

The National Public Health Initiative on Diabetes and Women's Health

Introduction

The National Public Health Initiative on Diabetes on Diabetes and Women's Health (Initiative)—co-sponsored by the American Association of Diabetes Educators (AADE), the American Diabetes Association (ADA), the American Public Health Association (APHA), the Association of State and Territorial Health Officials (ASTHO), and the Centers for Disease Control and Prevention (CDC)—has released objectives which focus on the needs of women with and at risk for diabetes. The intent of these objectives is to develop measurable indicators that can be used to evaluate the impact of the Initiative.

These objectives were developed based on input from previous working meetings with co-sponsors and partners of the Initiative. Partners is defined as organizations which have expressed interest in diabetes and women's health and has had some interaction with the National Public Health Initiative on Diabetes and Women's Health through collaborations, working meetings, and communication.

The Co-Sponsors of the Initiative are interested in developing a report to highlight the work that co-Sponsors and partners are doing to address diabetes and women's health issues.

Participation in the survey is voluntary. It will take only about 30 minutes of your time. You do not have to answer every question and can skip those that you do not feel comfortable answering. Your individual responses will not be linkable to any information that identifies you.

Instructions

In this electronic survey, there are 16 objectives listed within six categories: Community Health, State Programs, Education and Community Outreach,

Quality Care, Research, and Surveillance.

Public reporting burden of this collection of information is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC Reports Clearance Officer, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-XXXX)

Respondents to this survey should only respond to objectives that focus on work that your organization has completed or is in the process of completing. Respondents do not have to complete a response for all 16 objectives.

Help us understand who benefits from your organization and its mission. Please select the appropriate demographic information.

Organization

Name of organization: _____

Why type of organization to you represent?

- Non-Profit
- Corporate
- Government
- Other (Specify): _____

What size is your organization?

- Less than 100 members
- 100-200 members
- 201-301 members
- 302+ members

How many members has your organization delegated to assist in completing the National Public Health Initiative on Diabetes and Women’s Health objectives?

- None
- Less than 5 members
- 6-12 members
- 13-19 members
- 20+ members

Does your organization serve:

- Men
- Women
- Both

How is your organization funded?

Community

Please describe the type of community you serve:

The type(s) of community my team (those delegated to assist in the completing the objectives) serves:

- Rural
- Urban
- Both Rural and Urban

The communities we serve, in relations to the United States, are located in the (check all that apply)

- North
- North East
- North West
- Central
- Mid-West
- South
- South East
- South West
- International

What age range does your organization serves: (Check all that apply)

- 10-17
- 18-44
- 45-64
- 65+

What ethnicity does your organization serves: (Check all that apply)

- African-American/African Ancestry
- Hispanic/Latino
- Caucasian
- Asian/Pacific Islander
- American Native/Alaska Native
- Other

This survey will only generate questions specifically related to objectives that are achieved or in process. Please indicate below what objectives your organization has completed or is in the process of completing. By indicating the objectives your organization has completed or is working on, this will allow the survey to provide additional questions related to those objectives. Please mark “Achieved” if you have completed the specific objective. Mark “In Process” if the objective has not been achieved, but will be 2010. Mark “No” if your organization does not have intentions on fulfilling the specified objective

Objective Description	Achieved	In Process	No
Community A1. By 2010, <i>Co-sponsors of the Initiative and Partner Organizations</i> (Partners) will develop talking points for at least one article in magazines and/or newsletters about diabetes prevention and control.			
Community A2. By 2010, <i>Co-sponsors and Partner Organizations</i> will use the NDEP gestational diabetes (GDM) Tip Sheet in Community-based state-based activities to educate women about diabetes prevention and control.			
Community A3. By September 2006, <i>Co-sponsors</i> will develop an Internet spotlight paragraph to place on CDC’s Division of Diabetes Translation’s Web site and annually link to the “Take a Loved One for a Check-up Day” campaign highlighting the importance of obtaining regular health care.			
Community A4. By 2010, <i>Co-sponsors and Partner Organizations</i> will conduct at least one training program on the use of NDEP products and tools which emphasize how to prevent and control diabetes for women.			
Community A5. By 2010, <i>Co-sponsors and Partner Organizations</i> will collaborate with at least two faith-based initiatives for the prevention of diabetes in at risk women who live in rural areas.			
State Program B3. By 2006, the <i>Co-sponsors</i> will identify and provide at least three venues for DPCPs to access information on women’s health and diabetes (or about the National Public Health Initiative on Diabetes and Women’s Health).			
State Program B4. By 2006, the <i>Co-sponsors</i> will identify or develop at least two resources (e.g., monograph, fact sheets) to help DPCPs develop programs that address the health issue concerns of women with diabetes.			
Community and Education C1. <i>Co-sponsors of the Initiative</i> will develop at least one success story annually on diabetes and women’s health across the life stages to educate the public about diabetes and women’s health.			
Community and Education C2. At least twice a year, <i>Co-sponsors</i> (ADA, APHA) will provide partners with a Federal Legislative Update on Congressional activities related to women and diabetes.			

Quality Care D1. By 2010, <i>Co-sponsors</i> will update their respective Web sites quarterly to highlight upcoming conferences on women’s health and diabetes.			
Quality Care D2. By 2010 Date, <i>Co-sponsors</i> will identify and provide partners with two multidisciplinary evidence-based resources (i.e., guidelines) to educate health care professionals about risk assessment and quality care for women with diabetes.			
Quality Care D3. By 2010, <i>Co-sponsors</i> will report key factors and recommendations associated with quality of care for women with diabetes who live in rural areas to be used by health care professionals.			
Research E2. By 2010, <i>Co-sponsors and Partner Organizations</i> will disseminate research findings on diabetes and women’s health in at least one Web-based report, one peer-reviewed publication, or one conference.			
Research E4. By 2010, <i>Co-sponsors and Partner Organizations</i> will collaborate with at least two population-based programs to establish ongoing research to identify the unique needs of women with and at risk for diabetes in different life stages.			
Research E5. By 2012, <i>Co-sponsors and Partner Federal Agencies</i> will develop and advertise at least one FOA to encourage research to develop models of preventive health care to women with and at risk for diabetes in different life stages. ¹			
Surveillance F1. By 2010, <i>Co-sponsors</i> will establish interagency agreements with partners to identify population-based surveillance programs to conduct surveillance of women with and at risk for diabetes.			
Surveillance F2. By 2010, <i>Partnering Federal Agencies and CDC</i> will develop a system to assess and monitor the usage of evidence-based recommendations at the patient, provider, and health systems levels in DHHS programs for women with and at risk for diabetes.			

¹ Model is defined as: “A conceptual basis for how a program or evaluation is supposed to work, explaining key factors and variables.” Modeste NN. Dictionary of Public Health Promotion and Education: Terms and Concepts. Thousand Oaks: Sage Publications.

Community Health

A1. By 2010, Co-sponsors of the Initiative and Partner Organizations (Partners) will develop at least one article in magazines and/or newsletters about diabetes prevention and control.

Please check all that apply.

Articles were developed for:

- Magazine(s)
- Newsletter(s)
- Both

How many magazine articles were developed?

- 0
- 1-2
- 3-4
- 5+

Who was the article developed for?
(Insert Life stages)

- 10-17
- 18-44
- 45-64
- 65+

How many newsletter articles were developed?

- 0
- 1-2
- 3-4
- 5+

Please list the publication(s):

N/A

- Describe **one** activity developed: (maximum 50 words.)

N/A

- State the goal of this project.

- **What agencies served as lead for this project?**
