Typical User-Centered Design Interview Questions

- 1. Do you use the Internet? If so, how long have you been using it? How often do you use the Internet?
- 2. What types of things do you do on the Internet?
 - Banking/Bills
 - Shopping
 - Social Networking
 - E-Mail
 - Other
- 3. Have you ever had to do any business with the Social Security Administration (SSA) before?
- 4. Do you have an expectation of what kind of services you may want or need from SSA in the future?
- 5. If you were interested in getting Retirement, Medicare, or Disability benefits through SSA, how would you contact us?
 - Do you know where your local field office is? If not, how would you find it?
 - How would you find the phone number to call?
 - Do you know what SSA's web address is? If not, how would you find SSA on the web?
- 6. You may know that SSA has a website to offer information and services to the public. Have you ever visited SSA.gov? What were your impressions?
- 7. What do you expect you might be able to do at SSA.gov?

From this point, we would start to focus on the tasks more specifically related to the application we're building; but only as it is applicable. Meaning that many of our applications would only be used once (iClaim, i3368), but some may be used more often or some may emulate other Internet processes that a user might use (Change of Address, FOLO, iAppointment). Questions may include:

- 8. How do you currently do *X process*?
- 9. What materials to you have with you when you perform *X process*?
- 10. What are your expectations when you are finished performing X process?
- 11. Would you please walk us through how you perform *X process*?
- 12. What do you find difficult about the current process?
- 13. What would improve the current process?

The answers to these questions would likely lead to follow-up/clarifying questions so that we can get into the detail of users' goals and needs.
