

Crosswalk for CMS 906 OMB # 0938-0469

Explanatory Paragraph:

The reason for modification to this collection effort is to add financial information collected under the Medicare Part D Reporting Requirements Section XIV (OMB # 0938-0992) to the Fiscal Soundness Reporting Requirements collection (OMB # 0938-0469). The Fiscal Soundness Reporting Requirements document (Fiscal Soundness Reporting Requirements.doc) in this collection effort actually originates from the Part D collection because there was no document that specified what was to be reported by the organizations under the Fiscal Soundness Reporting Requirements collection. Once this collection effort is approved Part D (MDBG) will submit a request to remove the Licensure & Solvency, Business Transactions and Financial Reporting Requirements section from the Medicare Part D Reporting Requirements. Both the original document referred to in this paragraph and the Fiscal Soundness Reporting Requirements document in this collection effort are instructional.

Details:

Page #	Section	Paragraph	Explanation for Change	Increase or decrease in burden
1			Title Changed to reflect module in HPMS where all organization types report financial information.	NA
1		1	Changes made to reflect all organization types reporting not just organizations under Part D.	NA
1 (bullets)			Changes were made here to reflect the addition of other organization types.	NA
2	1		Adds PDP reporting requirements to this collection.	increase
3	2		Adds PDP employer group direct requirements to this collection	increase
3	II		Title change reflects Fiscal Soundness Reporting Requirements instead of Financial and solvency requirements.	NA
4	V		Adds PDPs data elements requirements to this collection (increase). Change was also made to original document to include data elements collection for MAOs, Demonstration plans and 1876 Cost Plans. The data elements for those organization types were already being collected under OMB # 0938-0469 thus there is no increase in burden. Data elements being collected from all organization types decrease to four but this decrease is negligible. The addition of Part D in this section increase the overall burden in this section.	increase
