## **APPENDIX M**

## SITE VISIT INTERVIEW TOPICS

Site visit questions for interviews with administrators, staff, contractors, and community organization workers will be semi-structured; most questions will be open-ended, allowing the interview to proceed as a free-flowing conversation while allowing interviewers to collect comprehensive and consistent information in each site. We will develop tailored protocols starting from the preliminary list of questions used for initial telephone interviews with partners and from information obtained through other background data collection efforts. To minimize respondent burden, protocols for the individual and small-group interviews that are conducted on-site will be designed to last approximately 60 minutes each. We expect considerable refinement of key interview topics to occur based on collected background information and input from FNS staff, the key topics will address three of the key study objectives: describe the performance measures and standards in detail; discuss how they are implemented, the results, and how they are used; and assess the pros and cons of applying the measures and standards across states. The table below outlines some sample questions under each of these objectives, and suggests sources for identifying answers to these questions on-site. We anticipate asking most questions of each type of respondent to assess whether the understanding of what is being measured and why is consistent. We expect additions, deletions, and changes to this list of questions as the list is developed into an interview guide for on-site use. While we offer the interview guide here for illustrative purposes, it is a guide rather than a script.

\* If the selected site is not where the state staff are located, interviews with state staff will occur by telephone as part of site visit preparations.

\*\* Specialized supervisors and staff include specialized workforces within a state. These specialized locations are not limited to, but may include as appropriate: call centers, change collection and processing centers, case processors, and intake-only centers.
