SURVEYOR SUMMARY: Based on the reviews of the patients from this HHA, including all information surveyed in the standard survey and using the Functional Assessment Instrument (FAI), this HHA:

- 1. Provides care that promotes a high potential for reaching the highest attainable levels of functioning for its patients. There is no evidence of need for a partial extended or extended survey.
- 2. Provides care that promotes a moderate potential for reaching the highest level of functioning for some but not all of its patients. There are standard level deficiencies and need for a partial extended survey. If no Conditions of Participation are out of compliance, a Plan of Correction will be requested for the standard level of deficiencies.
- 3. Provides substandard care. There are condition level deficiencies in one or more Conditions of Participation. There is an immediate need for an extended survey.
