

Example:

***M. tuberculosis*/NTM Case History Form – NTM Supplemental Information**

Strain O – *M. marinum* Case History

Patient:	39-years old
Gender:	Male
Medical History:	HIV-positive
	Developed multiple cutaneous nodules on his hand and forearm
Patient Hobbies:	Maintains a tropical fish aquarium
	Because of his current anti-retroviral therapy, the physician does not wish to use a rifampin-containing regimen and asks for susceptibility testing to be performed on this isolate of <i>Mycobacterium marinum</i> .
