Proposed Information Collection; OMB Control Number 1018-0124; Alaska Migratory Bird Subsistence Harvest Household Survey

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (Fish and Wildlife Service, Service) will ask the Office of Management and Budget (OMB) to approve the information collection (IC) described below. As required by the Paperwork Reduction Act of 1995 and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this IC. This IC is scheduled to expire on January 31, 2010. We may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Your comments must be received by September 4, 2009.

ADDRESSES: Send your comments on the IC to Hope Grey, Information Collection Clearance Officer, Fish and Wildlife Service, MS 222-ARLSQ, 4401 North Fairfax Drive, Arlington, VA 22203 (mail); or *hope_grey@fws.gov* (e-mail).

SUPPLEMENTARY INFORMATION:

I. Abstract

The Migratory Bird Treaty Act (16 U.S.C. 703-712) and the Fish and Wildlife Act of 1956 (16 U.S.C. 742d) designate the Department of the Interior as the key agency responsible for managing migratory bird populations that frequent the United States and for setting harvest regulations that allow for the conservation of those populations. These responsibilities include gathering accurate geographical and temporal data on various characteristics of migratory bird harvest. We use harvest data to issue harvest regulations, and we adjust the regulations as needed to provide maximum subsistence harvest opportunity while keeping migratory bird populations at desired and sustainable levels.

The Migratory Bird Treaty Act Protocol Amendment (1995) (Amendment) provides for the customary and traditional use of migratory birds and their eggs for subsistence use by indigenous inhabitants of Alaska. The Amendment states that its intent is not to cause significant increases in the take of species of migratory birds relative to their continental population sizes. A submittal letter from the Department of State to the White House (May 20, 1996) accompanied the Amendment and specified the need for harvest monitoring. The submittal letter stated that the Service, the Alaska Department of Fish and Game (ADFG), and Alaska Native organizations would collect harvest information cooperatively within the subsistence eligible areas. Harvest survey data help to ensure that customary and traditional subsistence uses of migratory birds and their eggs by indigenous inhabitants of Alaska do not significantly increase the take of species of migratory birds relative to their continental population sizes.

Between 1989 and 2004, we monitored subsistence harvest of migratory birds using annual household surveys in the Yukon-Kuskokwim Delta, which is the region of highest subsistence bird harvest in the State of Alaska. In 2004, we began monitoring subsistence harvest of migratory birds in subsistence eligible areas Statewide. The Statewide harvest assessment program allows tracking significant trends and changes in levels of harvest and user participation. The harvest assessment program relies on

collaboration among the Service, the ADFG, and a number of Alaska Native organizations.

We gather information on the annual subsistence harvest of 54 bird species (ducks, geese, swans, cranes, upland game birds, seabirds, shorebirds, and grebes and loons) in the subsistence eligible areas of Alaska. The survey covers 10 regions of Alaska, which are further divided in 29 subregions. We survey the regions and villages in a rotation schedule to accommodate budget constraints and to minimize respondent burden. The survey covers spring, summer, and fall harvest in most regions.

In collaboration with Alaska Native organizations, we hire local resident surveyors to collect the harvest information. The surveyors list all households in the villages to be surveyed and provide survey information and harvest report forms to randomly selected households that have agreed to participate in the survey. To ensure confidentiality of harvest information, we identify households by a numeric code. The surveyor visits households three times during the survey year. At the first household visit, the surveyor explains the survey purposes and invites household participation. The surveyor returns at the end of harvest seasons to help the household complete the harvest report form.

We have revised the survey methods to streamline procedures and reduce respondent burden. We plan to use two forms for household participation:

(1) FWS Form 3-2380 (Tracking Sheet and Household Consent). The surveyor visits each household selected to participate in the survey to provide information on the objectives and to obtain household consent to participate. The surveyor uses this form to record consent and track subsequent visits for completion of harvest reports

(2) FWS Form 3-2381 (Harvest Report). This form has drawings of bird species most commonly available for harvest in the different regions of Alaska with fields for writing down the numbers of birds and eggs taken. There are four versions of this form: Interior Alaska, North Slope, Southern Coastal Alaska, and West/South-Central Alaska. This form has a page for each season surveyed, and, on each page, there are fields for the household code, community name, harvest year, date of completion, and comments.

II. Data

OMB Control Number: 1018-0124.

Title: Alaska Migratory Bird Subsistence Harvest Household Survey.
Service Form Number(s): 3-2380 and 3-2381.

Type of Request: Revision of a currently approved collection.
