

Thank you very much for agreeing to participate in our online survey. As a person who recently purchased a new vehicle or is planning on doing so, your opinions are very important to us.

The auto industry is creating many new and exciting technologies to power our vehicles more efficiently. To help people make the best choices for them, the fuel economy label that appears on all new vehicles sold in the United States is being revised by the United States Environmental Protection Agency and Department of Transportation. These revisions will allow all of us to compare more accurately among all vehicle technologies.

Your participation in our brief (12-15 minutes) online survey is completely voluntary and critical to the label redesign effort. All your responses will be completely anonymous and will only be reported in combination with those of other survey respondents.

The survey is best viewed by maximizing your computer screen. Please be sure to scroll down to the bottom of each page and click the "Next" button to proceed. The bar at the bottom of each page tells you how much of the survey you have completed.

The survey is programmed so that if you need to stop and complete it at a later time you will be brought back to where you left off. (Just click 'Exit this survey' in the top right hand corner if you need to stop before completing the survey.)

Please click "Done" at the end of the survey so that your answers will be saved in our database. Once you have clicked "Done", you will not be able to make any changes.

Please complete the survey by September 22, 2010. Thank you for sharing your opinions!

In this section we are interested in the type of new vehicle (not used, not leased, not a motorcycle) you purchased most recently.

\* 1. Did you purchase a new vehicle (not used, not leased, not a motorcycle) in the last 12 months?

jn No jn Yes

2. What make and model of new vehicle did you purchase most recently? (Makes are listed alphabetically. Click on the 'drop down box' and scroll down to find your vehicle.)

Vehicle Purchase - Bu	yers Label 3 (Reversed)
3. Are you the primary d	
j₁∩ No	
jn Yes	
jn Equally share use of this vehicle	
(For example: City 25; H	f city and highway driving you do with this vehicle? lighway 75. The city and highway numbers should ole numbers. DO NOT INCLUDE THE PERCENT
Highway %	
5. About how many mile	es is this vehicle driven on a typical day?
jn 20 miles or less	j₁∩ 61-70 miles
jn 21-30 miles	$j_{\cap}$ 71-80 miles
j <sub>∩</sub> 31-40 miles	$j_{\cap}$ 81-90 miles
jn 41-50 miles	j <sub>∵∩</sub> 91-100 miles
j <sub>∵∩</sub> 51-60 miles	j <sub>∩</sub> More than 100 miles

### Vehicle Purchase - Buyers Label 3 (Reversed) 6. Thinking about your vehicle selection process, what actions did you take and in what order did you take them? (ONLY CHECK ACTIONS YOU TOOK.) Do this by checking the first thing you did in the #1 column, checking the second thing you did in the #2 column, etc. Discussed with people you know Visited a dealership Looked at manufacturer internet sites Looked at other internet sites (such as Edmunds.com, cars.com, vehix.com) Looked at magazines, newspapers, or other printed sources of information Looked at dealership internet sites Other important things you did in your vehicle selection process (please specify here) 7. Which types of vehicles did you seriously consider when you first started looking for a new vehicle? (Check all that apply.) Pickup truck Sports car Large car Station wagon Subcompact car Minivan Sport utility vehicle (SUV) Full-size van Compact car Other (please specify below) Midsize car Crossover If chose 'other', please specify here 8. Please identify up to 3 vehicles you seriously considered before making your final decision. (Makes are listed alphabetically. Click on the 'drop down boxes' and scroll down to find your vehicles.) Vehicle 1 Vehicle 2 Vehicle 3 6 6 6 Vehicles seriously considered

9. What were the top 5 primary factors or attributes that drew you to the vehicles you seriously considered? Please rank order these by checking your #1 factor in the #1 column, checking your #2 factor in the #2 column, and so on until your top 5 factors have been ranked. BE SURE TO SCROLL DOWN SO THAT YOU CAN SEE ALL THE FACTORS/ATTRIBUTES.

	#1	#2	#3	#4	#5

We are interested in your thoughts about the fuel economy label as a source of information.

14. Do you remember seeing the fuel economy label on vehicle windows when shopping for your most recent new vehicle?

jm	No
jm	Yes
jm	Don't know

15. On a scale of 1 to 7, where 1 is 'not important at all' and 7 is 'very important', how important was the <u>FUEL ECONOMY</u> LABEL in helping you to choose the make and model of your most recent new vehicle?

	1 = Not important at all	2	3	4	5	6	7 = Very important
Level of importance	jα	<b>j</b> m	ja	<b>j</b> n	<b>j</b> n	<b>j</b> ta	jα

Please note that the information in the following paragraphs is not a question but a description of the different types of vehicle technologies. It is important to read the information below for answering questions on the following pages.

Four types of advanced technology vehicles are either already available or will be in the near future:

- Hybrid Vehicles use a gasoline engine as well as an electric motor to propel the vehicle. However, the only fuel a hybrid vehicle uses is gasoline, either to propel the vehicle or to charge the battery.
- Electric Vehicles use electricity stored in batteries to propel the vehicle. You charge the battery by plugging your vehicle into an electrical outlet. The vehicle travels until the charge is depleted or you re-charge it. You do not have the option to run it on gasoline.
- Extended Range Electric Vehicles have two modes of operation, when the battery is charged and when it isn't. 1) Once charged, the vehicle at first runs on only electricity. 2) When the battery is discharged, it uses gasoline, either to propel the vehicle or to charge the battery. Important: daily driving distance can GREATLY affect amount of gasoline used. Can go all the way from zero gasoline (if shorter commutes and plenty of recharging) to entirely gasoline (if longer drives and no recharging).
- Plug-in Hybrid Electric Vehicles work like an Extended Range Electric Vehicle in that it has two modes of operation—when battery is charged and when it isn't, but: 1) When it's charged, the vehicle uses up the charge along with some gasoline. 2) When the battery is discharged, it uses gasoline, either to propel the vehicle or to charge the battery. Important: daily driving distance can GREATLY affect amount of gasoline used.

To help consumers decide whether advanced technology vehicles might be good choices for them, the fuel economy label is being revised. These revisions will allow you to compare more accurately among all vehicle technologies. Your answers to the following questions will help this label redesign effort.

The next 6 questions ask you to look at the labels from two vehicles. YOU SHOULD ASSUME THAT ANY PLUG-IN VEHICLES START FULLY CHARGED AND THERE ARE NO RECHARGING OPPORTUNITIES DURING THE SPECIFIED TRIP.

WHEN ANSWERING QUESTIONS ON THE FOLLOWING PAGES, PLEASE BE SURE TO SCROLL TO THE RIGHT SO THAT YOU CAN SEE ALL OF BOTH LABELS.
