

Participants Wanted for Research Study

The National Center for Health Statistics is looking for adults aged 18 years and over who have ever thought about giving blood, have been deferred from giving blood for any reason, or who have successfully given blood in the past, to test questions that are asked of potential blood donors before they donate such as, medical history, sexual history, current medications, and travel history. The survey research interview will be no longer than 60 minutes and participants will receive \$50.

Attachment 2b. Blood Donor flyer distributed at blood donation centers and staff at blood donation centers

For respondents recruited through staff at blood donation centers: staff would read the following text to the individual, *“You may be eligible to participate in a research study [today/on specified date] if you would like to do so. Researchers from the National Center for Health Statistics are here [today/date] testing survey questions on the blood donor history questionnaire. You are under no obligation to do this. If you are interested or would like more information, researchers from the National Center for Health Statistics are available to answer your questions as well as to determine your eligibility for the study. Individuals who express interest in participating will meet with a QDRL interviewer who will explain the project in more detail. Interviews will be conducted after the individual has either donated blood or they have been deferred.*
