PART B - FLUE GAS DESULFURIZATION (FGD) SYSTEMS

Table of Contents

Plant ID: Insert Plant ID
Plant Name: Insert Plant Name

PART B. FLUE GAS DESULFURIZATION (FGD) SYSTEMS

INSTRUCTIONS

Part B requests information about flue gas desulfurization (FGD) systems that are located at the plant or are planned to be located at the plant. Complete Part B if you operate one or more FGD systems, or if you are currently constructing/installing or planning to construct/install one or more FGD systems by December 31, 2020.

Throughout Part B, information is requested on FGD systems that are under construction/installation or planned to be constructed/installed by December 31, 2020. Provide design information, or best engineering estimates as necessary, for these planned systems.

As you are completing the electronic form, note the following: When you enter your plant name and plant ID on the Part B Table of Contents tab, all name and ID fields throughout Part B will automatically populate. Refer to the overall questionnaire instructions, the glossary, and the acronym list for assistance with completing Part B.

Please provide all free response answers in the highlighted yellow areas. Throughout Part B, you may need to make copies of certain sections/questions for multiple FGD systems. Instructions are provided throughout Part B regarding making copies. Note that system ID fields must be populated on the copied tab or section, located in the upper right corner under "Plant ID" and "Plant Name", in order to correlate the requested information with the correct system.

Use the Part B Comments tab to do the following: provide additional information as requested in certain questions within Part B; indicate atypical data (e.g., if 2009 information is not representative of normal operations); and note methods used to make best engineering estimates in the event that exact data are not available.

Plant ID: Insert Plant ID
Plant Name: Insert Plant Name

Part: B
Section Title: 1. General FGD System Information

Instructions: Part B requests information about flue gas desulfurization (FGD) systems that are located at the plant or are planned to be located at the plant that are used to service fossil-fueled electric generating units. See Part A Section 8 for unit classifications. Complete Part B if you operate one or more *FGD systems*, or if you are currently constructing/installing or planning to begin constructing one or more FGD systems to service fossil-fueled electric generating units.

CBI? ☐ Ye

B1-1. Does the plant operate one or more flue gas desulfurization (FGD) systems that service fossil-fueled steam electric generating units, or is the plant currently constructing/installing or planning to construct/install one or more FGD systems to service fossil-fueled steam electric generating units by December 31, 2020?

○ Ye (Continue)
○ No (Skip to next Questionnaire Part)

CBI? ☐ Ye

B1-2. Complete Table B-1 for each FGD system that the plant operates that services fossil-fueled electric generating units, or is currently constructing/installing or planning to construct/install to service fossil-fueled electric generating units by December 31, 2020. Assign an FGD system ID to each FGD system using the drop down menu provided. Assign the FGD systems sequentially using the numbered IDs (e.g., FGD-1, FGD-2) for the systems currently operating. Assign the FGD systems sequentially using the lettered IDs (e.g., FGD-A, FGD-B) for the systems that are planned to operate. Enter the date the system initially began operation or is planned to begin operation. Identify each steam electric unit (currently operating or planned units) that is serviced by each FGD system using the codes EPA assigned to steam electric units in Table A-8 and/or Table A-9. Identify the type of oxidation performed in the FGD system for all wet FGD systems (Note: mark "Not Applicable" for dry FGD systems). Also provide the design sulfur dioxide removal efficiency for each FGD system.

Wet FGD systems capture sulfur dioxide from the flue gas using a wet slurry that generates a *process wastewater* that exits the scrubber absorber, shown as *FGD slurry blowdown* in Figure B-1 for recirculation scrubbers, or as FGD *slurry discharge* in Figure B-2 for single pass scrubbers. Indicate for each FGD system if FGD slurry blowdown (or FGD slurry discharge) is generated.

Use the drop down boxes to identify the type of FGD system and to specify the type(s) of sorbents used in the system. If a sorbent used is not provided in the drop down, identify "other" and provide the type(s) of sorbent in the yellow highlighted box to the right.

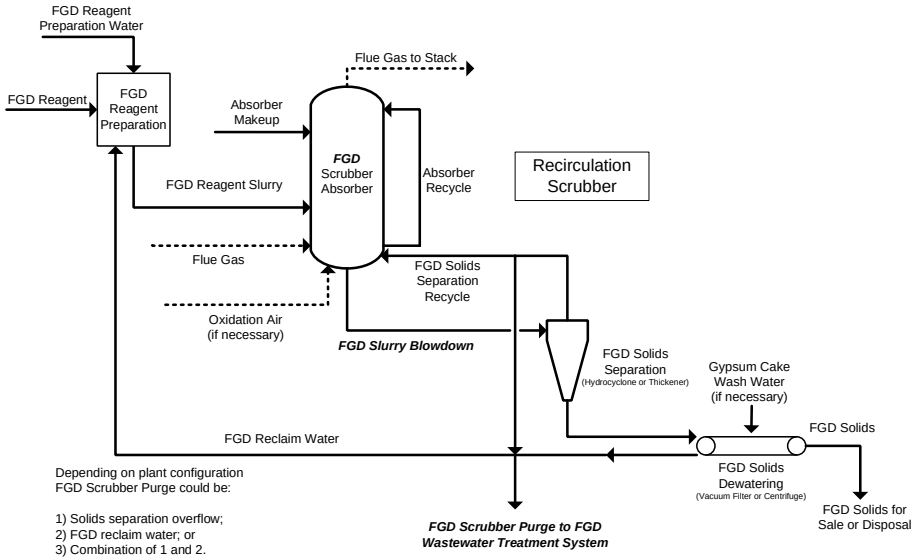

Figure B-1. Example Recirculation Wet FGD Scrubber System Diagram

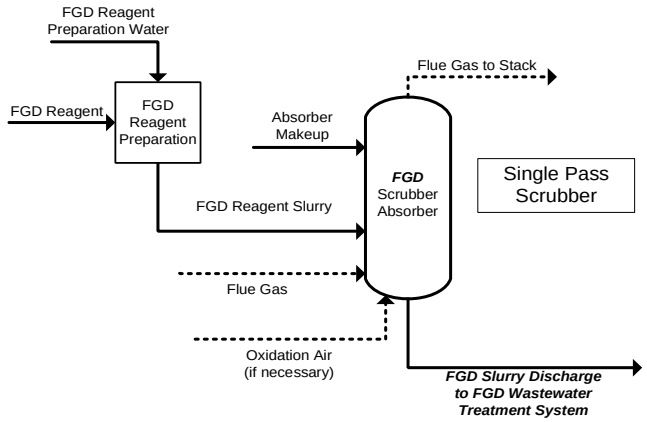

Figure B-2. Example Single Pass Wet FGD Scrubber System Diagram

Table B-1. FGD Systems in Operation or Planning to be Operated by December 31, 2020

Section Title: 2. Planned FGD System Information

Instructions: Throughout this section, provide information for all *FGD systems* under construction/installation or planned to be constructed/installed by December 31, 2020 that are reported in Table B-1 and are expected to generate *FGD slurry blowdown*. Please provide all free response answers in the highlighted yellow areas.

CBI?
☐ Yes

B2-1. Complete Table B-2 for each FGD system under construction/installation or planned to be constructed/installed by December 31, 2020 that is reported in Table B-1 and is expected to generate FGD slurry blowdown. Enter the planned method for handling solids generated, whether *FGD scrubber purge* (or *slurry discharge*) will be generated, the type of *wastewater treatment system*, the design maximum and 24-hour daily average flow rate for the treatment system, and the date the treatment system will be brought on line. Use codes from the Code Tables tab, as appropriate, and separate multiple entries with commas. If you do not know the type of wastewater treatment system that will be installed or the flow rate of the treatment system, enter "Unknown" into the appropriate columns in the table.

Table B-2. FGD Systems Planned or Under Construction/Installation

FGD System ID	Planned Solids Handling for the FGD Slurry Blowdown (See Solids Handling Table in Code Tables Tab) [a]	Will System Generate FGD Scrubber Purge (or Slurry Discharge)?	Will FGD Scrubber Purge (or Slurry Discharge) be Treated by New or Existing Treatment System	Type of Wastewater Treatment System Planned to Treat FGD Scrubber Purge(or Slurry Discharge) (See Wastewater Treatment Units Table in Code Tables Tab)	Design Flow Rate for FGD Treatment System		Estimated Date the New FGD Treatment System Will be Brought On Line (or Date FGD Scrubber Purge (or Slurry Discharge) Will be Transferred to Existing System) (month/year)
					Maximum (gpm)	24-Hour Daily Average (gpm)

Section Title: 4. Wet FGD System Information

Instructions: Throughout this section, you will be required to provide information for each *wet FGD system* that the plant operates, reported in Table B-1. This section does not need to be completed for planned systems. Please provide all free response answers in the highlighted yellow areas.

Make copies of Section 4 and the Section 4 tables for each wet FGD system previously defined in Table B-1 using the "Copy Section 4 and Section 4 Tables" button below. Please note that you will create two new tabs for these sections. You may delete unneeded tabs, if accidently created. Enter the FGD system ID in the space provided above (use FGD system IDs assigned in Table B-1).

CBI? ☐ Yes

B4-1. Did you report use of a FGD system that generates *FGD slurry blowdown* (i.e., wet system) in Table B-1?

○ Yes (Continue)
○ No (Skip to Section 8)

Copy Section 4 and Section 4 Tables

CBI? ☐ Yes

B4-2. Provide the operating concentration range of chlorides within the *FGD scrubber absorber*.

Minimum operating concentration: _____ ppm
Maximum operating concentration: _____ ppm

CBI? ☐ Yes

B4-3. Provide the maximum design chlorides concentration for the FGD system and indicate which specific equipment unit(s) of the FGD system determine this concentration (e.g., FGD scrubber absorber, piping). Also provide the materials of construction for the specific FGD equipment that determine the maximum design chlorides concentration. If multiple materials are used in the construction of the FGD equipment that determines the maximum design chlorides concentration, identify the component that is the most vulnerable to corrosion due to chlorides concentrations. If the material of construction is not provided in the drop down menu, select "other" and provide the name in the yellow box provided.

FGD system maximum design chlorides concentration: _____ ppm

FGD equipment that determines maximum design concentration: _____ Select _____

FGD equipment that determines maximum design concentration: _____ Select _____

FGD equipment that determines maximum design concentration: _____ Select _____

FGD equipment that determines maximum design concentration: _____ Select _____

CBI? ☐ Yes

B4-4. Indicate the FGD system parameter(s) that are used to determine when the FGD slurry is blown down from the FGD system. [Check all boxes that apply.]

☐ Chlorides concentration, maintaine _____ ppm

☐ Solids percentage, maintaine _____ and _____ %

☐ Other, expla _____

CBI? ☐ Yes

B4-5. For water sources that may be used as a source of FGD reagent preparation water or absorber make-up water (e.g., fresh intake, recycled process water), indicate the maximum chlorides concentration and maximum solids percentage that is acceptable for the water to be used for those purposes. Identify any other criteria that the source water must meet.

☐ Chlorides concentra _____ ppm

☐ Solids percenta _____ %

☐ Other, expla _____

CBI? ☐ Yes

B4-6. Provide the typical flow rate, duration, and frequency of the mist eliminator wash water for the FGD system for calendar year 2009. Provide 2010 data for systems that were not operating in 2009.

_____ gpm

_____ hpd

_____ dpy

CBI? ☐ Yes

B4-7. Provide the typical flow rate, duration, and frequency of the FGD reagent preparation water for the FGD system for calendar year 2009. Provide 2010 data for systems that were not operating in 2009.

_____ gpm
_____ hpd
_____ dpy

CBI? ☐ Yes

B4-8. Provide the typical flow rate, duration, and frequency of the FGD reagent slurry for the FGD system for calendar year 2009. Provide 2010 data for systems that were not operating in 2009.

_____ gpm
_____ hpd
_____ dpy

CBI? ☐ Yes

B4-9. Provide the typical flow rate, duration, and frequency of the absorber make-up water for the FGD system for calendar year 2009. Provide 2010 data for systems that were not operating in 2009.

_____ gpm
_____ hpd
_____ dpy

CBI? ☐ Yes

B4-10. Provide the source of the mist eliminator wash water used. [Check all boxes that apply.] If the source is a *process wastewater* not provided in the dropdown box, select other and provide in the yellow box the name of the process wastewater and a short description.

☐ Raw intake water
☐ Intake water that has been treated on sit
☐ Process wastewat Select _____
☐ Other, expl _____

CBI? ☐ Yes

B4-11. Provide the source of the FGD reagent preparation water used. [Check all boxes that apply.] If the source is a *process wastewater* not provided in the dropdown box, select other and provide in the yellow box the name of the process wastewater and a short description.

☐ Raw intake water
☐ Intake water that has been treated on sit
☐ Process wastewat Select
☐ Other, expl

CBI? ☐ Yes

B4-12. Provide the source of the absorber make-up water used. [Check all boxes that apply.] If the source is a *process wastewater* not provided in the dropdown box, select other and provide in the yellow box the name of the process wastewater and a short description.

☐ Raw intake water
☐ Intake water that has been treated on sit
☐ Process wastewa Select
☐ Other, explain

CBI? ☐ Yes

B4-13. Indicate the type of solids that are generated within the FGD scrubber system. Also provide the approximate percent of the total FGD solids generated within the FGD system for each type (e.g., 85% calcium sulfate, 15% calcium sulfite).

☐ Calcium sulfate (gypsum) % FGD solids generated
☐ Calcium sulfit % FGD solids generated
☐ Other, explai % FGD solids generated
☐ Other, expla % FGD solids generated

CBI? ☐ Yes

B4-14. Are the *FGD solids* combined with *fly ash*, *bottom ash*, or other material?

○ Yes (Continue)
○ No (Skip to Question B4-16)

CBI?
☐ Yes

B4-15. Is a cementitious/pozzolanic material produced with the FGD solids at the plant?

○ Yes
○ No

CBI?
☐ Yes

B4-16. Indicate the methods of *FGD solids separation* used by the plant for FGD slurry blowdown (or slurry discharge). Refer to Figure B-1 for an example of a FGD solids separation system. Note that FGD solids separation and FGD *solids dewatering* are separate processes. [Check all boxes that apply.]

☐ Hydrocyclones
☐ Centrifuge
☐ Thickener
☐ Other, expl
☐ Blowdown sent directly to a pond system reported in Table D-1 (no FGD so
☐ Blowdown sent directly to wastewater treatment system reported in Table D-2 (no FG

CBI?
☐ Yes

B4-17. Indicate the method of FGD *solids dewatering* used by the plant for the FGD solids. [Check all boxes that apply.]

☐ Vacuum drum filter
☐ Vacuum belt filter
☐ Gypsum stacking
☐ Other, expl

CBI?
☐ Yes

B4-18. Provide the typical, maximum, and minimum chlorides concentration of the FGD solids produced by the FGD system in calendar year 2009. The chlorides concentration should be given on a wet basis (i.e., analysis of the FGD with the moisture content included); however, if the chlorides concentration is not known on a wet basis, provide the dry-basis concentration and note that it is a dry-basis concentration in the comments.

Typical concentration: _____ ppm
Minimum concentration: _____ ppm
Maximum concentration: _____ ppm

CBI?
☐ Yes

B4-19. What parameters affect the ability of the FGD solids to be marketed, sold and/or given away? [Check all boxes that apply.]

☐ Chlorides conte _____ ppm
☐ Moisture conte _____ ppm
☐ Other, spec _____ _____ ppm
☐ None – Industry(ies) to which the FGD solids are marketed has not specified standarc
☐ N/A – FGD solids are not marketed, sold, or gi\

Section Title: 4. FGD Solids Disposition and Marketing for Wet FGD Systems

Instructions: Throughout this section, you will be required to provide information on *FGD solids* disposition for each *wet FGD system* that the plant operates, reported in Table B-1. This section does not need to be completed for planned systems. Please provide all free response answers in the highlighted yellow areas.

CBI?
☐ Yes

B4-20. In Table B-4, indicate the ultimate destination of FGD solids from the FGD system and provide the tonnage for each type of storage/handling technique for calendar years 2005, 2007, and 2009. If the FGD solids are stored in an on-site *landfill* or *pond/impoundment*, including those located on non-adjoining property, provide the amount of FGD solids stored permanently and/or temporarily.

For example, a plant may operate a *gypsum stacking* operation using a pond/impoundment, and some amount of FGD solids that are transferred to the pond/impoundment are dewatered and sold for use in wallboard manufacturing. In this case, the amount of FGD solids sold for wallboard manufacturing should be identified in BOTH the "Sent to Pond/Impoundment reported in Table A-4: Stored temporarily" category AND the "Marketed and Sold" category. In this same example, all the FGD solids that are transferred to the pond/impoundment and either left settling at the bottom of the pond/impoundment or used in increase the banks of the pond/impoundment should be identified as "Sent to Pond/Impoundment reported in Table A-4: Stored permanently."

Table B-4. FGD Solids Disposition for 2005, 2007, and 2009

Ultimate Destination of FGD Solids		Amount Disposed in 2005 (tons)	Amount Disposed in 2007 (tons)	Amount Disposed in 2009 (tons)
Sent to Landfills reported in Table A-6	Stored permanently			
	Stored temporarily (later hauled off-site/marketed)			
Sent to Pond/Impoundment reported in Table A-4	Stored permanently			
	Stored temporarily (later hauled off-site/marketed)			
Sent to Landfills not reported in Table A-6				
Sent to Pond/Impoundment not reported in Table A-4				
Marketed and sold				
Given away

Section Title: 6. FGD Monitoring Data Instructions

Instructions: Throughout this section, you will be required to provide monitoring data for all *wet FGD systems* that the plant operates, reported in Table B-1. This section does not need to be completed for planned systems. Please provide all free response answers in the highlighted yellow areas.

CBI?
☐ Yes

B6-1. Has your plant collected monitoring data (for any reason) for untreated *FGD scrubber purge* (or *slurry discharge*) in the 12 months prior to recieving the ICR for any of the following analytes:

- Metals (including monitoring data for total recoverable or dissolved metals analyses, or trace metals analyses);
- Ammonia;
- Nitrate/nitrite; and
- Total Kjeldahl nitrogen (TKN).

Note: The untreated FGD scrubber purge (or slurry discharge) stream is the *FGD wastewater* stream leaving the solids separation process prior to commingling with other water streams (see Figures B-1 and B-2).

◯ Yes (Provide the monitoring data as instructed below)
◯ No (Skip to Section 7)

Note: You are not required to perform non-routine tests or measurements solely for the purpose of responding to this question.

Provide the monitoring data in Table B-9 in the tab labeled "Part B Section 6 Table" for each different FGD scrubber purge stream for which the plant collected monitoring data. Report all results. Identify results that are less than the method detection limit (MDL), and results that are between the detection and reporting limits. Copy Table B-9 as many times as needed using the "Copy Table B-9" button below.

Copy Table B-9

Note: If you operate mulitiple *FGD solids separation* processes (e.g., two sets of hydroclones), only provide monitoring data collected after the last solid separation process. If necessary, you may provide additional information regarding the sample collection techniques or analytical methods in the Comments section (e.g., sample collection followed EPA Method 1669 protocols, dynamic reaction cell was used in conjunction with analytical method).

The following information should be provided for each data point:

- Name of analyte and CAS Number;
- Measured value including units (if not detected, list the *detection limit* value preceded by a less than (<) symbol);
- Analytical method used;
- Sample-specific detection limit for the method used;
- Sample-specific nominal quantitation limit stipulated for the method used;
- Date the sample was collected;
- Location where the sample was collected (e.g., purge tank which collects secondary hydroclone overflow);
- Whether the sample was collected as a grab or as a composite (and note the compositing period used);
- Description of any qualifiers for the measurement;
- For metals, whether the sample was analyzed as total recoverable or dissolved;
- Identification of FGD system(s) and steam electric generating unit(s) that the sample represents (report FGD System IDs and associated steam electric generating units from Table B-1); and
- Flow rate (only if flow rate data were recorded at the sampling point during the sampling period).

Part: B
Section Title: 6. FGD Monitoring Data

Instructions: Throughout this section, you will be required to provide information on monitoring data for untreated *FGD scrubber purge* (or *slurry discharge*) for all *wet FGD systems* that the plant operates, reported in Table B-1. This section does not need to be completed for planned systems. Please provide all free response answers in the highlighted yellow areas.

CBI?
☐ Yes

B6-2. Complete Table B-9 for all monitoring data for untreated FGD scrubber purge (or slurry discharge) collected by the plant (for any reason) in the 12 months prior to receiving the ICR for any of the following analytes: metals (including monitoring data for total recoverable or dissolved metals analyses), ammonia, nitrate/nitrite, and total Kjeldahl nitrogen (TKN). Complete a separate table for each different FGD scrubber purge (or slurry discharge) stream for which the plant is providing monitoring data. Report all results. Identify results that are less than the method detection limit (MDL), and results that are between the detection and reporting limits. For Question B6-2, identify the FGD systems and steam electric generating units associated with the FGD scrubber purge data provided in the table. Refer to the instructions in Part B Section 6 if you need assistance completing Table B-9.

Identify the FGD systems and steam electric generating units associated with the FGD scrubber purge (or slurry discharge) monitoring data provided in the table below. Use the FGD system IDs identified in Table B-1 and the SE unit IDs identified in Table A-8. [Check all that apply.]

Part: B
Section Title: 7. FGD Wastewater Treatment

Instructions: Throughout this section, you will be required to provide information for all *wet FGD systems* that the plant operates, reported in 1. This section does not need to be completed for planned systems. Please provide all free response answers in the highlighte areas.

CBI? ☐ Yes

B7-1. Does the plant transfer the *FGD scrubber purge* (or *slurry discharge*) to a *settling pond*?

○ Yes (Continue)
○ No (Skip to Question B7-4)

CBI? ☐ Yes

B7-2. Indicate which *process wastewaters* are commingled with the FGD scrubber purge (or slurry discharge) in the settling pond. [C boxes that apply.]

☐ Fly ash sluice ☐ Bottom ash sluice
☐ Metal cleaning waste ☐ Boiler blowdown
☐ Mill reject sluice ☐ Other, explai
☐ None ☐ Other, explai

CBI? ☐ Yes

B7-3. If the FGD scrubber purge (or slurry discharge) is commingled with *bottom ash* or *fly ash sluice* water in the pond(s), select the below that best describes the configuration of the pond(s). If neither option applies, provide an explanation in the space provide

☐ "True" commingling: FGD scrubber purge (or slurry discharge) and bottom ash and/or fly ash sluice water are combined in one pond dedicat
☐ FGD scrubber purge (or slurry discharge) is treated in a FGD pond and subsequently commingled with ash wate
☐ FGD scrubber purge (or slurry discharge) is not commingled with oth
☐ FGD scrubber purge (or slurry discharge) wastewater is treated using a wastewater treatment system other than a settling pond and subseq
☐ Other, expla

Section Title: 8. FGD Solids Disposition and Marketing for Dry FGD Systems

Instructions: Throughout this section, you will be required to provide information on *FGD solids* disposition for all *dry FGD systems* that the plant operates reported in Table B-1. This section does not need to be completed for planned systems. Please provide all free response answers in the highlighted yellow areas.

CBI?
☐ Yes

B8-12. In Table B-10, indicate the ultimate destination of FGD solids from the FGD system and provide the tonnage for each type of storage/handling technique for calendar years 2005, 2007, and 2009. If the FGD solids are stored in a *landfill* or *pond/impoundment*, provide the amount of FGD solids stored permanently and/or temporarily.

For example, a plant may operate a gypsum landfill, and some amount of FGD solids that are transferred to the landfill may later be removed from the landfill and sold for use in wallboard manufacturing. In this case, the amount of FGD solids sold for wallboard manufacturing should be identified in BOTH the "Landfills reported in Table A-6: Stored temporarily" category AND the "Marketed and Sold" category. In this same example, all the FGD solids that are transferred to the landfill and left in the landfill should be identified as "Landfills reported in Table A-6: Stored permanently."

Table B-10. FGD Solids Disposition for 2005, 2007, and 2009

Ultimate Destination of FGD Solids		Amount Disposed in 2005 (tons)	Amount Disposed in 2007 (tons)	Amount Disposed in 2009 (tons)
Sent to Landfills reported in Table A-6	Stored permanently			
	Stored temporarily (later hauled off-site/marketed)			
Sent to Pond/Impoundment reported in Table A-4	Stored permanently			
	Stored temporarily (later hauled off-site/marketed)			
Sent to Landfills not reported in Table A-6				
Sent to Pond/Impoundment not reported in Table A-4				
Marketed and sold				
Given away

Part: B
Section Title: 4. Wet FGD System Information

Instructions: Throughout this section, you will be required to provide information for each *wet FGD system* that the plant operates, reported in Table B-1. This section does not need to be completed for planned systems. Please provide all free response answers in the highlighted yellow areas.

Make copies of Section 4 and the Section 4 tables for each wet FGD system previously defined in Table B-1 using the "Copy Section 4 and Section 4 Tables" button below. Please note that you will create two new tabs for these sections. You may delete unneeded tabs, if accidently created. Enter the FGD system ID in the space provided above (use FGD system IDs assigned in Table B-1).

CBI? ☐ Yes

B4-1. Did you report use of a FGD system that generates *FGD slurry blowdown* (i.e., wet system) in Table B-1?

○ Yes (Continue)
○ No (Skip to Section 8)

CBI? ☐ Yes

B4-2. Provide the operating concentration range of chlorides within the *FGD scrubber absorber*.

Minimum operating concentration: _____ ppm
Maximum operating concentration: _____ ppm

CBI? ☐ Yes

B4-3. Provide the maximum design chlorides concentration for the FGD system and indicate which specific equipment unit(s) of the FGD system determine this concentration (e.g., FGD scrubber absorber, piping). Also provide the materials of construction for the specific FGD equipment that determine the maximum design chlorides concentration. If multiple materials are used in the construction of the FGD equipment that determines the maximum design chlorides concentration, identify the component that is the most vulnerable to corrosion due to chlorides concentrations. If the material of construction is not provided in the drop down menu, select "other" and provide the name in the yellow box provided.

FGD system maximum design chlorides concentration: _____ ppm

FGD equipment that determines maximum design concentration: _____ Select _____

FGD equipment that determines maximum design concentration: _____ Select _____

FGD equipment that determines maximum design concentration: _____ Select _____

FGD equipment that determines maximum design concentration: _____ Select _____

CBI? ☐ Yes

B4-4. Indicate the FGD system parameter(s) that are used to determine when the FGD slurry is blown down from the FGD system. [Check all boxes that apply.]

☐ Chlorides concentration, maintaine _____ ppm

☐ Solids percentage, maintainec _____ and _____ %

☐ Other, expla _____

CBI? ☐ Yes

B4-5. For water sources that may be used as a source of FGD reagent preparation water or absorber make-up water (e.g., fresh intake, recycled process water), indicate the maximum chlorides concentration and maximum solids percentage that is acceptable for the water to be used for those purposes. Identify any other criteria that the source water must meet.

☐ Chlorides concentra _____ ppm

☐ Solids percenta _____ %

☐ Other, expla _____

CBI? ☐ Yes

B4-6. Provide the typical flow rate, duration, and frequency of the mist eliminator wash water for the FGD system for calendar year 2009. Provide 2010 data for systems that were not operating in 2009.

_____ gpm

_____ hpd

_____ dpy

CBI? ☐ Yes

B4-7. Provide the typical flow rate, duration, and frequency of the FGD reagent preparation water for the FGD system for calendar year 2009. Provide 2010 data for systems that were not operating in 2009.

_____ gpm
_____ hpd
_____ dpy

CBI? ☐ Yes

B4-8. Provide the typical flow rate, duration, and frequency of the FGD reagent slurry for the FGD system for calendar year 2009. Provide 2010 data for systems that were not operating in 2009.

_____ gpm
_____ hpd
_____ dpy

CBI? ☐ Yes

B4-9. Provide the typical flow rate, duration, and frequency of the absorber make-up water for the FGD system for calendar year 2009. Provide 2010 data for systems that were not operating in 2009.

_____ gpm
_____ hpd
_____ dpy

CBI? ☐ Yes

B4-10. Provide the source of the mist eliminator wash water used. [Check all boxes that apply.] If the source is a *process wastewater* not provided in the dropdown box, select other and provide in the yellow box the name of the process wastewater and a short description.

☐ Raw intake water
☐ Intake water that has been treated on sit
☐ Process wastewat Select _____
☐ Other, expl _____

CBI? ☐ Yes

B4-11. Provide the source of the FGD reagent preparation water used. [Check all boxes that apply.] If the source is a *process wastewater* not provided in the dropdown box, select other and provide in the yellow box the name of the process wastewater and a short description.

☐ Raw intake water
☐ Intake water that has been treated on sit
☐ Process wastewat Select
☐ Other, expl

CBI? ☐ Yes

B4-12. Provide the source of the absorber make-up water used. [Check all boxes that apply.] If the source is a *process wastewater* not provided in the dropdown box, select other and provide in the yellow box the name of the process wastewater and a short description.

☐ Raw intake water
☐ Intake water that has been treated on sit
☐ Process wastewa Select
☐ Other, explain

CBI? ☐ Yes

B4-13. Indicate the type of solids that are generated within the FGD scrubber system. Also provide the approximate percent of the total FGD solids generated within the FGD system for each type (e.g., 85% calcium sulfate, 15% calcium sulfite).

☐ Calcium sulfate (gypsum) % FGD solids generated
☐ Calcium sulfit % FGD solids generated
☐ Other, explai % FGD solids generated
☐ Other, expla % FGD solids generated

CBI? ☐ Yes

B4-14. Are the *FGD solids* combined with *fly ash*, *bottom ash*, or other material?

○ Yes (Continue)
○ No (Skip to Question B4-16)

CBI?
☐ Yes

B4-15. Is a cementitious/pozzolanic material produced with the FGD solids at the plant?

○ Yes
○ No

CBI?
☐ Yes

B4-16. Indicate the methods of *FGD solids separation* used by the plant for FGD slurry blowdown (or slurry discharge). Refer to Figure B-1 for an example of a FGD solids separation system. Note that FGD solids separation and FGD *solids dewatering* are separate processes. [Check all boxes that apply.]

☐ Hydrocyclones
☐ Centrifuge
☐ Thickener
☐ Other, expl
☐ Blowdown sent directly to a pond system reported in Table D-1 (no FGD so
☐ Blowdown sent directly to wastewater treatment system reported in Table D-2 (no FG

CBI?
☐ Yes

B4-17. Indicate the method of FGD *solids dewatering* used by the plant for the FGD solids. [Check all boxes that apply.]

☐ Vacuum drum filter
☐ Vacuum belt filter
☐ Gypsum stacking
☐ Other, expl

CBI?
☐ Yes

B4-18. Provide the typical, maximum, and minimum chlorides concentration of the FGD solids produced by the FGD system in calendar year 2009. The chlorides concentration should be given on a wet basis (i.e., analysis of the FGD with the moisture content included); however, if the chlorides concentration is not known on a wet basis, provide the dry-basis concentration and note that it is a dry-basis concentration in the comments.

Typical concentration: _____ ppm
Minimum concentration: _____ ppm
Maximum concentration: _____ ppm

CBI?
☐ Yes

B4-19. What parameters affect the ability of the FGD solids to be marketed, sold and/or given away? [Check all boxes that apply.]

☐ Chlorides conte _____ ppm
☐ Moisture cont _____ ppm
☐ Other, spec _____ _____ ppm
☐ None – Industry(ies) to which the FGD solids are marketed has not specified standarc
☐ N/A – FGD solids are not marketed, sold, or gi

Section Title: 4. FGD Solids Disposition and Marketing for Wet FGD Systems

Instructions: Throughout this section, you will be required to provide information on *FGD solids* disposition for each *wet FGD system* that the plant operates, reported in Table B-1. This section does not need to be completed for planned systems. Please provide all free response answers in the highlighted yellow areas.

CBI?
☐ Yes

B4-20. In Table B-4, indicate the ultimate destination of FGD solids from the FGD system and provide the tonnage for each type of storage/handling technique for calendar years 2005, 2007, and 2009. If the FGD solids are stored in an on-site *landfill* or *pond/impoundment*, including those located on non-adjoining property, provide the amount of FGD solids stored permanently and/or temporarily.

For example, a plant may operate a *gypsum stacking* operation using a pond/impoundment, and some amount of FGD solids that are transferred to the pond/impoundment are dewatered and sold for use in wallboard manufacturing. In this case, the amount of FGD solids sold for wallboard manufacturing should be identified in BOTH the "Sent to Pond/Impoundment reported in Table A-4: Stored temporarily" category AND the "Marketed and Sold" category. In this same example, all the FGD solids that are transferred to the pond/impoundment and either left settling at the bottom of the pond/impoundment or used in increase the banks of the pond/impoundment should be identified as "Sent to Pond/Impoundment reported in Table A-4: Stored permanently."

Table B-4. FGD Solids Disposition for 2005, 2007, and 2009

Ultimate Destination of FGD Solids		Amount Disposed in 2005 (tons)	Amount Disposed in 2007 (tons)	Amount Disposed in 2009 (tons)
Sent to Landfills reported in Table A-6	Stored permanently			
	Stored temporarily (later hauled off-site/marketed)			
Sent to Pond/Impoundment reported in Table A-4	Stored permanently

Section Title: 6. FGD Monitoring Data

Instructions: Throughout this section, you will be required to provide information on monitoring data for untreated *FGD scrubber purge* (or *slurry discharge*) for all *wet FGD systems* that the plant operates, reported in Table B-1. This section does not need to be completed for planned systems. Please provide all free response answers in the highlighted yellow areas.

CBI?
☐ Yes

B6-2. Complete Table B-9 for all monitoring data for untreated FGD scrubber purge (or slurry discharge) collected by the plant (for any reason) in the 12 months prior to receiving the ICR for any of the following analytes: metals (including monitoring data for total recoverable or dissolved metals analyses), ammonia, nitrate/nitrite, and total Kjeldahl nitrogen (TKN). Complete a separate table for each different FGD scrubber purge (or slurry discharge) stream for which the plant is providing monitoring data. Report all results. Identify results that are less than the method detection limit (MDL), and results that are between the detection and reporting limits. For Question B6-2, identify the FGD systems and steam electric generating units associated with the FGD scrubber purge data provided in the table. Refer to the instructions in Part B Section 6 if you need assistance completing Table B-9.

Identify the FGD systems and steam electric generating units associated with the FGD scrubber purge (or slurry discharge) monitoring data provided in the table below. Use the FGD system IDs identified in Table B-1 and the SE unit IDs identified in Table A-8. [Check all that apply.]

Section Title: 8. FGD Solids Disposition and Marketing for Dry FGD Systems

Instructions: Throughout this section, you will be required to provide information on *FGD solids* disposition for all *dry FGD systems* that the plant operates reported in Table B-1. This section does not need to be completed for planned systems. Please provide all free response answers in the highlighted yellow areas.

CBI?
☐ Yes

B8-12. In Table B-10, indicate the ultimate destination of FGD solids from the FGD system and provide the tonnage for each type of storage/handling technique for calendar years 2005, 2007, and 2009. If the FGD solids are stored in a *landfill* or *pond/impoundment*, provide the amount of FGD solids stored permanently and/or temporarily.

For example, a plant may operate a gypsum landfill, and some amount of FGD solids that are transferred to the landfill may later be removed from the landfill and sold for use in wallboard manufacturing. In this case, the amount of FGD solids sold for wallboard manufacturing should be identified in BOTH the "Landfills reported in Table A-6: Stored temporarily" category AND the "Marketed and Sold" category. In this same example, all the FGD solids that are transferred to the landfill and left in the landfill should be identified as "Landfills reported in Table A-6: Stored permanently."

Table B-10. FGD Solids Disposition for 2005, 2007, and 2009

Ultimate Destination of FGD Solids		Amount Disposed in 2005 (tons)	Amount Disposed in 2007 (tons)	Amount Disposed in 2009 (tons)
Sent to Landfills reported in Table A-6	Stored permanently			
	Stored temporarily (later hauled off-site/marketed)			
Sent to Pond/Impoundment reported in Table A-4	Stored permanently
