Subject: public comment on federal register - this program is a figment of writers imagination

this program does not exist for wmen of limited means at all. this alleged program is a figment of the imagination. certainly this nation's low income women dont get health help at all. this is propaganda so some fat bureacrat can sit at a desk in corrupt washington dc and haul in a big salary for collecting statistics that initiate no action at all. this is a wasteful program accomplishing absolutely nothing. shut it down. fire the do nothing employees and sunset this collection. this collectin has been going on for 30 years and has helped american women NOT AT ALL. we do know heart disease and stroke is an issue, but this colleciton of information has meant no action has been taken at all. so it is a waste.
