Form 477 Submission for FRN: 16114100, Company: Test 011 Corporation Domestic Business, State: AL, Operations: ILEC , Data As of: Dec 31, 2008

Part I.A: Broadband - Terrestrial Fixed Wireless

In Part I.A, report connections (wireless "channels") to end users that you (including affiliates) equipped to enable the end user to receive information from and/or send information to the Internet at information transfer rates exceeding 200 kbps in at least one direction. Report only in-service connections. The end user's Internet access service may be provided by you (including affiliates) or by an unaffiliated entity. For purposes of Part I.A, Internet Service Providers (ISPs) are not end users. Categorize the connection based on the technology employed by the part of the connection that terminates at the end user location. (Do not report anywhere in Form 477 any high-capacity connections between two locations of the same end user customer, ISP or communications carrier.)

Notes specific to Terrestrial Fixed Wireless: (1) Those entities that use unlicensed devices to provide broadband Internet access connections to dispersed, fixed end user premises locations must report those subscribers in this category. By contrast, entities that use unlicensed devices to provide a commercial broadband Internet access service that can be received at any location within a service footprint must report those subscribers in the Terrestrial Mobile Wireless category. (2) For purposes of question (2), connections provided by unlicensed devices are "equipped over your own local loop facilities or the equivalent." (3) Do not report "Wi-Fi" and other wireless Ethernet, or wireless local area network, applications that only enable local distribution and sharing of a premises broadband facility.

Break down the total connections reported in (1) to show the number in each of the following speed tiers.

Connections reported in **EACH** data cell below must equal the sum of Terrestrial Fixed Wireless connections reported in Part VI by Census Tract, for that download/upload combination, and the sum of **ALL** data cells below must equal the total connections reported in (1).

OMB NO: xxxx-xxxx

Form 477 Submission for FRN: 16114100, Company: Test 011 Corporation Domestic Business, State: AL, Operations: ILEC , Data As of: Dec 31, 2008

Part I.A: Broadband - All Other

In Part I.A, report connections (wired "lines" or wireless "channels") to end users that you (including affiliates) equipped to enable the end user to receive information from and/or send information to the Internet at information transfer rates exceeding 200 kbps in at least one direction. Report only in-service connections. The end user's Internet access service may be provided by you (including affiliates) or by an unaffiliated entity. For purposes of Part I.A, Internet Service Providers (ISPs) are not end users. Categorize the connection based on the technology employed by the part of the connection that terminates at the end user location. (Do not report anywhere in Form 477 any high-capacity connections between two locations of the same end user customer, ISP or communications carrier.)

Notes specific to All Other: Ethernet over fiber should be reported in the Optical Carrier category, and Ethernet over copper should be reported in the Other Wireline category.

Break down the total connections reported in (1) to show the number in each of the following speed tiers.

Connections reported in **EACH** data cell below must equal the sum of All Other connections reported in Part VI by Census Tract, for that download/upload combination, and the sum of **ALL** data cells below must equal the total connections reported in (1).

Part I.B: Broadband - xDSL (asymmetric or symmetric)

Complete Part I.B for xDSL (asymmetric or symmetric) ONLY IF you are an ILEC (or an affiliate of an ILEC) that was required to complete Part I.A for Asymmetric xDSL and/or Part I.A for Symmetric xDSL.

For the purposes of completing Part I.B for xDSL (asymmetric or symmetric):

(1) "Residential end user premises" include residential living units, individual living units in such institutional settings as college dormitories and nursing homes, and other end user locations to which you (including affiliates and agents) market services that are primarily designed for residential use.

(2) The "service area" of an ILEC consists of those residential end user premises to which the ILEC can deliver telephone service over local loop facilities (or the fixed-wireless last mile equivalent) that it owns.

I.B. Report your best estimate of the percentage of residential end user premises in your service area, in this state, to which your DSL connections (with information transfer rates exceeding 200 kbps in at least one direction) could be provided using installed distribution facilities. Providers of xDSL connections should base responses on the service area of the affiliated ILECs.

(a) Estimated % of residential end user premises

THIS IS THE END OF PART I.B for xDSL (asymmetric and symmetric).

Part I.B: Broadband - Cable Modem

Complete Part I.B for Cable Modem ONLY IF you are a cable system (or an affiliate of a cable system) that is required to complete Part I.A for Cable Modem.

For the purposes of completing Part I.B for Cable Modem:

(1) "Residential end user premises" include residential living units, individual living units in such institutional settings as college dormitories and nursing homes, and other end user locations to which you (including affiliates and agents) market services that are primarily designed for residential use.

(2) The "service area" of a cable system consists of those residential end user premises to which the system can deliver cable television service over cable plant that it owns.

I.B. Report your best estimate of the percentage of residential end user premises in your service area, in this state, to which your Cable Modem connections (with information transfer rates exceeding 200 kbps in at least one direction) could be provided using installed distribution facilities. Providers of Cable Modem connections should base responses on the service area of the affiliated cable systems.

(a) Estimated % of residential end user premises

THIS IS THE END OF Part I.B for Cable Modem.

Part I.B: Broadband - Terrestrial Mobile Wireless

Complete Part I.B for Terrestrial Mobile Wireless ONLY IF you (including affiliates) are required to complete Part I.A for Terrestrial Mobile Wireless.

Report the number of business and residential subscribers whose mobile devices are capable of sending or receiving data at information transfer rates exceeding 200 kbps in at least one direction.

(a) Subscribers with devices capable of sending or receiving data at information transfer rates exceeding 200 kbps in at least one direction

I.B. Number of subscribers.

THIS IS THE END OF Part I.B for Terrestrial Mobile Wireless.

OMB NO: xxxx-xxxx

Form 477 Submission for FRN: 16114100, Company: Test 011 Corporation Domestic Business, State: ID, Operations: Non-ILEC , Data as of: Dec 31, 2008

You can submit census tract data in one or more upload files. To process multiple files, run the upload function for each file. The file(s) must be a comma delimited file with one row per census tract / upload rate / download rate / technology combination. Individual upload files must contain not more than **100,000 rows.**

As the upload function runs, you can monitor the progress in your browser. Leave your browser open and do not open other pages in the browser tab or session as the upload proceeds. The process may take some time for larger data sets.

Census Tract Data File Upload

File to
upload:

Replace all Census Tract information for this submission with the data in
File this file.

upload **Merge** this Census Tract information with the existing data for this
type: submission.

Append this Census Tract to the existing data for this submission.

Error
Messages: **On*** **Off**

* The Error Messages option is much slower to process and is not recommended for large data sets.

All fields are required except "Technology Code Other". The format for the upload file is as follows:

Position	Value	Data Type	Description
1	County FIPS	Integer 3 digit	County FIPS Code (see reference table below). The County is a part of the Census Tract definition.
2	Census Tract	Decimal number. Up to four digits before the decimal, up to two digits after.	Census Tract value. Census tracts are represented as numbers with a decimal, such as "3042.00".

3	Upload Rate	Integer	Upload Rate as defined in the "Rates" table detailed below.
4	Download Rate	Integer	Download Rate as defined in the "Rates" table detailed below.
5	Technology Code	Integer	Technology Code as defined in the table below. Note that the values and percentages for "Terrestrial Mobile Wireless" Technology will behave differently than all other technologies. For the purpose of this data upload, when compiling your file for submission, assign "Percentage Residential" of 100% and value of "1" for any census tracts containing data for "Terrestrial Mobile Wireless".
6	Technology Code Other	Integer or empty	This is for Technology Types which do not exist in the assigned list of Technologies. Note that "Ethernet" is not a valid "Other" technology code. If you use Technology Code Other, then the value for "Technology Code" <u>must</u> be '0' (numeric zero). Leave this field blank for the standard technology codes.
7	Number of Connections	Integer	Number of connections in this census tract for this combination of technology code, upload rate, download rate.
8	Percentage Residential	Number between 0 and 100. Three decimal places	The percentage of connections for this combination of technology code, upload rate, download rate which are "Residential". The format for percentage data input is "XXX.XXX". For example, if 1/2 of the connections in a census tract are residential, enter "50" or "50.000" for this value. "0.50" will be translated as one half of one percent.

Do not include a title row at the top of the file. Each data row is defined by the end of the line, so be sure to include a "return" or "end of line" after the last record, or the last record will not be imported. The file should look approximately like this:

```

5,51302,1,2,1,,46,9.000
5,513.02,2,2,1,,97,97.000
5,513.02,3,2,1,,79,9.000

5,513.02,8,2,1,,18,48.000
5,513.02,1,3,1,,6,44.000
5,513.02,2,3,1,,979,79.000
5,513.02,3,3,1,,49,49.000

5,513.02,6,3,1,,46,46.000
5,513.02,7,3,1,,8,19.000

```

For symmetric connections "Symmetric xDSL" and "Other Wireline", the upload and download rates should always be the same.

For "Terrestrial Mobile Wireless" the value and percentage fields will always be 1 and 100%, as in this example:

```

119,400904,1,2,8,,1,100
119,4009.04,1,3,8,,1,100
