### Goals/Objectives/Expected Outputs

Provide a clear, concise statement of the goals and objectives of the project as stated in the approved application or as approved by NIFA. The goals and objectives should be specific and attainable within the duration of the project and with the available resources. If the application lists milestones/target dates for important activities or phases of the project, include this information. Include a description of the expected **outputs** from the project. For multistate projects, enter the objective(s) exactly as defined in the multistate project outline (expected outputs may be summarized or truncated so as not to exceed the character limits for this section). ### Methods

Describe the ways in which the project will be conducted with emphasis on the general scientific methods and any unique aspects or significant departures from usual methods. Include a description of how the results will be analyzed, evaluated, or interpreted. Describe the **efforts** that will be used to cause a change in knowledge, actions, or conditions of a target audience. Include a description of how the output(s) will be **evaluated** and/or quantified for its impact on the intended audience(s). [more ...](#)

### Non-Technical Summary

Describe the situation that creates a need for this project as well as the purpose or rationale for the project. Also include general statements describing the methods to be used, the expected **outcomes/impacts**, and the anticipated benefits. Provide information at a level that most citizens can understand. This nontechnical summary is designed to enhance the usefulness of the information in the database, especially to legislative and other public audiences. [more ...](#)

### Keywords

It is important to assign appropriate keywords for automated information retrieval of project information. Limit keywords to one- or two-word terms. Collectively, the keywords for a project should resemble an abbreviated abstract of the project. [more ...](#)
