Begin

In this study, we are examining different ways of presenting questions on computer screens. The questions will be about your computer and Internet experience. Some of the questions will ask how often you do certain things on the Internet and will be about your experience. Some questions will ask about your operating system and where you typically use the Internet. Some questions will ask how difficult it is for you and how comfortable you are doing certain things on the Internet. The entire survey should take about 15 minutes to complete. Thank you for participating in this study.
