**DEPARTMENT OF HEALTH AND  
HUMAN SERVICES**

**Agency for Healthcare Research and  
Quality**

**Agency Information Collection  
Activities: Proposed Collection;  
Comment Request**

**AGENCY:** Agency for Healthcare Research  
and Quality, HHS.

**ACTION:** Notice.

**SUMMARY:** This notice announces the  
intention of the Agency for Healthcare  
Research and Quality (AHRQ) to request  
that the Office of Management and  
Budget (OMB) approve the proposed  
information collection project:  
“Development and Evaluation of  
AHRQ’s Quality Indicators Improvement  
Toolkit.” In accordance with the  
Paperwork Reduction Act, 44 U.S.C.  
3501–3520, AHRQ invites the public to  
comment on this proposed information  
collection.

This proposed information collection  
was previously published in the **Federal  
Register** on December 31st, 2009 and  
allowed 60 days for public comment.  
One comment was received. The  
purpose of this notice is to allow an  
additional 30 days for public comment.

**DATES:** Comments on this notice must be  
received by April 12, 2010.

**ADDRESSES:** Written comments should  
be submitted to: AHRQ’s OMB Desk  
Officer by fax at (202) 395-6974  
(attention: AHRQ’s desk officer) or by  
e-mail at  
*OIRA\_submission@omb.eop.gov*  
(attention: AHRQ’s desk officer).

Copies of the proposed collection  
plans, data collection instruments, and  
specific details on the estimated burden  
can be obtained from the AHRQ Reports  
Clearance Officer.

**FOR FURTHER INFORMATION CONTACT:**  
Doris Lefkowitz, AHRQ Reports  
Clearance Officer, (301) 427-1477, or by  
e-mail at  
*doris.lefkowitz@AHRQ.hhs.gov*.

**SUPPLEMENTARY INFORMATION:**

**Proposed Project**

*Development and Evaluation of AHRQ’s  
Quality Indicators Improvement Toolkit*

An important part of AHRQ’s mission  
is to disseminate information and tools  
that can support improvement in quality  
and safety in the U.S. health care  
community. See 42 U.S.C. 299(b)(1)(F);  
299a(a)(1) and (2). This proposed  
information collection supports that  
part of AHRQ’s mission by developing  
and evaluating a toolkit that will enable

hospitals to effectively use AHRQ’s  
Quality Indicators (QIs).

AHRQ has developed sets of QIs that  
can be used by the Agency and others  
to document quality and safety  
conditions at U.S. hospitals. Two sets of  
QIs will be used in this proposed  
toolkit: the Inpatient Quality Indicators  
(IQIs) and the Patient Safety Indicators  
(PSIs). The IQIs contain measures of  
volume, mortality, and utilization for  
common medical conditions and major  
surgical procedures. The PSIs are a set  
of measures to screen for potentially  
preventable adverse events that patients  
may experience during hospitalization.  
These QIs have been previously  
developed and evaluated by AHRQ, and  
are in use at a number of hospitals  
throughout the country. The QIs and  
supportive documentation on how to  
work with them are posted on AHRQ’s  
Web site at *http://www.qualityindicators.ahrq.gov*. Many  
of the QIs have been endorsed by the  
National Quality Forum through its  
consensus review process.

Values for each QI can be estimated  
for a given hospital by applying  
computations in SAS programs  
developed by AHRQ to the hospital’s  
pre-existing inpatient encounter data.  
To identify potential areas for  
improving the quality and safety of the  
care that a hospital provides, the  
hospital can use these data to examine  
its current performance on each QI  
measure, changes in its performance  
over time, and how its performance  
compares to that of other hospitals.  
However, despite the availability of the  
QIs as tools to help hospitals assess  
their performance, many U.S. hospitals

have limited experience with the use of such measurement tools, or in using quality improvement methods to improve their performance as assessed by these measures.

An alpha version of the Quality Indicators Improvement Toolkit will be developed, which then will be field tested by six hospitals. During the field test, the proposed evaluation will assess the usability of the Toolkit for hospitals, and it will examine their experiences in implementing interventions to improve their performance on the AHRQ QIs, as well as effects on trends in the hospitals' AHRQ QI values. Using results from the evaluation, the alpha Toolkit will be revised to yield a final Toolkit that will be effective in supporting hospitals' quality improvement efforts.

The development and evaluation of the Quality Indicators Improvement Toolkit will be conducted by AHRQ's contractor, the RAND Corporation, under contract number HHS290200600017I. RAND has subcontracted with the University HealthSystem Consortium (UHC) to partner in the development of the Toolkit and field testing of it with hospitals as they use the Toolkit in carrying out initiatives designed to improve performance on the QIs.

**Method of Collection**

Case study research methods will be used for this qualitative study. The following four data collection instruments will be used in the evaluation:

(1) *Pre/post-test interview protocol*—Consisting of both open- and closed-ended questions will be administered prior to implementation of the Toolkit and again post implementation. The purpose of this data collection is to obtain data on the steps the hospitals took to implement actions to improve performance on the QIs; their plans for

making process changes; and their experiences in achieving changes and perceptions regarding lessons learned that could be shared with other hospitals.

(2) *Update protocol*—Consisting of both open- and closed-ended questions will be administered three times during the study (quarterly during the implementation year). The purpose of this data collection is to capture longitudinal data regarding hospitals' progress in implementing changes, successes and challenges, and plans for subsequent actions. These data will include descriptive information on changes over time in the hospitals' implementation actions and how they are using the Toolkit, as well as experiential information on the perceptions of participants regarding the improvement implementation process and its effects. It also ensures the collection of information close to pertinent events, which avoids the recall bias associated with retrospective reporting of experiences.

(3) *Usability testing protocol*—Also consisting of both open and closed ended questions will be administered once at the end of the evaluation period. The purpose of this data collection is to gather information from the hospitals on how they used each tool in the Toolkit, the ease of use of each tool, which tools were most helpful, suggested changes to improve each tool, and suggestions for other tools to add to the Toolkit. This information will be used in the revisions of the Toolkit following the end of the field test.

(4) *AHRQ QI data collection tool*—Used to collect the IQI and PSI measures calculated by the hospitals both prior to implementation of the Toolkit and again post implementation. The purpose of this data collection is to determine if the hospitals' implementation actions, including use of the toolkit, had a measurable impact on the QI measures.

**Estimated Annual Respondent Burden**

Exhibit 1 shows the estimated annualized burden hours for the respondents' time to participate in this information collection. Three protocols will be used to collect data from respondents in interviews that will take one hour each. The pre/post-test interview protocol will be administered twice—at the beginning and end of the field-test year. The pre- test interviews will be performed as one-hour group interviews conducted with the six hospitals' implementation teams at the start of the year. At the end of the year, post-test interviews will be performed as one-hour group interviews with three of the hospitals and during site visits with the other three hospitals. At each site visit, data will be collected through one-hour interviews with the hospital's implementation team as well as through other group interviews performed separately with each of the key stakeholder groups—physicians, nurses, clerks, and others. The additional data from the stakeholder groups will allow triangulation of variations in perceptions and experiences among different groups, of which the implementation teams might not be aware.

The quarterly update protocol will be administered quarterly to 2 hospital staff members from each hospital during the year (in months 3, 6, and 9). The usability testing protocol will be administered to 4 staff members once at the end of the evaluation period. The AHRQ QI data collection tool will be used both pre- and post-implementation to collect the QI measures. The total burden is estimated to be 360 hours.

Exhibit 2 shows the estimated annualized cost burden associated with the respondents' time to participate in the evaluation. The total cost burden is estimated to be \$9,886.

EXHIBIT 1—ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of hospitals	Number of responses per hospital	Hours per response	Total burden hours
Pre/Post-Test Interview Protocol .....	6	26	1	156
Quarterly Update Protocol .....	6	6	1	36
Usability Testing Protocol .....	6	4	1	24
AHRQ QI Data Collection Tool .....	6	2	*12	144
Total .....	24	NA	NA	360

\* Includes time to program and run the computer programs necessary to produce the measures.

EXHIBIT 2—ESTIMATED ANNUALIZED COST BURDEN FOR HOSPITALS

Form name	Number of hospitals	Total burden hours	Average hourly wage rate*	Total cost burden
Pre/Post-Interview Protocol .....	6	156	\$27.46	\$4,284
Quarterly Update Protocol .....	6	36	27.46	989
Usability Testing Protocol .....	6	24	27.46	659
AHRQ QI Data Collection Tool .....	6	144	27.46	3,954
Total .....	24	360	NA	9,886

\*Based upon the mean of the average wages, National Compensation Survey: Occupational wages in the United States, March 2009, "U.S. Department of Labor, Bureau of Labor Statistics." Used as an overall average wage rate across the various types of staff involved in the quality improvements.

**Estimated Annual Costs to the Federal Government**

Exhibit 3 shows the estimated total and annualized cost of this project to

the government. The estimated total cost for the evaluation work is \$209,827 over the two-year year project, with an annualized total cost of \$104,914. These costs were developed based on

estimates of staff days required, to which administrative expenses are applied, and based on airfare, hotel, and per diem costs for staff travel for the site visits at the end of the evaluation.

EXHIBIT 3—ESTIMATED COST OF THE EVALUATION

Cost component	Total cost	Annualized cost
Protocol Development .....	\$40,278	\$20,139
Data Collection Activities .....	91,104	45,552
Data Analysis .....	45,252	22,626
Publication of Results .....	24,370	12,185
Travel for Site Visits .....	8,823	4,412
Total .....	209,827	104,914

**Request for Comments**

In accordance with the above-cited Paperwork Reduction Act legislation, comments on AHRQ's information collection are requested with regard to any of the following: (a) Whether the proposed collection of information is necessary for the proper performance of AHRQ healthcare research and healthcare information dissemination functions, including whether the information will have practical utility; (b) the accuracy of AHRQ's estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the Agency's subsequent request for OMB approval of the proposed information collection. All comments will become a matter of public record.

Dated: February 24, 2010.

**Food and Drug Administration**

[Docket No. FDA-2010-N-0121]

**Agency Information Collection Activities; Proposed Collection; Comment Request; Mammography Quality Standards Act Requirements**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on

the estimated reporting and recordkeeping burden associated with the Mammography Quality Standards Act requirements.

**DATES:** Submit written or electronic comments on the collection of information by May 10, 2010.

**ADDRESSES:** Submit electronic comments on the collection of information to <http://www.regulations.gov>. Submit written comments on the collection of information to the Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

**FOR FURTHER INFORMATION CONTACT:** Daniel Gittleston, Office of Information Management, Food and Drug Administration, 1350 Piccard Dr., PI50-400B, Rockville, MD 20850, 301-796-5156, [Daniel.Gittleston@fda.hhs.gov](mailto:Daniel.Gittleston@fda.hhs.gov).

**SUPPLEMENTARY INFORMATION:** Under the PRA (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public
