DRAFT

INSTRUCTIONS

1. Please report information for all schools administered by your district (e.g., regular schools, charter schools, magnet schools, alternative schools, special education schools, etc.).
2. For all questions except question 18, report information only for students regularly enrolled in your district. Do not report information for students enrolled in schools that are not administered by your district (e.g., students from other districts, private school students, or home-schooled students).
3. Please provide the most complete information available, taking into account any distance education courses taken by students regularly enrolled in your district, regardless of where the courses originated. However, distance education courses that students take independently or that are provided by entities outside the control of the district should not be included unless the district has access to enrollment and monitoring information for those courses.
4. The time frame for this survey is the 12-month 2009–10 school year. This includes distance education courses during the summer of 2009 or the summer of 2010, depending on how records are kept at your district. References to “2009–10” in the survey questions refer to this 12-month school year.
5. The following definition applies to all questions on the survey.

DEFINITION OF DISTANCE EDUCATION

Distance education courses are courses offered to elementary and secondary school students regularly enrolled in your district that must:

- **be credit-granting;**
- **be technology-delivered** via audio, video (live or prerecorded), Internet, or other computer-based technology (e.g., via district network or CD-ROM); **and**
- **have either:**
 - (1) **the instructor in a different location than the students (e.g., interactive video courses); and/or**
 - (2) **course content developed in, or delivered from, a different location than that of the students (e.g., courses delivered via the Internet, district network, or CD-ROM).**

For the purposes of this survey, include any of the following if they meet the distance education criteria above:

- courses that have a teacher or assistant in the room who monitors but gives little or no instruction to the students (e.g., course taken entirely on computer in a lab supervised by a teacher who does not provide instruction).
- courses that include occasional face-to-face interactions between the course instructor and the students. For example, a teacher teaching a course at several schools via computer technology may rotate between schools, or the instructor and students may be in the same location for orientation or occasional lab work or tests.
- courses that originate from your district or from other entities (e.g., a state virtual school or a postsecondary institution).
- courses with synchronous (i.e., simultaneous or “real time”) and/or asynchronous (i.e., not simultaneous) instruction.
- courses taken by students in school, at home, or in some other location.
- courses taken by students to continue coursework while temporarily unable to attend school (e.g., while on home or hospital instruction, or on extended travel for personal or family reasons).
- courses taken for credit or grade recovery.
- courses taken for Advanced Placement credit or for college-level or dual credit.

For the purposes of this survey, exclude:

- virtual field trips, online homework or supplemental course materials.
- test preparation courses that are not credit-granting.
- courses conducted mainly via written correspondence.
- staff professional development.

Before you answer the questions, please carefully read the instructions and definition page.

1. Of the elementary and secondary students regularly enrolled in your district, were any enrolled in **distance education courses** in 2009–10?

Yes..... 1 (Continue with question 2.) No.....2 (Stop. Complete respondent section on front and return questionnaire.)

2. For the 2009–10 school year, report the number of **enrollments** in distance education courses of students regularly enrolled in your district.

- The number of enrollments may include duplicated counts of students; i.e., a student should be counted for each course in which he/she was enrolled.
- Count each enrollment at only one instructional level. Enter “0” if there were no students in your district enrolled in distance education courses at an instructional level in 2009–10.
- The sum of b-e should equal the total in item a.

- a. **Total number of enrollments in distance education courses**..... _____
- b. Number of enrollments in distance education courses in **elementary** schools..... _____
- c. Number of enrollments in distance education courses in **middle or junior high schools**..... _____
- d. Number of enrollments in distance education courses in **high schools**..... _____
- e. Number of enrollments in distance education courses in **combined or ungraded schools**..... _____

3. Can your district provide the **number of students** enrolled in distance education courses (i.e., an unduplicated count in which each student is counted only once, regardless of the number of courses in which he/she was enrolled)?

Yes..... 1 No..... 2 Don't know..... 3
