**IEPS SYSTEM REQUIRED
SCREENS**

IEPS SYSTEM REQUIRED SCREENS

This spreadsheet outlines the screens in the proposed IEPS system which are required for specific types of reports: the non-competed continuation report (NCC), the interim report, and the final report. The spreadsheet indicates when information is to be entered (i.e. on which report) and whether or not it is required. For the purposes of this spreadsheet, any report submitted in the spring is considered an NCC report. Reports submitted in the fall or winter are interim reports, and the final reports are submitted within 90 days of the grant's end date. Where **UPD** appears in a cell, the screen displays information entered on the previous report, and allows for updates to be added to the existing information.

Screens not tied to a particular report are not included below. The Project Information screen is completed by project directors when the grant is set up in the IEPS system. It is updateable when needed. Project directors may also use the Additional Users and the Travel Approval Request screens on an as needed basis. Project directors, fellows, and participants may all use the Update Password screen when needed. The Travel to U.S. and Travel from U.S. screens are not included, as these are being phased out and replaced by the Travel Approval Request. Additionally, directors for DDRA, FLAS, FRA, GPA and SA have Fellow/Participant Administration screens which are completed as needed and not included below.

For DDRA and FRA, the pre-fellowship report information is included under the interim report columns. The post-fellowship report information is included under the final report columns. For GPA and SA, the pre-seminar report information is included under the interim report columns, and the post-seminar report information is included under the final report columns.
