (ROSTER_REV and PI_SCREENS = 1), proceed with the PI instrument screens, as specified. If not, continue with the RI instrument screens.***

13.   Variables to Empty Based on RI_OUTCOME

Based on the current reinterview outcome code, certain variables need to be emptied or retained using the following rules.

13.1   If the reinterview outcome is 200, use the original version.

13.2   If the reinterview outcome is 201 or 203, send the current version of all fields to HQ.

13.3   If the reinterview outcome is 213, 214, or 219 and is accepted in Supervisory Review, send the current version of all fields to HQ.

13.4   For any reinterview outcome, if a case is reassigned through View/Reassign, send the original version to the reinterviewer.

13.5   If the reinterview outcome is 219 and the case is reassigned through Supervisory Review, send the original version to the reinterviewer.

13.6   If the reinterview outcome is 302 and GATE_TROSTER = 1 and the case is reopened, empty the following fields in the in script:

STARTA	PRX_LOC_ZP5
BYOBS	THANK_YOU
ATTEMPT_TYPE	THANK_YOU_TPH
RI_STARTB_PV	OMB
RI_STARTB_TPH	CALLBACK
VER_RESP	R_TYPE2
INTRO_COMP	LANG_WHICH

R_PHONE	PROBLEM
PRX_LOC_ADD1	CURSTAT
PRX_LOC_ADD2	PI_OUTCOME
PRX_LOC_PO	REASSIGN_FLAG
PRX_LOC_ST	RI_PERCOUNT

13.7   Empty the following fields in the in script if the:
- reinterview outcome is 202 and the case is reopened, or
- reinterview outcome is 302 and GATE_TROSTER = 0, and the case is reopened, or
- reinterview outcome is 213 or 214 and the case is reassigned through Supervisory Review (current version ONLY).

STARTA	MAKE_PV
BYOBS	END_NOW
ATTEMPT_TYPE	R_TYPE
RI_STARTB_PV	R_NAME

Fill Instructions	
Skip Instructions	1: Goto HU_HELP1 2: Goto HU_HELP2 3: Goto HU_HELP3 4: Goto HU_HELP4 5: GO BACK to previous/originating screen
Special Instructions	

Variable Name	**HU_HELP1**	**F1a**
Field Description	Help for Housing Unit	
Universe	(HU_HELP = 1)	
Screen Text	Housing Unit A housing unit (also known as separate living quarters) is one in which: 1) The household members live separately from other person(s) in the building, AND 2) The household members have direct access from the outside of the building OR through a common hall (as in an apartment). If the housing unit is vacant, the criteria of separateness and direct access apply to the intended occupants. Examples: a house, an apartment, a trailer or mobile home, a group of rooms, or a single room. (Also see special rules for empty mobile home sites and moved trailers.) A tent, a cave or even a burned out building, can also be considered to be housing units, if they are OCCUPIED by someone with no other usual residence. A house or an apartment that is used for commercial purposes is not considered to be a housing unit. A model home or model apartment are two examples of this. These units are reported as "Not a housing unit" and "Business" in the instrument. The same is true of a unit used purely for storage purposes. Addresses used as Group Quarters (dormitories, nursing homes, etc.) are not housing units. They are reported as "Not a housing unit" and "Group Quarters" in the instrument.

Variable Name	**HU_HELP2**	**F1b**
Field Description	Help for Vacant	
Universe	(HU_HELP = 2)	
Screen Text	<center>Vacant</center> A vacant unit is any housing unit that was not occupied on the day of the PI. A "Vacant" housing unit is not for seasonal or occasional use and was not occupied on the PI date. A "Seasonal vacant" or "Seasonal occupied" housing unit is for seasonal or occasional use and was either vacant or occupied for less than two months by persons with a usual residence elsewhere on the day of the PI. (Also see rules for empty mobile home sites and moved trailers.)

Variable Name	**HU_HELP3**	**F1c**
Field Description	Help for Usual Residence	
Universe	(HU_HELP = 3)	
Screen Text	Usual Residence A usual residence is defined as the place where an occupant lives and sleeps most of the time. Examples: A live in employee who spends 4 or more nights a week at the employer's residence should be counted as living there. The unit where he spends the other 3 nights is considered to be a "Vacant" and "For occasional use" housing unit, whether or not the employee was in occupancy there on the day of the PI. If a household has more than one home, their usual residence is the one in which they live and sleep the most time. A person's usual residence, as classified by the Census Bureau, does not always agree with what a person considers his usual residence to be. It is not necessarily their voting address, or the address on their driver's license, or any other criteria they might apply. It is the residence where they live and sleep most of the time. The definition of usual residence is important since it can be the factor that can make the difference in a unit being considered to be an occupied unit or a vacant unit. In the case of unusual addresses, such as a tent, it can be the difference between the address being considered to be an occupied housing unit and not a housing unit.

Special Instructions	Refer to Appendix B for the list of PI RI outcome codes (RI_OUTCOME). **RI_CATEGORY**, and the updated values of **COUNT_ATTEMPTS, PV_ATTEMPTS, TPH_ATTEMPTS, COUNT_ATTEMPTS1, RI_GROUP**, **COMPLETE**, **RI_TODO**, **PV_TEL_FLAG, MASTER_PHONE,** and **RI_OUTCOME**, must travel with the case every time it is closed and reopened. In addition, contact person information (name, phone number, and address) and respondent information (name, phone number, and address) must travel with the case every time it is closed and reopened.

Word Fills for Variables

The following list of fills are to be used throughout the instrument where indicated to fill a variable in words.

ORIOUT (*outcome of original PI interview*)

201 - Occupied - Complete interview with household member
208 - Occupied - Complete interview with proxy respondent
203 - Occupied - Partial interview with household member
209 - Occupied - Partial interview with proxy respondent
326 - Vacant - Determined by Landlord, Neighbor, etc.
327 - Vacant - Determined by observation or "Other" respondent type
333 - Housing unit does not exist or not a housing unit - Determined by Landlord, Neighbor, etc.
334 - Housing unit does not exist or not a housing unit - Determined by observation or Don't
         Know or "Other" respondent type
213 - Noninterview - Language problem
218 - Noninterview - Refusal
216 - Noninterview - No knowledgeable respondent
219 - Noninterview - Other

ORIG_ATTEMPT_TYPE (*method for conducting the original PI interview*)

1 - Personal visit with PI household member
2 - Personal visit with proxy respondent
3 - Telephone interview with PI household member
4 - Telephone interview with proxy respondent
5- Confirm PI Sample Address vacant or not HU
6- Quit

ORIG_R_TYPE (*type of original PI respondent*)

1 - Landlord (superintendent, rental office, owner, etc.)
2 - Neighbor
3 - Relative/Caregiver to occupants
4 - Current occupant
5 - Former occupant
6 - Enumerator observation or personal knowledge
7 - Other
9 - Don't Know

Word Fills for Variables (cont)

ORIG_LANG_SPEAK *(language spoken during the original PI interview)*

1-English	19-French	37-Polish
2-Spanish	20-German	38-Portuguese
3-Albanian	21-Greek	39-Romanian
4-Amharic	22-Haitian Creole	40-Russian
5-Arabic	23-Hebrew	41-Serbian
6-Armenian	24-Hindi	42-Somali
7-Bengali	25-Hmong	43-Swahili
8-Bulgarian	26-Hungarian	44-Tagalog
9-Burmese	27-Ilocano	45-Thai
10-Cambodian	28-Italian	46-Tigrinya
11- Chinese, Simplified	29-Japanese	47-Turkish
12- Chinese, Traditional	30-Korean	48-Ukranian
13-Croatian	31-Laotian	49-Urdu
14-Czech	32-Lithuanian	50-Vietnamese
15-Dari	33-Malayalam	51-Yiddish
16-Dinka	34-Navajo	52-No language problem - Return to previous screen
17-Dutch	35-Nepali	99 - Don't Know
18-Farsi	36-Panjabi	98 - Refused

ORIG_SEX (*sex of the original PI household respondent*)

1 - Male
2 - Female
9 - Don't Know
8 - Refused

ORIG_BEST_TIME (*best time to contact original respondent*)

1 – Day
2 – Evening
3- Either
9 - Don't Know
8 - Refused

Word Fills for Variables (cont)

ORIG_RELATION1 (*relationship of original respondent to the first person listed on the roster in a multi person household during a personal visit PI interview*)

1-Husband or wife
2-Biological son or daughter
3- Adopted son or daughter
4- Stepson or stepdaughter
5-Brother or sister
6-Father or mother
7-Grandchild
8-Parent-in-law
9-Son-in-law or daughter-in-law
10-Other relative
11-Roomer or boarder
12-Housemate or roommate
13-Unmarried partner
14-Other nonrelative
99 - Don't Know
98 - Refused

ORIG_RELATION2 (*relationship of original respondent to the first person listed on the roster in a multi person household during a telephone PI interview*)

1-Husband or wife
2-Son or daughter
3- Brother or sister
4- Father or mother
5-Grandchild
6-Parent-in-law
7-Son-in-law or daughter-in-law
8-Other relative
9-Roomer or boarder
10-Housemate or roommate
11-Unmarried partner
12-Other nonrelative
99 - Don't Know
98 - Refused

Word Fills for Variables (cont)

RI_OUTCOME (*outcome of reinterview attempts*)

302- Open case for Full Person Interview
201 - Complete Reinterview
203 - Sufficient Partial Reinterview
213 - Type A - Language Problem - Reassign
214 - Reinterview Noninterview to Reassign for Personal Visit
219 - Type A - Reinterview Noninterview
202 - Open Case for Reinterview
200 - Unopened Case

PI RI Frequently Asked Questions

1. How long will this take?
2. Why are you calling me again?
3. Are you calling everyone, or am I just lucky?
4. Don't you have anything better to do with my tax dollars?
5. I'm too busy to answer your questions again.
6. Are you checking up on me? I told you the truth the first time you were here.
7   Return to reinterview

**(RI_FAQ1) (*How long will this take?)*
These interviews average about 5-10 minutes.

**(RI_FAQ2) (*Why are you calling me again?)*
We're interested in maintaining the quality of our product, so we
reinterview a few households who are in the survey to make sure we're collecting data
efficiently and accurately.

**(RI_FAQ3) (*Are you calling everyone, or am I just lucky?)*
We can get a reliable measure of data quality by reinterviewing only a small percentage of the
total households interviewed in the survey.

**(RI_FAQ4) (*Don't you have anything better to do with my tax dollars?)*
Actually, it could save money. By law, we have to conduct a census every ten years. What we
learn from the 2010 Census will help us improve the coverage of subsequent censuses.

**(RI_FAQ5) *(I'm too busy to answer your questions.)*
The questions I have today are different, and I hope not to take up very much time.
We really appreciate your help.

**(RI_FAQ6) (*Are you checking up on me? I told you the truth the first time you were here.)*
The purpose of reinterview is not to check up on respondents. To make sure we are collecting
data efficiently and accurately, we reinterview a few households who are in the survey.

The response options for each Reinterview FAQ answer are:
1. Return to reinterview
2. Return to FAQs_RI

PI RI Outcome Codes – RI_OUTCOME

302 - Open case for Full PI
  Case stays on laptop unless reassigned.

201 - Completed RI
  Case transmitted and checked in

203 – Sufficient Partial
  Case transmitted and checked in

214 – Type A - Reassign to PV
  Case transmitted to supervisory review.

219 – Type A - RI Noninterview
  Case transmitted to supervisory review.

202 - Open Case for RI
  Case stays on laptop unless reassigned.

200 - New Case, not started
  Case stays on laptop unless reassigned

213 – Type A – Language Problem - Reassign
  Case transmitted to supervisory review.
