Re: **Pro00004020**
Study entitled: *Longitudinal Study of Attention Deficit Hyperactivity Disorder*

Dear Dr. McKeown:

The University of South Carolina Institutional Review Board (IRB) approved Amendment **Ame1_Pro00004020** by Expedited review on **5/5/2010**.

Brief description of changes:

Data collection for Wave 4 and 5 constitutes a program change due to the revision of the data collection procedures and instruments for the youth participants who have reached high school age. This amendment includes new and modified data collection instruments and a modified incentive structure. A new consent form for 18 year old and older participants has been added and previous consent document for the parent consent for 9-17 year olds and the child assent form for 9-17 year olds have been modified.

Note: Approved consent document(s), if applicable, are located under the "Stamped ICF" tab on the Study Workspace screen in eIRB.

If you have questions concerning the IRB approval process, please contact Arlene McWhorter at arlenem@mailbox.sc.edu or (803) 777-7095.

Sincerely,

Thomas A. Coggins
