The Department of Commerce's (DOC) Administrative Order implementing the National Environmental Policy Act (NEPA) of 1969, (as amended), require environmental data or documentation to assist DOC in carrying out its responsibilities under NEPA. Therefore, it is necessary for the applicant to provide DOC with sufficient information concerning their proposed activity. Based on an environmental evaluation conducted at the project proposal phase, DOC will determine the appropriate level of environmental review. DOC will determine whether an environmental assessment or an environmental impact statement is necessary for the proposed activity or whether the activity can be categorically excluded from additional NEPA review.

Environmental Questionnaire & Checklist

Instructions:

---

The checklist is divided into two sections. Section 1 is for those projects that have historically shown no adverse impacts to the human or natural environment. These projects consist solely of administrative actions, personnel activities, or minor procurement activities. Grants involving the purchase of computers or software going into existing facilities; issuance of fellowships, training or meeting facilitation in existing structures; printing of informational materials or brochures; the hiring of Census takers; and minor interior renovations are suggested to use this section. If the project falls into the one of the categories listed in Section 1, then you do not need to complete Section 2.

Section 2 is for those projects requiring ground disturbance of any kind, building of facilities, installations, or structures; and any project with the potential to significantly impact the human or natural environment.

For Section 2, complete the following checklists based upon your knowledge of the proposed project site and immediate vicinity. If you are “unable to determine” the potential effect on a described resource, efforts should be undertaken to acquire available information on the resource or the effect of the project on the resource. If the proposal is determined to have an effect (checked “yes”) or the preparer is unable to determine if the proposal will have an effect (checked “unable to determine”), the project might be subject to further environmental review, notwithstanding other determinations under state environmental review laws and regulations.

If the proposal is determined to have no environmental effect (checked “no”), the project may qualify for a categorical exclusion (CE) from further environmental review. DOC is ultimately responsible for determining if the proposal qualifies for a CE. If all elements of the proposed project do not conform to the identified CE's (published in the Federal Register on July 10, 2009), an Environmental Assessment (EA) or an Environmental Impact Statement (EIS) may be required prior to funding and/or initiation of the project. Prior environmental reviews may satisfy EA/EIS requirements. Enclose copies of such environmental review reports, including decision documents and evidence of public involvement with this form.

SECTION 2

To be completed for those projects involving ground disturbance or potential to significantly impact the human or natural environment. Please answer the following questions:

---

1. Are the personnel preparing this form familiar with the site?

---

2. List the names of those who conducted the site visit(s):

---

3. List the date(s) of the site visit(s):

---

4. Has consultation with all affected agencies or tribes been completed?

---

5. Provide a description of all the coordination with other agencies and affected Indian tribes incorporated into planning this project and evaluating possible environmental impacts (or attach equivalent information. If none, so state):
