Introduction to Sex-Related Questions

I now want to ask you about experiences you may have had with unwanted sex. Women may experience unwanted and uninvited sexual experiences by strangers or people they know well, such as a romantic or sexual partner, friend, teacher, coworker, supervisor, or family member. It can happen anywhere, such as a home, a car, at a job, or in another public place. She could be awake or asleep, unconscious, drunk, or high. She could be unable to give consent for some other reason when it happens. Women do not always report unwanted sex to the police. They often do not discuss it with friends or family members. Please keep this information in mind as we go through the survey. Your information will help us learn how often these things happen.

Some of the language we will use is explicit, but it is important that I ask the questions this way so that you are clear about what I mean. I will explain all the terms I use. I can always repeat the definitions if you need to be reminded. Your answers will be kept private. Remember, you don't have to answer any question that you don't want to.
