

ACTION: 30-Day notice and request for comments; Extension of an existing information collection: 1651-0081.

SUMMARY: U.S. Customs and Border Protection (CBP) of the Department of Homeland Security has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act: Delivery Ticket (Form 6043). This is a proposed extension of an information collection that was previously approved. CBP is proposing that this information collection be extended with no change to the burden hours. This document is published to obtain comments from the public and affected agencies. This proposed information collection was previously published in the **Federal Register** (74 FR 51163) on October 5, 2009, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.10.

DATES: Written comments should be received on or before January 6, 2010.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the OMB Desk Officer for Customs and Border Protection, Department of Homeland Security, and sent via electronic mail to oir_submission@omb.eop.gov or faxed to (202) 395-5806.

SUPPLEMENTARY INFORMATION: U.S. Customs and Border Protection (CBP) encourages the general public and affected Federal agencies to submit written comments and suggestions on proposed and/or continuing information collection requests pursuant to the Paperwork Reduction Act (Pub. L. 104-13). Your comments should address one of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency/component, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's/component's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collections of information on those who

are to respond, including the use of appropriate automated, electronic, mechanical, or other technological techniques or other forms of information.

Notice of Issuance of Final Determination Concerning Multifunctional Machines

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Notice of final determination.

SUMMARY: This document provides notice that U.S. Customs and Border Protection ("CBP") has issued a final determination concerning the country of origin of certain multifunctional machines which may be offered to the United States Government under a government procurement contract. Based upon the facts presented, in the final determination CBP concluded that Japan is the country of origin of the multifunctional machines for purposes of U.S. Government procurement.

DATES: The final determination was issued on November 30, 2009. A copy of the final determination is attached. Any party-at-interest, as defined in 19 CFR 177.22(d), may seek judicial review

of this final determination within January 6, 2010.

FOR FURTHER INFORMATION CONTACT:

Karen S. Greene, Valuation and Special Programs Branch, Regulations and Rulings, Office of International Trade (202-325-0041).

SUPPLEMENTARY INFORMATION: Notice is hereby given that on, pursuant to subpart B of part 177, Customs Regulations (19 CFR part 177, subpart B), CBP issued a final determination concerning the country of origin of certain multifunctional machines which may be offered to the United States Government under a government procurement contract. This final determination, in HQ H039955, was issued at the request of Sharp Electronics Corporation under procedures set forth at 19 CFR part 177, subpart B, which implements Title III of the Trade Agreements Act of 1979, as amended (19 U.S.C. 2511-18). In the final determination, CBP concluded that, based upon the facts presented, certain articles will be substantially transformed in Japan. Therefore, CBP found that Japan is the country of origin of the finished articles for purposes of U.S. Government procurement.

Section 177.29, Customs Regulations (19 CFR 177.29), provides that notice of final determinations shall be published in the **Federal Register** within 60 days of the date the final determination is issued. Section 177.30, CBP Regulations (19 CFR 177.30), provides that any party-at-interest, as defined in 19 CFR 177.22(d), may seek judicial review of a final determination within 30 days of publication of such determination in the **Federal Register**.

Dated: December 2, 2009.

Re: U.S. Government Procurement; Title III, Trade Agreements Act of 1979; Country of Origin of Multifunctional Printer Machines; substantial transformation

Dear Mr. Baumgartner:

This is in response to your letter, dated November 26, 2007, requesting a final determination on behalf of Sharp Electronics Corporation ("Sharp") pursuant to subpart B of 19 CFR Part 177. We apologize for the delay in our response.

Under these regulations, which implement Title III of the Trade Agreements Act of 1979,

as amended (19 U.S.C. 2511 et seq.) ("TAA"), CBP issues country of origin advisory rulings and final determinations as to whether an article is or would be a product of a designated country or instrumentality for the purposes of granting waivers of certain "Buy American" restrictions in U.S. law or practice for products offered for sale to the U.S. Government.

This final determination concerns the country of origin of certain multifunctional printer machines that Sharp may sell to the U.S. Government. We note that Sharp is a party-at-interest within the meaning of 19 CFR 177.22(d)(1) and is entitled to request this final determination. A conference was held on this matter at Headquarters on August 25, 2008.

FACTS:

This case involves the Sharp Dragon II J-models (Sharp model # MX-M550N/UJ, MX-M620N/UJ, and MX-M700N/UJ). These models have monochrome copying, printing, faxing and duplex scanning functions.

Sharp Corporation, Sharp's parent company ("Sharp Japan") developed the Dragon II J-models in Japan, including the engineering, development, design and art work processes. The production of the Dragon II J-Models begins with the preparation of the key subassemblies and units. According to your submission, there are 11 main subassemblies that compose the Dragon II J-models. Of the eleven subassemblies that compose the Dragon II J-Models, only the drum unit subassembly is assembled in Japan. The remaining 10 subassemblies are assembled in China with parts from Japan and China. The final assembly of the merchandise is performed in Japan.

The Subassemblies Assembled in China

According to your submission, the subassemblies which are themselves assembled in China are essentially as follows:

The laser scanning unit ("LSU") creates text or images on the photoconductor drum. It consists of a housing, synchronous lens, two cylindrical lenses, and asynchronous lower lens.

The transfer belt unit transfers the image created on the drum onto the surface of the paper for printing.

The multifunctional printer cabinet subassembly is comprised of the mechanical frame for the printer engine along with exterior panels, paper transport and exit components, paper driver motors, cooling fans and filters, sensors and switches for detecting paper and whether doors are open or closed, the paper manual feed unit, the toner supply motors and sensors, paper transport motors and sensors, the duplex section, the toner image transfer section, the image scanner section and the operation panel.

The main charger unit subassembly charges the surface of the drum evenly by application of high voltage so that it can form electrostatic images when irradiated by laser beams.

The process unit subassembly houses the drum used for creating images. The drum is produced and installed in China.

The developer unit is used to transfer toner evenly over the latent image created on the
